WITHDRAWN FROM THE LIBRARY

MUTUAL LIFE ASSURANCE

SCOTTISH PROVIDENT INSTITUTION.

ESTABLISHED 1837. INCORPORATED 1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

ITS DISTINCTIVE SYSTEM of **whole Life Assurance** offers to Members the advantage of **with profit** rates which differ but little from the **non-profit** rates usually charged.

Premiums for £100 payable at Death (with right to share in Surplus).

Age next Birthday.	25	30	35	40	45	50	55
During Life	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 3 2	£5 2 3
25 Payments	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8	5 5 8

The **whole Surplus** goes to the Policy-holders on a system at once safe and equitable—no share being given to those by whose early death there is a **loss** to the Common Fund.

Endowment Assurance.

SPECIAL CLASS WITH SEPARATE FUND.

Policy-holders in this Class share exclusively in the whole Surplus thereof, and Bonuses on the compound system have been allocated at the high rate of **35/-** per cent. per annum.

Annuities.

REVISED RATES MAY BE HAD ON APPLICATION.

FUNDS amount to £16,000,000.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON: 3, LOMBARD STREET, E.C.; WEST END: 17, PALL MALL, S.W.

LONDON OFFICE: 3, LOMBARD STREET, E.C.—D. A. PIKE, *Secretary.*

31&29, GREAT PORTLAND St., W.

This is the **26th** year of the appearance of my announcement on this page of *Whitaker*, in itself a sufficient argument that mine is not an ephemeral business. Every household, no matter in what part of the world, that values a genuine article in the way of clothing must, or should, be interested in the following condensed catalogue of my specialities. Here are, in immense bulk and variety, priced at moderate rates, the thinnest and finest cloths for hot climates; most suitable cloths for semi-tropical regions; useful and hardwearing cloths for temperate climates; and extra heavy cloths for cold countries; suited in each case to the tastes and requirements of the official classes, scientific, explorers', and professional use; business, farm, and mechanic's wear. All of the highest standard of British manufacture. My business is essentially an international one, with customers in almost every corner of the civilised world, from the Yukon to the Falkland Islands. W. B.

Description of some of my Standard Goods. Detailed Catalogues on application.

IRISH FRIEZES (strong, rough TWEEDS). These are *par excellence* the Cloths for **Country Suits,** for **Travellers,** for **Sportsmen,** and for **Cold Climates,** being substantial, warm, pliable, hard-wearing, and almost weather-proof; made in various mixtures; dark and light, plain and plaids. Make also most useful and comfortable Ulsters. Price 3s. 6d. to 4s. 6d. yard, 28 inches wide.

Very stout **IRISH TWEEDS** for rough country wear at home or abroad. 3s. 3d. to 4s. 9d. yard. Splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.

Extra thick **FRIEZES,** plain, plaid, and napped, for heavy travelling, driving, and motoring Ulsters, double width, from 8s. 9d. to 16s. 6d. yard; also the warm, soft, and woolly Duffle Friezes.

Useful and substantial **TWEEDS** for ordinary wear, town or country, 3s. to 5s. yard, 28 inches. (For youths' wear many of these are excellent, being hard twisted and closely woven.)

"SAXONY" and **WORSTED TWEEDS** for professional or business wear, made from, or mixed with, fine colonial wools. 56 in., 6s. 9d. to 12s. 6d. yard, according to weight and degree of fineness.

Thin Hand Loom and **Power Loom TWEEDS** make capital suits for warm climates or for home summer wear, being light, woolly, and cool. Single width from 2s. 6d., and double width 4s. 9d. yard. Some of these are also admirably suited for Ladies' Gowns, Cloaks, and Ulsters, others for Cycling, and still others for small boys' suits.

CONNEMARA, TIPPERARY, ANTRIM, CORK, KERRY, DONEGAL, ERRIGAL and **MAYO HOMESPUNS:** These are hand-spun and hand-woven by the peasantry, and are priced according to weight and character; width 27 in. to 30 in., and price varies between 2s. 6d. and 5s. 6d. yd. Many of these webs are extremely rare and distinctive.

A vast stock of the famous **HARRIS, LEWIS, SHETLAND,** and **ST. KILDA** HOMESPUNS.

NATURAL WHITE, BROWN, and **GREY HOMESPUNS,** light, medium, and heavy.

DYED HOMESPUNS, beautiful and artistic colourings; exclusive. For ladies' wear.

Special **TWEEDS** for Mourning and Clerical wear, 2s. 6d. to 5s. 6d. yard, 28 in. wide.

NAVY SERGES of superior manufacture and hard wear, comprising the recognised yachting qualities, those for ordinary wear, and the rough, strong Royal Navy **SERGES;** price according to quality and weight, 5s. 6d. yd. upwards, 56 in. Also Black and Grey **SERGES.**

OVERCOATINGS, BLACK and **GREY COATINGS, RAIN COATINGS, WHIP-CORDS** or **RIDING TWEEDS** and **TROUSERINGS,** all of sterling value, and fixed, closest prices.

SUPERFINE FLANNELS & TWEEDS, also **CASHMERES;** for thinnest **TROPICAL SUITS.**

TRAVELLING RUGS (IRISH & SCOTCH), in great variety, 10s. 9d. to 35s.

HAND-KNITTED HOSIERY, made by the Irish and Scotch peasantry. Socks, 18d. to 2s. 9d. pair. Stockings, plain ribbed, 3s. 9d. to 4s. 9d. pair; Fancy, 4s. 6d. to 6s. 9d. pair. Gloves, 18d. to 2/9 pair.

FLANNEL TWEEDS for thin tropical suits, made of selected home wools, including natural browns and useful mixtures; well spun and close woven. They wear extremely well and wash without shrinking. Highly recommended for Indian, African, Australian, and Argentine wear. Also for travellers and explorers. 2s. 3d. to 3s. 6d. yard, 28 in. **SHIRTINGS** for Colonial Wear.

Special:—Best quality **KHAKI** for Uniforms.

Patterns of any of above by request. Applicants must be explicit in stating their wants as to quality and purpose, also fancy as regards pattern, and whether for Town or Country wear. A promise should also be given that they will be returned carefully within a week, anywhere in the United Kingdom (those living in London are expected to call and view the stock for themselves);—abroad, by next mail after two weeks' time for examination.

With few exceptions I allow a discount of 10 % off above prices for orders aggregating over 100 yards at a time—7½ % ditto over 50 yards; and 5 % over 25 yards—an inducement to circulate the patterns amongst friends, especially when sent to distant countries; the higher discounts are great concessions.

Parties abroad, not caring to wait for Patterns to be sent to order from, may depend upon my exercising diligence and fidelity in selecting for them, if they give a clear indication of their wants and enclose a remittance (as I know by experience the kind of cloths best suited to every climate and country). Any surplus will be at their disposal.

Arrangements have been made with tailoring firms of repute to make up these cloths if desired by Customers. Although we do not make the extravagant promises of some advertisers, we shall endeavour to maintain our reputation in this department also. To share in this arrangement, send usual measurements, or old suit, or call.

Average quantities for man's SUIT, 7 yds. 28 in., or 3½ yds. 56 in.; ditto for OVERCOAT, 5 to 7 yds. 28 in. or 2½ to 3½ yds. 56 in. Weight varies from about 3 lbs. for a thin Cashmere or Flannel to 8 lbs. for a thick Frieze.

AN

Almanack

For the Year of Our Lord

1916

BY

JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE

ASTRONOMICAL AND OTHER PHENOMENA

A vast Amount of INFORMATION respecting the GOVERNMENT, FINANCES, POPULATION, COMMERCE, and GENERAL STATISTICS of the various Nations of

The World

with special reference to

The British Empire

and

The United States

LONDON

OFFICE: 12, WARWICK LANE,

PATERNOSTER ROW

PRICE HALF-A-CROWN.

NOTE.—WHITAKER'S ALMANACK is supplied to the Trade on the distinct understanding that it will not be sold to the Public at less than the published price.

PREFACE TO THE XLVIIITH ANNUAL VOLUME.

(1916.)

IN the earlier pages of the ALMANACK, the subjects usually looked for will be found in their accustomed places. The list of Honours has increased in length, the Record of Recipients of the Cross for Valour alone occupying two pages. Government Offices have also been extended, and a full list of members of the recently formed Ministry of Munitions included.

The Navy and Army Lists, on the other hand, are curtailed, little information being available in either case. In other departments also some handicap has been experienced, the issue of several official publications having been delayed or for the present discontinued.

The Country's Balance Sheet and Profit and Loss Account, together with the War Budget and the new Income Tax rates, will be found duly set forth, while the "Diary of the War" has been continued to the end of last October. Supplementing this are two articles on the Military and Naval operations of the past twelve months, which together furnish a connected history of the year's warfare.

Among other subjects dealt with in the current volume may be noted "Trading with the Enemy," "British Imports," "British and Enemy Trade," "War Medals," "Commercial Scholarships," "National Dye Scheme," "Labour and the War," "Trade Unions," and a Table of Naval Losses.

The Editor has once again to express his hearty thanks for the cordial co-operation of numerous correspondents in all parts of the World for many valuable suggestions tending to the improvement of the Almanack. Unfortunately, several important and interesting communications have come to hand too late for incorporation in the present volume, and the Editor would impress on correspondents the desirability, with a view to their utility, of all such communications reaching the ALMANACK Office before the end of October.

CASUALTIES IN THE BRITISH FORCES IN THE VARIOUS WAR AREAS.

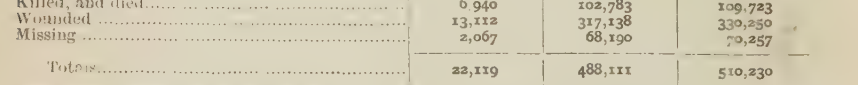
up to November 9, 1915.

—	Officers.	Other ranks.	Totals.
Killed, and died	6 940	102,783	109,723
Wounded	13,112	317,138	330,250
Missing	2,067	68,190	70,257
Totals	22,119	488,111	510,230

DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 15th to the 22nd of Jan. 1916, there is moonlight from 6 P.M. till 6 A.M., but from the 1st to the 7th it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—



WHITAKER'S ALMANACK, 1916.

BEING BISSEXTILE OR LEAP YEAR, AND 6 AND 7 OF KING GEORGE V.

Common Notes for the Year 1916.

Golden Number	XVII.	Birth of Queen Mary (1867)	May 26
Epact	25	Union Day, South Africa	31
Solar Cycle	21	*Ascension Day—Holy Thursday*	June 1
Roman Indiction	14	Birthday of King George V. (1865)	,, 3
Dominical Letters	BA	*Pentecost—Whit Sunday*	,, 11
Julian Period (Year of)	6629	*Trinity Sunday*	,, 18
Wattle Day, Australia	Jan. 26	*Corpus Christi*	,, 22
Septuagesima Sunday	Feb. 20	Birth of Prince of Wales (1894)	,, 23
Ash Wednesday	March 8	Sundays after Trinity	,, 23
Good Friday	April 21	Dominion Day, Canada	July 1
Easter Day	,, 23	Independence Day, U.S.A.	,, 4
St. George's Day	,, 23	*St. Andrew's Day*	Nov. 30
Low Sunday	,, 30	Birth of Queen Alexandra (1844)	Dec. 1
Accession of King George V.	May 6	*First Sunday in Advent*	,, 3
		CHRISTMAS DAY—Monday	,, 25

Beginnings of the Seasons, 1916.

	d.	h.		d.	h.
Spring, Sun enters Aries (0° long.)	March 20	11 A	Autumn, Sun enters Libra (180° long.)	Sept. 23	9 M
Summer ,, ,, Cancer (90° long.)	June 21	6 A	Winter, ,, Capricornus (270° ,,)	Dec. 22	4 M

The EQUINOXES occur when Spring and Autumn begin, and the SOLSTICES at Summer and Winter.

English Law Sittings, 1916.

Mean Longitude of Moon's Ascending Node, January 1, 309° 43′ ♒.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks at 6*h.* 2*m. morn.*, and Twilight ends at 6*h.* 4*m. aft.*, the length of the Day being 7*h.* 50*m.*

Jan. 2. The Earth at least distance from the Sun, 1*h. aft.*

Jan. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 10·7*s.*

Jan. 6. Mercury in conjunction with the Moon, 2*h.* 13*m. morn.* ☿ 1° 6′ S.

Jan. 6. Venus and Uranus in conjunction with the Moon, 8*h.* 33*m. aft.* ♀ 1° 7′ S.

Jan. 7. Uranus in conjunction with the Moon, 6*h.* 18*m. morn.* ♅ 1° 17′ S.

Jan. 7. Venus in conjunction with the Moon, 7*h.* 13*m. morn.* ♀ 2° 27′ S.

Jan. 10. Jupiter in conjunction with the Moon, 5*h.* 33*m. morn.* ♃ 5° 34′ S.

Jan. 13. Occultation of 26 Arietis; magnitude 6·2. See p. 81.

Jan. 16. Occultation of χ Tauri; magnitude 5·3. See p. 81.

Jan. 18. Saturn in conjunction with the Moon, 9*h.* 39*m. aft.* ♄ 2° 49′ S.

Jan. 19. Occultation of ω Geminorum; magnitude 5·2. See p. 81.

Jan. 19. Occultation of 192 B Geminorum; magnitude 6·3. See p. 81.

Jan. 20. Eclipse of the Moon, 8*h.* 5*m. morn.* See p. 78.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 9·5*s.*

Jan. 20. Mercury at greatest elongation (18° 40′) East, 6*h. aft.*

Jan. 22. Mars in conjunction with the Moon, 7*h.* 28*m. aft.* ♂ 6° 35′ N.

Jan. 23. Occultation of 43 Leonis; magnitude 6·3. See p. 81.

Jan. 25–26. Occultation of *q* Virginis; magnitude 5·3. See p. 81.

Jan. 26. Mercury stationary, 10*h. aft.*

In this month the Mornings increase 25*m.*, and the Afternoons 45*m.*

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, setting at first S.W., later S.W. by W., and towards the end of the month W.S.W.

♀ VENUS is an evening star, setting S.W. by W., and towards the end of the month W. by S.

♂ MARS rises in the evening, towards the end of the month E.N.E., in Leo, not far from Regulus.

♃ JUPITER is an evening star at the end of the month, setting a little S. of W.

♄ SATURN souths about midnight early in the month.

In the early part of the month the constellations Camelopardalis, Lynx, Gemini, Monoceros, and Canis Major are on the meridian about midnight. In Gemini there is a fine compressed cluster of small stars, crowded together, nearly midway between γ and ζ Geminorum. It can be best observed on the nights immediately before and after the 4th. There is a very fine cluster in Canis Major, in R.A. 6*h.* 43*m.* and Decl. 20° 39′ S., 4° South of Sirius. With a very small astronomical telescope the individual stars can be easily distinguished; and with a low-power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes. Neptune can be well observed in this month. See p. 82.

MONTHLY NOTES

Feb. 1. Copies of Registers of Voters to be sent to Secretary of State within three weeks.
12. Scottish general salmon-fishing begins.
15. Old Candlemas.
19. Notice of Election of Borough Auditors to be published. Nominations must be delivered by the 20th.
22. Washington's Birthday, General Holiday, U.S.A.
29. Hare-hunting ends.

RAIN FELL IN FEBRUARY, 1915,
on 16 days; total fall, 3·18 inches; *above* the average, 1841–90, by 1·70 inches.

The Meteorological Observations throughout the Almanack are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest readings of the *Thermometer* with the average for 65 years; the means of *Barometer* at a height of 150 feet above the mean level of the sea; the daily *Rainfall*, the daily *Sunshine*, and the daily general direction and maximum force of the *Wind*.

Mean Longitude of Moon's Ascending Node, February 1, 308° 5′ ♌.

Eclipses, Occultations, and other Celestial Phenomena.

February 1. Day breaks at 5*h.* 52*m. morn.*, and Twilight ends at 6*h.* 46*m. aft.*, the length of the Day being 9*h.* 3*m.*

Feb. 1. Occultation of σ Sagittarii; magnitude 2·1. See p. 81.

Feb. 3. Eclipse of the Sun, 4*h. aft.* See p. 78.

Feb. 3. Uranus in conjunction with the Moon, 8*h.* 9*m. aft.* ♅ 1° 27′ S.

Feb. 3. Mercury in conjunction with the Moon, 8*h.* 24*m. aft.* ☿ 2° 47′ N.

Feb. 5. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 7·78*s.*

Feb. 6. Venus in conjunction with the Moon, 11*h.* 6*m. morn.* ♀ 5° 16′ S.

Feb. 6. Occultation of 22 Piscium; magnitude 5·8. See p. 81.

Feb. 7. Jupiter in conjunction with the Moon, 0*h.* 55*m. morn.* ♃ 5° 52′ S.

Feb. 10. Mars in opposition to the Sun, 2*h.* 0*m. morn.*

Feb. 14. Occultation of 139 Tauri; magnitude 4·7. See p. 81.

Feb. 14. Venus and Jupiter in conjunction, 2*h.* 53*m. morn.* ♀ 0° 27′ N.

Feb. 15. Saturn in conjunction with the Moon, 1*h.* 20*m. morn.* ♄ 2° 54′ S.

Feb. 14–15. Occultation of ε Geminorum; magnitude 3·2. See p. 81.

Feb. 15. Occultation of B.D. + 23° 1744; magnitude 6·4. See p. 81.

Feb. 17. Occultation of 81 Cancri; magnitude 6·4. See p. 81.

Feb. 18. Mars in conjunction with the Moon, 6*h.* 15*m. morn.* ♂ 5° 44′ N.

Feb. 19. Occultation of 35 Sextantis; magnitude 6·1. See p. 81.

Feb. 20. Mean time of Sun's semi-diameter passing the meridian, 1*m.* 6·18*s.*

Feb. 21. Occultation of 431 B Leonis; magnitude 6·2. See p. 81.

Feb. 22. Occultation of *q* Virginis; magnitude 5·3. See p. 81.

Feb. 27. Occultation of 95 G Ophiuchi; magnitude 6·1. See p. 81.

Feb. 29. Occultation of χ Sagittarii; magnitude 4·9. See p. 81.

In this month the Mornings increase 52*m.*, and the Afternoons 51*m.*

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

Rising, Southing, and Setting of the Principal Planets at intervals of Seven Days.

Morning and Evening Stars.

☿ Mercury is an evening star at the beginning of the month, setting W.S.W. ; a morning star in the latter half, rising E.S.E.

♀ Venus is an evening star, setting at first W. by S., and later nearly due W.

♂ Mars rises in the afternoon N.E. by E.

♃ Jupiter is an evening star, setting nearly due W., in the constellation Pisces.

♄ Saturn souths about 9 P.M. ; altitude about 61°.

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars, preceding α Cancri about 8*m*. in R.A. and nearly same declination, consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Præsepe," can be best observed in this month on the nights immediately preceding and following the 3rd. It does not consist of a very great number of stars, but the components are, as compared with those of other clusters, of considerable magnitude. It is situated in R.A. 8*h*. 34*m*. and Decl. 20° 20′ N., about 2° to the west of a line joining the stars δ and γ Cancri.

The triple star ζ in Cancer may be examined in this month : it will be found in R.A. 8*h*. 7*m*. 23*s*. and Decl. 17° 55′ N. Neptune can be observed in this month. See p. 82.

Mean Longitude of Moon's Ascending Node, March 1, 306° 32′ ♈.

Eclipses, Occultations, and other Celestial Phenomena.

March 1. Day breaks at *4h. 55m. morn.*, and Twilight ends at *7h. 31m. aft.*, the length of the Day being *10h. 50m.*

Mar. 2. Mercury at greatest elongation (27° 6′) W., *0h. morn.*

Mar. 2. Mercury in conjunction with the Moon, *3h. 18m. morn.* ☿ 0° 58′ S.

Mar. 5. Mean time of Sun's semidiameter passing the meridian, *1m. 4·9s.*

Mar. 5. Jupiter in conjunction with the Moon, *10h. 17m. aft.* ♃ 6° 5′ S.

Mar. 7. Venus in conjunction with the Moon, *1h. 16m. aft.* ♀ 4° 51′ S.

Mar. 9. Occultations of 16 Tauri, 17 Tauri, 20 Tauri, and *q* Tauri; magnitudes, respectively, 5·4, 3·8, 4·1, and 4·3. See p. 81.

Mar. 9–10. Occultation of *η* Tauri; magnitude 3·0. See p. 81.

Mar. 10. Occultation of 28 Tauri; magnitude 5·2. See p. 81.

Mar. 10. Occultation of 27 Tauri; magnitude 3·7. See p. 81.

Mar. 12. Occultation of 125 Tauri; magnitude 5·1. See p. 81.

Mar. 13. Saturn in conjunction with the Moon, *8h. 3m. morn.* ♄ 2° 45′ S.

Mar. 13. Occultation of 48 Geminorum; magnitude 5·8. See p. 81.

Mar. 14. Occultation of 58 Geminorum; magnitude 6·0. See p. 81.

Mar. 15. Occultation of Neptune; magnitude 7·7. See p. 81.

Mar. 16. Mars in conjunction with the Moon, *0h. 51m. morn.* ♂ 4° 15′ N.

Mar. 20. Occultation of 370 B Virginis; magnitude 6·0. See p. 81.

Mar. 20. Mean time of Sun's semidiameter passing the meridian, *1m. 4·3s.*

Mar. 21. Sun enters the sign Aries. Spring commences, *10h. 47m. aft.*

Mar. 24. Occultations of *b* Scorpii and 4 Scorpii; magnitudes 4·7 and 5·7 respectively. See p. 81.

Mar. 29. Occultation of 21 Capricorni; magnitude 6·5. See p. 81.

In this month the Mornings increase *1h. 9m.*, and the Afternoons *51m.*

Morning and Evening Stars.

☿ Mercury is a morning star, rising at first E.S.E., and later E. by S.

♀ Venus is an evening star, setting W.N.W., and later N.W. by W.

♂ Mars in Cancer, southing between 9*h.* and 10*h.* P.M.; altitude about 59°.

♃ Jupiter is an evening star, setting nearly due W.

♄ Saturn souths in the early evening, a little to the N.E. of ζ Tauri.

At midnight, in the beginning of March, the constellations Ursa Major, Leo, Crater, and Hydra are on the meridian. In Ursa Major is a large planetary Nebula, appearing as a mass of attenuated light, from 3½′ to 4′ in diameter; it lies 2½° S.E. of 8 Ursa Majoris.

Virgo comes to the meridian about midnight towards the end of this month. Between Virgo and Coma Berenices is a large Nebula, one of the class known as "Spiral Nebulæ," situated in R.A. 12*h.* 14*m.* and Decl. 15° 0′ N. With a large telescope of 8 inches aperture it appears to be resolvable in the centre into two bright star-like points. This constellation is thickly strewed with nebulæ, which may be best observed on the evenings immediately before and after the 3rd of the month. Neptune may be observed in the early part of the month. See p. 82.

RAIN FELL IN APRIL, 1915,

on 14 days; total fall, 1·45 inches; *below* the average, 1841-90, by 0·21 inch.

MONTHLY NOTES.

April 1. Refreshment House Licences to be renewed. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.

3. Quarter Sessions to be held this week unless otherwise fixed.

5. Dividends on Consols, &c., due. Financial year, 1915-1916, for Imperial purposes ends to-day.

8. Fire Insurances must be paid.

15. Parish Councils to hold their annual meeting on or within seven days of this date.

Mean Longitude of Moon's Ascending Node, April 1, 304° 54′ ♈.

Eclipses, Occultations, and other Celestial Phenomena.

April 1. Day breaks at 3*h.* 37*m. morn.*, and Twilight ends at 8*h.* 31*m. aft.*, the length of the Day being 12*h.* 54*m.*

Apr. 1. Mercury in conjunction with the Moon, 8*h.* 45*m. aft.* ☿ 6° 52′ S.

Apr. 2. Jupiter in conjunction with the Moon, 7*h.* 23*m. aft.* ♃ 6° 17′ S.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·4*s.*

Apr. 6. Venus in conjunction with the Moon, 0*h.* 8*m. aft.* ♀ 2° 0′ S.

Apr. 8. Occultation of 139 Tauri; magnitude 4·7. See p. 81.

Apr. 9. Mercury and Jupiter in conjunction, 8*h.* 51*m. morn.* ☿ 0° 24′ S.

Apr. 9. Saturn in conjunction with the Moon, 5*h.* 46*m. aft.* ♄ 2° 24′ S.

Apr. 12. Mars in conjunction with the Moon, 2*h.* 1*m. aft.* ♂ 3° 37′ N.

Apr. 14. Mercury in superior conjunction with the Sun, 9*h. aft.*

Apr. 16. Occultation of *q* Virginis; magnitude 5·3. See p. 81.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 5·1*s.*

Apr. 23. Mercury at least distance from the Sun, 10*h. morn.*

Apr. 24. Venus at greatest elongation (45° 39′) East, 11*h. morn.*

Apr. 26. Uranus in conjunction with the Moon, 1*h.* 43*m. morn.* ♅ 2° 14′ S.

Apr. 30. Jupiter in conjunction with the Moon, 2*h.* 54*m. aft.* ♃ 6° 29′ S.

In this month the Mornings increase 1*h.* 2*m.*, and the Afternoons 47*m.*

28	1 28 42·9	88 51 31

Morning and Evening Stars.

☽ At the end of the month Mercury is an evening star, setting at first W. by N., and later W.N.W.

♀ Venus is an evening star, setting N.W.

♂ Mars souths in the evening; altitude about 57°.

♃ Jupiter is a morning star at the end of the month, rising E. by N.

♄ Saturn souths in the early evening; altitude about 61°.

At the latter part of April the constellations Draco, Bootes, and Libra will be on the meridian about midnight. An irresolvable double Nebula in Canes Venatici, about 4° S.W. of η Ursæ Majoris, can be observed in this month. The Southern Nebula is surrounded by a faint ring of nebulous light, and was called by Herschel, in his Catalogue, "the Halo Nebula." In R.A. 15*h*. 14*m*., Decl. 2° 28′ N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel was able to distinguish over 200 stars in this group in the field of his 40-ft. reflector, but found the middle portion so condensed that the individual stars could not be separated. The stars range from the 12th to 15th mag. The evenings about the 2nd are the best for observing these objects.

Fasts and Festivals.

Mean Longitude of Moon's Ascending Node, May 1, 303° 19′ ♒.

Eclipses, Occultations, and other Celestial Phenomena.

May 1. Day breaks at 2*h.* 3*m. morn.*, and Twilight ends at 9*h.* 51*m. aft.*, the length of the Day being 14*h.* 46*m.*

May 3. Mercury in conjunction with the Moon, 9*h.* 55*m. aft.* ☿ 2° 6′ S.

May 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 6·1*s.*

May 6. Venus in conjunction with the Moon, 5*h.* 33*m. morn.* ♀ 1° 1′ N.

May 6. Occultation of 52 B Geminorum; magnitude 6·5. See p. 81.

May 7. Saturn in conjunction with the Moon, 5*h.* 31*m. morn.* ♄ 1° 56′ S.

May 8-9. Occultation of d^1 Caneri; magnitude 5·9. See p. 81.

May 10. Mars in conjunction with the Moon, 4*h.* 41*m. aft.* ♂ 3° 54′ N.

May 12. Mercury at greatest elongation (21° 43′) East, 4*h. aft.*

May 12-13. Occultation of 388 B Leonis; magnitude 6·3. See p. 81.

May 17. Occultation of π Scorpii; magnitude 3·0. See p. 81.

May 18. Occultation of 48 B Scorpii; magnitude 4·9. See p. 81.

May 18. Occultation of 65 B Scorpii; magnitude 5·5. See p. 81.

May 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·4*s.*

May 21. Occultation of 49 Sagittarii; magnitude 5·5. See p. 81.

May 24. Occultation of 150 B Aquarii; magnitude 6·0. See p. 81.

May 26. Occultation of 22 Piscium; magnitude 5·8. See p. 81.

May 27. Venus at greatest brilliancy, 1*h. aft.*

May 28. Jupiter in conjunction with the Moon, 8*h.* 20*m. morn.* ♃ 6° 41′ S.

In this month the Mornings increase 44*m.*, and the Afternoons 44*m.*

Morning and Evening Stars.

☿ Mercury is an evening star, setting N.W.

♀ Venus is an evening star, setting N.W.

♂ Mars souths in the early evening; altitude about 53°.

♃ Jupiter is a morning star, rising E. by N.

♄ Saturn is an evening star towards the end of the month, setting N.W. by W.

Towards the end of May we shall find the constellations Draco, Hercules, Ophiuchus, and Scorpio on the meridian about midnight.

Hercules contains a very splendid cluster of stars situated in R.A. 16*h.* 38*m.* and Decl. 36° 41′ N. This, like most of the star-clusters, is condensed in the centre, and may be easily resolved with moderate telescopic aid; and a few days about the 1st and 31st, when the Moon is absent, it may, if the opportunity is taken of a very clear night, be seen with the naked eye plainly between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

Mean Longitude of Moon's Ascending Node, June 1, 301° 40′ 22″.

Eclipses, Occultations, and other Celestial Phenomena.

June 1. There is no real night in this month, but either daylight or twilight, the length of the Day being 16*h.* 15*m.*

June 1. Mercury in conjunction with the Moon, 11*h.* 22*m. morn.* ☿ 4° 57′ S.

June 3. Saturn in conjunction with the Moon, 6*h.* 18*m. aft.* ♄ 1° 29′ S.

June 4. Venus in conjunction with the Moon, 1*h.* 38*m. morn.* ♀ 1° 16′ N.

June 4. Occultation of 217 B Geminorum; magnitude 6·3. See p. 81.

June 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·4*s.*

June 8. Mars in conjunction with the Moon, 2*h.* 32*m. morn.* ♂ 4° 38′ N.

June 11. Venus stationary, 4*h. aft.*

June 16. Occultation of 4 G Sagittarii; magnitude 6·2. See p. 81.

June 17. Occultations of 127 G Sagittarii, magnitude 6·4; 172 B Sagittarii, magnitude 5·8. See p. 81.

June 18. Mercury stationary, 1*h. morn.*

June 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·7*s.*

June 21. Sun enters the sign Cancer, 6*h.* 24*m. aft.*

June 22. Occultation of λ Piscium; magnitude 4·6. See p. 81.

June 22. Venus and Saturn in conjunction, 0*h.* 17*m. aft.* ♀ 0° 56′ S.

June 24. Jupiter in conjunction with the Moon, 11*h.* 41*m. aft.* ♃ 6° 52′ S.

June 26 27. Occultations of ε Arietis, magnitude 4·6; 23 Tauri, magnitude 4·3; 27 Tauri, magnitude 3·7; 28 Tauri, magnitude 5·2 See p. 81.

June 28. Mercury in conjunction with the Moon, 1*h.* 11*m. aft.* ☿ 7° 7′ S.

June 30. Mercury at greatest elongation (21° 5c′) W., 6*h. morn.*

June 30. Venus in conjunction with the Moon 8*h.* [illegible] *aft.* ♀ 4° 30′ S.

In this month the Mornings increase 2*m.*, and the Afternoons 14 *m.*

Morning and Evening Stars.

☿ Mercury near the Sun early in the month; a morning star towards the end, rising N.E. by E.

♀ Venus is an evening star, setting N.W. by W.

♂ Mars souths in the early afternoon: near Regulus at beginning of the month.

♃ Jupiter is a morning star, rising E. by N.

♄ Saturn is an evening star, setting N.W. by W.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Sagittarius there is a notable and very extensive Nebula, somewhat like a horseshoe in shape. It will be found in R.A. 18*h.* 15*m.*, and Decl. 16° 15′ S. The spectroscope shows this Nebula to consist of a mass of incandescent gas. Professor Holden says that one arm of the Nebula has changed its position since Herschel's time. In good weather it can be well seen with a small telescope.

In Sagittarius, a little West and North of λ, is a globular cluster of very minute stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing it except when southing.

Phases of the Moon.

☽ First Quarter	8d.	11h.	55m.	Morning.
○ Full Moon	15	4	40	Morning.
☾ Last Quarter	21	11	33	Afternoon.
● New Moon	30	2	15	Morning.

Apogee 1d. 4h. M. 252,600.
Perigee 15d. 0h. M. 222,000.
Apogee 28d. 7h. M. 252,500.

Rain fell in July, 1915,

on 15 days; total fall, 3·09 inches; *above* the average, 1841-90, by 0·52 inch.

Monthly Notes.

July 1. Special Sessions for Licences to deal in Game to be held this month.

5. Dividends due.

8. Old Quarter Day.

9. Fire Insurances to be paid.

20. Rates and Taxes due January 5th must be paid on or before this day by Voters to prevent disqualification. Ownership voters to send in their claims to vote.

31. Gun and Game Licences expire. Borough and County Lists of Voters to be affixed to church doors and at Post Offices for two Sundays.

THE SUN.

Mean Longitude of Moon's Ascending Node, July 1, 300° 5′ ♈.

Eclipses, Occultations, and other Celestial Phenomena.

July 1. In this month there is no real night till after the 20th, the length of the Day being 16*h.* 30*m.*

July 1. Saturn in conjunction with the Moon, 7*h.* 28*m. morn.* ♄ 1° 6′ S.

July 3. Earth at greatest distance from the Sun, 6*h. morn.*

July 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·4*s.*

July 6. Mars in conjunction with the Moon, 3*h.* 41*m. aft.* ♂ 5° 22′ N.

July 11 12. Occultation of 65 B Scorpii; magnitude 5·5. See p. 81.

July 14. Occultation of 49 Sagittarii; magnitude 5·5. See p. 81.

July 16. Occultation of υ Capricorni; magnitude 5·3. See p. 81.

July 16. Uranus in conjunction with the Moon, 11*h.* 54*m. aft.* ♅ 2° 44′ S.

July 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·4*s.*

July 21. Mercury and Saturn in conjunction, 8*h.* 36*m. aft.* ☿ 1 8′ N.

July 22. Jupiter in conjunction with the Moon, 0*h.* 58*m. aft.* ♃ 6° 57′ S.

July 25. Venus stationary, 11*h. morn.*

July 27. Venus in conjunction with the Moon, 6*h.* 8*m. morn.* ♀ 8° 21′ S.

July 28. Saturn in conjunction with the Moon, 8*h.* 48*m. aft.* ♄ 0° 44′ S.

July 30. Eclipse of the Sun, invisible at Greenwich. See p. 78.

July 30. Mercury in conjunction with the Moon, 8*h.* 41*m. morn.* ☿ 2° 50′ N.

In this month the Mornings decrease 34*m.*, and the Afternoons 30*m.*

Time of High Water at the undermentioned Places—

28	1	30	9·6	88	51	24

Morning and Evening Stars.

☿ Mercury is a morning star, rising N.E. by E.
♀ Venus is a morning star in the latter half of the month, rising N.E. by E.
♂ Mars is an evening star, setting a little N. of W.
♃ Jupiter in Aries; rises between 11*h.* and 12*h.* P.M., E.N.E.
♄ Saturn too near the Sun for observation.

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ, is the best example of the Annular Nebulæ; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it well: it is in R.A. 18*h.* 50*m.* and Decl. 32° 54′ N. It exhibits a spectrum as if composed of an incandescent gas. There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyræ and β Cygni. The best nights for the observation of these objects are those just before and after the 29th.

Uranus may be well observed in this month. See p. 82.

Fasts and Festivals.
Remarkable Days Events.
SUN'S LONGITUDE 150° ♍ 23′ 0h. A.

Mean longitude of Moon's Ascending Node, August 1, 298° 27′ ☋.

Eclipses, Occultations, and other Celestial Phenomena.

August 1. Day breaks at 1*h.* 31*m. morn.*, and Twilight ends at 10*h.* 41*m. aft.*, the length of the Day being 15*h.* 22*m.*

Aug. 4. Mars in conjunction with the Moon, 6*h.* 2*m. morn.* ♂ 5° 42′ N.

Aug. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 6·1*s.*

Aug. 5. Occultation of 87 Virginis; magnitude 5·8. See p. 81.

Aug. 9. Venus at greatest brilliancy, 4*h. aft.*

Aug. 9. Occultation of 4 G Sagittarii; magnitude 6·2. See p. 81.

Aug. 10-11. Occultation of 127 G Sagittarii; magnitude 6·4. See p. 81.

Aug. 11. Occultation of 172 B Sagittarii; magnitude 5·8. See p. 81.

Aug. 13. Uranus in conjunction with the Moon, 8*h.* 53*m. morn.* ♅ 2° 37′ S.

Aug. 15. Occultation of λ Piscium; magnitude 4·6. See p. 81.

Aug. 17. Occultation of 136 B Piscium; magnitude 6·5. See p. 81.

Aug. 19. Jupiter in conjunction with the Moon, 11*h.* 51*m. aft.* ♃ 6° 58′ S.

Aug. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·9*s.*

Aug. 24. Venus in conjunction with the Moon, 3*h.* 13*m. aft.* ♀ 5° 23′ S.

Aug. 25. Occultation of Saturn; magnitude 0·4. See p. 81.

Aug. 25. Saturn in conjunction with the Moon, 10*h.* 11*m. morn.* ♄ 0° 21′ S.

Aug. 25. Saturn stationary, 7*h. aft.*

Aug. 31. Mercury in conjunction with the Moon, 1*h.* 7*m. morn.* ☿ 3° 54′ N.

In this month the Mornings decrease 47*m.*, and the Afternoons 59*m.*

10	1	30	23·5	88	51	26
19	1	30	32·0	88	51	28
28	1	30	39·9	88	51	31

Morning and Evening Stars.

☿ Mercury is an evening star, setting N.W. by W., and at end of the month nearly due W.

♀ Venus is a morning star, rising N.E. by E.

♂ Mars is an evening star, setting W. by S.

♃ Jupiter rises between 9*h.* and 10*h.* in the evening, E.N.E.

♄ Saturn is a morning star, rising N.E. by E.

At the beginning of August, Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula, 3½° due north of γ Sagittæ, is the "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed some trace of resolvability shown. It is situated in R.A. 19*h.* 55*m* and Decl. 22° 26′ N., and gives a spectrum of bright lines.

There is a little bright globular cluster 4° due south of ε Delphini, consisting of a mass of very small stars; ε Delphini is situated in R.A. 20*h.* 29*m.* 12*s.* and Decl. 11° 1′ N.—a tiny star, 9th mag., precedes it. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 28th of this month. Uranus may be observed in this month. See p. 82.

Eclipses, Occultations, and other Celestial Phenomena.

September 1. Day breaks at 3*h.* 7*m. morn.*, and Twilight ends at 8*h.* 53*m. aft.*, the length of the Day being 13*h.* 32*m.*

Sept. 1. Mars in conjunction with the Moon, 8*h.* 44*m. aft.* ♂ 5° 25′ N.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 4·0*s.*

Sept. 9. Occultation of *v* Capricorni; magnitude 5·3. See p. 81.

Sept. 9. Mercury at greatest elongation (26° 54′) East, 5*h. aft.*

Sept. 9. Uranus in conjunction with the Moon, 5*h.* 5*m. aft.* ♅ 2° 33′ S.

Sept. 10-11. Occultation of 186 B Aquarii; magnitude 6·1. See p. 81.

Sept. 12. Venus at greatest elongation (46° 1′) West, 2*h. aft.*

Sept. 15. Occultation of 47 B Arietis; magnitude 6·5. See p. 81.

Sept. 15. Jupiter in conjunction with the Moon, 7*h.* 45*m. morn.* ♃ 6° 55′ S.

Sept. 16. Occultation of ε Arietis; magnitude 4·6. See p. 81.

Sept. 17. Occultations of 27 Tauri, magnitude 3·7; 28 Tauri, magnitude 5·2. See p. 81.

Sept. 20. Occultation of 52 B Geminorum; magnitude 6·5. See p. 81.

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 3·9*s.*

Sept. 21. Saturn in conjunction with the Moon, 11*h.* 15*m. aft.* ♄ 0° 6′ N.

Sept. 22. Mercury stationary, 6*h. aft.*

Sept. 23. Venus in conjunction with the Moon, 7*h.* 41*m. morn.* ♀ 0° 12′ N.

Sept. 23. Sun enters the sign Libra, 9*h.* 16*m. morn.*

Sept. 28. Mercury in conjunction with the Moon, 0*h.* 11*m. aft.* ☿ 1° 30′ N.

Sept. 30. Mars in conjunction with the Moon 0*h.* 11*m. aft.* ♂ 4° 30′ N.

In this month the Mornings decrease 46*m.*, and the Afternoons 1*h.* 6*m.*

Morning and Evening Stars.

☿ Mercury is an evening star, setting W. by S. at first, and later W.S.W.

♀ Venus is a morning star, rising E.N.E.

♂ Mars is an evening star, setting W.S.W.

♃ Jupiter rises in the evening between 7*h*. and 8*h*., E.N.E.

♄ Saturn in Cancer; sets in the early afternoon, N.W. by W.

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus is a fine globular cluster of very small stars, 3½′ in diameter, 4½ north-west of ε Pegasi, much condensed towards the centre, where the stars cannot be resolved; there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true globular form, consisting of very small stars very much compressed. It is situated in R.A. 21*h*. 28*m*. and Decl. 1° 20′ S.

In the early evening at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21*h*. 35*m*. and Decl. 23° 40′ S., can be observed. The best evenings for observation are those immediately before and after the 26th.

Uranus may be observed in this month. See p. 82.

Mean Longitude of Moon's Ascending Node, October 1. 295° 13′ ♈.

Eclipses, Occultations, and other Celestial Phenomena.

October 1. Day breaks at 4*h.* 8*m. morn.*, and Twilight ends at 7*h.* 32*m. aft.*, the length of the Day being 11*h.* 36*m.*

Oct. 1. Occultation of 48 Scorpii; magnitude 4.9. See p.

Oct. 4. Occultation of 208 B Sagittarii: magnitude 6·1. See p. 81

Oct. 5. Mean time of Su semidiameter passing the me dian, 1*m.* 4·3*s.*

Oct. 6. Uranus in conjuncti with the Moon, 11*h.* 40*m. aft.* 2° 39′ S.

Oct. 9. Occultation of 22 Piscium magnitude 5·8. See p. 81.

Oct. 11. Occultation of 101 P cium; magnitude 6·2. See p. 8

Oct. 12. Jupiter in conjuncti with the Moon, 0*h.* 21*m. aft.* 6° 54′ S.

Oct. 13. Mercury stationa 7*h. aft.*

Oct. 14. Occultation of 66 Ar tis; magnitude 6·1. See p. 81.

Oct. 19. Occultation of 217 Geminorum; magnitude 6·3. S p. 81.

Oct. 19. Saturn in conjuncti with the Moon, 11*h.* 5*m. morn.* 0° 34′ N.

Oct. 20. Mean time of Su semidiameter passing the me dian, 1*m.* 5·4*s.*

Oct. 21. Mercury at great elongation (18° 17′) West, 0*h. mo*

Oct. 23. Venus in conjunct with the Moon, 1*h.* 47*m. aft.* 5° 35′ N.

Oct. 25. Mercury in conjunct with the Moon, 5*h.* 24*m. aft.* 7° 41′ N.

Oct 29. Mars in conjunct with the Moon, 4*h.* 46*m. mo* ♂ 3° 3′ N.

In this month the Morni decrease 51*m.*, and the Afterno 1*h.* 4*m.*

Morning and Evening Stars.

☿ Mercury is a morning star, rising nearly due E.
♀ Venus is a morning star, rising at first E.N.E., and later E. by N.
♂ Mars is an evening star, setting S.W. by W.
♃ Jupiter souths about midnight; altitude about 49°.
♄ Saturn nearly in the same position as in last month.

On the 1st of October, Cassiopeia, Andromeda, Pisces, and Cetus are on the meridian at midnight; while Cancer and Orion are rising, and Hercules and Capricornus setting.

In Andromeda, near to the 4th mag. star ν, is a large and irresolvable Nebula in the form of an elongated ellipse. It is situated in R.A. $0h.\ 37m.$ and Decl. 40° 43′ N. In Sept., 1885, a decided stellar nucleus was observed in R.A. $0h.\ 36m.\ 31s.$, Decl. 40° 38′ N., probably unconnected with the Nebula. Very many minute stars can be seen within the Nebula.

A fine double cluster of stars, situated midway on a line joining α Persei and γ Cassiopeiæ, may be observed in this month. The northern cluster is a magnificent collection of stars, 30′ in diameter, ranging in magnitude from the 6th to 14th. The smaller southern cluster, 15′ in diameter, is less rich in stars, and much condensed toward the centre. On fine nights about the 26th these objects afford one of the most beautiful subjects for observation.

Mean Longitude of Moon's Ascending Node, November 1, 293° 22′ ♈.

Eclipses, Occultations, and other Celestial Phenomena.

November 1. Day breaks at 5*h.* 1*m. morn.*, and Twilight ends at 6*h.* 27*m. aft.*, the length of the Day being 9*h.* 38*m.*

Nov. 2. Occultation of 94 B Capricorni; magnitude 5·7. See p. 81.

Nov. 3. Uranus in conjunction with the Moon, 5*h.* 14*m. morn.* ♅ 2° 53′ S.

Nov. 3. Occultation of λ Capricorni; magnitude 5·5. See p. 81.

Nov. 3. Occultation of 96 B Aquarii; magnitude 6·5. See p. 81.

Nov. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·1*s.*

Nov. 8. Jupiter in conjunction with the Moon, 2*h.* 31*m. aft.*, ☽ 6 56′ S.

Nov. 9. Occultation of 1 Arietis; magnitude 4·6. See p. 81.

Nov. 10. Occultation of 104 B Tauri; magnitude 5·5. See p. 81.

Nov. 11. Occultation of 36 Tauri; magnitude 5·6. See p. 81.

Nov. 12. Saturn stationary, 10*h. morn.*

Nov. 14. Occultation of 87 B Geminorum; magnitude 5·8. See p. 81.

Nov. 14. Occultation of 63 Geminorum; magnitude 5·3. See p. 81.

Nov. 15. Occultation of 79 Geminorum; magnitude 6·3. See p. 81.

Nov. 15. Saturn in conjunction with the Moon, 8*h.* 22*m. aft.* ♄ 0° 56′ N.

Nov. 20. Occultation of 388 B Leonis; magnitude 6·3. See p. 81.

Nov. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·9*s.*

Nov. 22. Venus in conjunction with the Moon, 6*h.* 32*m. aft.* ♀ 7 33′ N.

Nov. 25. Mercury in conjunction with the Moon, 11*h.* 17*m. morn.* ☿ 3° 6′ N.

Nov. 26. Mars in conjunction with the Moon, 11*h.* 57*m. aft.* ♂ 1° 12′ N.

Nov. 30. Uranus in conjunction with the Moon, 1*h.* 54*m. morn.* ♅ 3° 10′ S.

In this month the Mornings decrease 49*m.*, and the Afternoons 40*m.*

Morning and Evening Stars.

☿ Mercury is a morning star in the first half of the month, rising at first E. by S., and later E.S.E., at end of month S.E. by E.

♀ Venus is a morning star, rising nearly due E., and later E. by S.

♂ Mars is an evening star, setting S.E.

♃ Jupiter very near to o Piscium on the 24th.

♄ Saturn rises in the late evening, N.E. by E.

On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula $2\frac{1}{2}^{\circ}$ to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches in focal length. It is a very elongated Nebula, 15′ long by 3′ broad, with a cleft, dark in the middle and suggests the idea of a vast flat ring seen very obliquely. It is in R.A. *2h. 16m.* and Decl. 41° 49′ N. The best evenings for observing it are those about the 24th.

Mean Longitude of Moon's Ascending Node, December 1, 291° 46′ ♈.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5*h.* 41*m. morn.*, and Twilight ends at 5*h.* 57*m. aft.*, the length of the Day being 8*h.* 8*m.*

Dec. 1. Occultation of 170 B Aquarii; magnitude 6·0. See p. 81.

Dec. 2. Occultation of 22 B Piscium; magnitude 6·4. See p. 81.

Dec. 3. Occultation of 9 Piscium; magnitude 6·4. See p. 81.

Dec. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 10·4*s.*

Dec. 5. Jupiter in conjunction with the Moon, 4*h.* 36*m. aft.* ♈ 7° 0′ S.

Dec. 6. Occultation of μ Arietis: magnitude 5·7. See p. 81.

Dec. 7. Occultation of ϵ Arietis; magnitude 4·6. See p. 81.

Dec. 8. Occultation of 62 Tauri; magnitude 6·1. See p. 81.

Dec. 9. Occultation of 118 Tauri; magnitude 5·4. See p. 81.

Dec. 10. Occultation of 132 Tauri; magnitude 5·0. See p. 81.

Dec. 11–12. Occultation of δ Geminorum; magnitude 3·5. See p. 81.

Dec. 12. Occultations of 149 B Geminorum, magnitude 6·4; and 63 Geminorum, magnitude 5·3. See p. 81.

Dec. 13. Saturn in conjunction with the Moon, 2*h.* 13*m. morn.* ♄ 1° 4′ N.

Dec. 13. Occultation of 54 Cancri; magnitude 6·3. See p. 81.

Dec. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 11·0*s.*

Dec. 22. Sun enters the sign Capricornus. Winter commences, 3*h.* 59*m. morn.*

Dec. 22. Occultation of 153 B Librae; magnitude 6·3. See p. 81.

Dec. 22. Mercury and Mars in conjunction, 11*h.* 2*m. morn.* ☿ ♂ 1° 10′ S.

Dec. 22. Venus in conjunction with the Moon, 5*h.* 46*m. aft.* ♀ 5° 34′ N.

Dec. 24. Eclipse of the Sun, invisible at Greenwich. See p. 78.

Dec. 25. Mars in conjunction with the Moon, 10*h.* 4*m. aft.* ♂ 0° 57′ S.

Dec. 26. Mercury in conjunction with the Moon 2*h.* 35*m. morn.* ☿ ♂ 2° 13′ S.

Dec. 31. Occultations of 136 B Piscium; magnitude 6·5. See p. 81.

In this month the Mornings decrease 23*m.*, and the Afternoons increase 5*m.*

Morning and Evening Stars.

☿ Mercury is an evening star, setting S.W.

♀ Venus is a morning star, rising E.S.E.

♂ Mars is an evening star, setting S.W.

♃ Jupiter souths in the evening; altitude about 47°.

♄ Saturn rises in the evening, N.E. by E.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine Nebula of a pearly white colour 1½° North-west of ζ Tauri. Lord Rosse compared its appearance to that of a crab, and it is generally known as the "Crab Nebula."

About the middle of December Orion souths at midnight, and can be best observed in this month.

This magnificent constellation contains the grandest of all the Nebulæ, situated in the Sword-Scabbard. A line drawn from α Orionis through ζ, the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye on any clear night. Evenings about the 24th are the best.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week H.M. the King was born (June 3, 1865), in the table of years look for 1865, and in a parallel line, under June, is fig. 4, which directs to col. 4, in which it will be seen that June 3 fell on Saturday.

† 1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3–13 were omitted).

Tidal Constants,

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER *at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.*

NOTE.—The time thus found will be Greenwich Time for British, French and Belgian Ports, Dublin Time for Irish Ports, and Amsterdam time for Dutch Ports.

EXAMPLE 1.—Required the time of high water at Aberdeen on *January 6th*:

Time of high water at London Bridge	8*h.* 17*m.*	Morn.
Subtract tide interval	0 50	
Time of high water at Aberdeen	7 27	Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on *January 9th*:—

Time of high water at London Bridge	12*h.* 39*m.*	Morn.
Add tide interval	2 15	
Time of high water at Scarborough	1 54	After.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken, in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge"+"tide interval" will exceed 12 hours; in this case, the excess will be the time of high water after the noon or midnight following, according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, *January 9th aft.*:—

Time of high water at London Bridge on *January 10th* + 12 hours	12*h* 10*m.*	Morn.
Subtract tide interval	0 50	
Time of high water at Aberdeen, *Jan. 9th*	11 20	After.

Calendar of Church Lessons, 1916.

Previous to **1752** the above dates are computed from the Old Style. The tables in modern Prayer-Books are calculated for the New Style only. Dates here printed in heavier type are leap-years. **1752** had E D up to September **2**, but **A** from September **14** to December **31**, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. The Table of Moveable Feasts in the Prayer-Book gives all the others after finding Easter in this.

* Old Style. † New Style.

Table for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for all practical purposes, the times of sunrise and sunset for any place situated between latitudes 1° and 66½°.

To use the table: With the Sun's declination, in the first column, and under the required latitude on the horizontal line, will be found the apparent time of sunset. Subtracting the time so found from 12*h*. will give the apparent time of sunrise. To obtain the mean or clock time, the numbers in the column headed *before* or *after* clock (which will be found on the second page of each month), giving the difference in time between the mean and true sun for each day in the year, must be applied to the apparent times of sunrise and sunset, as the particular case may require; that is to say, if the true sun is *before* the clock the equation of time must be subtracted from the apparent to obtain the mean or clock time, and if *after*, added.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator by changing the declination from North to South and *vice versâ*.

If the time of sunrise or sunset should be required for any declination or latitude falling between the arguments in the table, these times may easily be found by simple proportion.

The sign on the left-hand side of the *correction* is to be used when the argument is on the left, and *vice versâ*; + means that the correction is to be added to the reduced altitude, and − that it is to be subtracted.

The corrections in Tables II. and III. are always additive; but since the numbers in Table III. have been increased by 1′ to make them additive, that quantity must be subtracted from the final result.

Solar and Sidereal Time.

		29	29 4·76	59	59 9·69	29	29·08	59	59·16
		30	30 4·93	60	60 9·86	30	30·08	60	60·16

To obtain the Sidereal Time corresponding to a given Mean Solar Time, we must take, from the second page of the month, the preceding Sidereal Time at Mean Noon, and add to it the Sidereal Equivalents corresponding to the hours, minutes, and seconds of the given Mean Time. Should the sum come out more than twenty-four hours, that amount must be subtracted from it. As an example, let the Sidereal Time corresponding to the Mean Time of April 15*d.* 10*h.* 5*m.* 24*s.* be required:—

	H.	M.	S.
Sidereal Time at Mean Noon on April 15	1	33	14
Mean Time intervals and Sidereal Equivalents..... 10*h.* =	10	1	38·56
5*m.* =		5	0·82
24*s.* =			24·07
Corresponding Sidereal Time =	11	40	17·45

This Table may be used to show the acceleration of Sidereal on Mean Solar intervals by subtracting the Mean Time arguments from their sidereal equivalents.

TO CHANGE INTERVALS OF SIDEREAL TIME INTO THE EQUIVALENT INTERVALS OF MEAN SOLAR TIME.

Hours of Sidereal Time.	Mean Time Equivalents.	Minutes of Sidereal Time.	Mean Time Equivalents.	Minutes of Sidereal Time.	Mean Time Equivalents.	Seconds of Sidereal Time.	Mean Time Equivalents.	Seconds of Sidereal Time.	Mean Time Equivalents.

		28	27 55·41	58	57 50·50	28	27·92	58	57·84
		29	28 55·25	59	58 50·33	29	28·92	59	58·84
		30	29 55·09	60	59 50·17	30	29·92	60	59·84

To obtain the Mean Time corresponding to a given Sidereal Time, take, from the second page of the month, the preceding Mean Time at Sidereal Noon, and add to it the Mean Time Equivalents corresponding to the hours, minutes, and seconds of the Sidereal Time.

As an example, convert the Sidereal Time $17h.\ 5m.\ 16s.$, on July 12, into Mean Time:—

		H.	M.	S.
Mean Time at Sidereal Noon on July 11		16	41	1
Sidereal intervals and Mean Time Equivalents	$17h. =$	16	57	12·90
	$5m. =$		4	59·18
	$16s. =$			15·96
Corresponding Mean Time, July 12	$=$	9	43	29·04

A TABLE OF THE NUMBER OF DAYS FROM ANY DAY IN ONE MONTH TO THE SAME IN ANY OTHER MONTH IN ORDINARY YEARS.

Celestial Objects and Phenomena for Observation, 1916.

THE following is a summary of the more prominent astronomical occurrences and objects which may be observed during the year, and is intended as a guide to those amateur observers who "consider the heavens."

ECLIPSES IN 1916.

In this year there will be three Eclipses of the Sun and two of the Moon.

I. A Partial Eclipse of the Moon, January 20, partly visible at Greenwich.

First contact with shadow	7*h.* 55*m.* morn.	Greenwich Mean Time.
Middle of the Eclipse	8*h.* 40*m.* morn.	
Last contact with shadow	9*h.* 24*m.* morn.	

II. A Total Eclipse of the Sun, February 3, partly visible, as a Partial Eclipse, at Greenwich. Begins on the Earth generally at 1*h.* 27*m.* aft., in longitude 109° West of Greenwich, and latitude 3° South. Central Eclipse begins at 2*h.* 29*m.* aft., in longitude 122° West of Greenwich, and latitude 7° North; ends at 5*h.* 31*m.* aft., in longitude 10° West of Greenwich, and latitude 49° North. Eclipse ends at 6*h.* 33*m.* aft., in longitude 19° West of Greenwich, and latitude 39° North. The line of Total Eclipse lies over the Atlantic and Pacific Oceans and north-west corner of South America.

At Montreal a Partial Eclipse is visible.

Begins at	3*d.* 3*h.* 29*m.* aft.	Greenwich Mean Time.
Greatest Phase	3*d.* 4*h.* 29*m.* aft.	
Ends	3*d.* 5*h.* 29*m.* aft.	

The first contact takes place at 217° from the vertex, and the last contact at 96° from the same point, counting towards the East.

At Greenwich, the Partial Eclipse begins at 4*h.* 31*m.* aft., Greenwich Mean Time, 208° from the vertex. The beginning only can be observed, as the Sun sets at 4*h.* 49*m.* aft. at Greenwich. The beginning may also be observed at Armagh, Dublin, Glasgow, Edinburgh, Liverpool, Durham, Oxford, and Cambridge, under much the same circumstances as at Greenwich, the times of first contact varying only two or three minutes.

III. A Partial Eclipse of the Moon, July 15, partly visible at Greenwich.

First contact with the shadow	3*h.* 19*m.* morn.	Greenwich Mean Time.
Middle of the Eclipse	4*h.* 46*m.* morn.	
Last contact with the shadow	6*h.* 13*m.* morn.	

The first contact takes place 40° from the North Point towards the East, the last contact 70° to the West. The magnitude of the Eclipse = 0·80. Only the middle of the Eclipse and the last contact will be visible at Greenwich, as the Moon does not rise till 4*h.* 29*m.* morn.

IV. An Annular Eclipse of the Sun, July 29–30, invisible at Greenwich. Eclipse begins on the Earth generally on July 29, 11*h.* 25*m.* aft., in longitude 103° East of Greenwich, and latitude 9° South. Central Eclipse begins July 30, 0*h.* 51*m.* morn., in longitude 90° East of Greenwich, and latitude 29° South. Central Eclipse ends 3*h.* 21*m.* morn., in longitude 179° East of Greenwich, and latitude 64° South. Eclipse ends 4*h.* 47*m.* morn., in longitude 179° East of Greenwich, and latitude 46° South. The line of Central Eclipse passes across the south-western portion of Australia.

At Perth a Partial Eclipse is visible.

Begins	July 29, 11*h.* 58*m.* aft.	Greenwich Mean Time.
Greatest Phase	,, 30, 1*h.* 30*m.* morn.	
Ends	,, 30, 3*h.* 16*m.* morn.	

The first contact occurs at 65° from the vertex, and the last at 270°. Magnitude of the Eclipse = 0·82.

At Adelaide an Annular Eclipse is visible, magnitude 0·95.

Begins	July 30, 0*h.* 43*m.* morn.	Greenwich Mean Time.
Greatest Phase	,, 30, 2*h.* 30*m.* morn.	
Ends	,, 30, 4*h.* 15*m.* morn.	

The first contact occurs at 90° from the vertex, and the last at 324°.

At Melbourne a Partial Eclipse is visible.

Begins	July 30, 1*h.* 2*m.* morn.	Greenwich Mean Time.
Greatest Phase	,, 30, 2*h.* 47*m.* morn.	
Ends	,, 30, 4*h.* 26*m.* morn.	

The first contact occurs at 100° from the vertex, and the last at 333°.

At Sydney a Partial Eclipse is visible, magnitude 0·78.

Begins	July 30, 1*h.* 12*m.* morn.	Greenwich Mean Time.
Greatest Phase	,, 30, 2*h.* 56*m.* morn.	
Ends	,, 30, 4*h.* 32*m.* morn.	

The first contact occurs at 100° from the vertex, and the last at 352°.

At Wellington a Partial Eclipse is visible, magnitude 0·58.

Begins	July 30, 2*h.* 11*m.* morn.	Greenwich Mean Time.
Greatest Phase	,, 30, 3*h.* 33*m.* morn.	
Ends	,, 30, 4*h.* 46*m.* morn.	

The first contact occurs at 122° from the vertex, and the last at 9°.

V. A Partial Eclipse of the Sun, on December 24, invisible at Greenwich; magnitude 0·01. Begins on the Earth generally at 8*h.* 32*m.* aft., in longitude 48° East from Greenwich, and latitude 67° South. Greatest Eclipse at 8*h.* 46*m.* aft., in longitude 32° East from Greenwich, and latitude 66° South. Eclipse ends 9*h.* 0*m.* aft., in longitude 18° East from Greenwich, and latitude 64° South.

VI. ECLIPSES OF JUPITER'S SATELLITES.

The following table contains *all* the Eclipses of the first Satellite, and only *those that are visible at Greenwich* of the second, third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D. and R. signifying respectively Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D. or R. in the second column.

From January 1 to Feb. 29 the disappearances and reappearances take place on the Eastern side of the Planet; from May 1 to October 23 on the Western side; and from October 24 to the end of the year on the Eastern side. In the astronomical telescope, which inverts the image, the Western side of the Planet will be on the left and the Eastern on the right hand, in the Northern hemisphere.

The mean time for any other place than Greenwich may be found by applying to the times given in the following table the difference of longitude, adding if the longitude of the place is *East* of Greenwich, and subtracting if *West*.

Besides the above Eclipses of the four larger Satellites, there will be found, on p. 89, the times of the visible Transits of Satellite III. across the disc of the planet when passing between the Earth and Jupiter. The times of immersion and emersion are given in astronomical reckoning.

Also on the same page are given the approximate times of Transit of the oval red spot across the central meridian of Jupiter.

Attention may here be drawn to the East and West Elongations of Titan, the sixth and brightest satellite of Saturn; the times of which will be found on p. 90.

All the above phenomena are interesting to watch, and come well within the range of very moderate telescopic power.

There will be no Eclipses of the fourth Satellite in the year 1916.

The angle from the vertex is measured from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from 0° to 360°.

Fixed Stars.

MEAN RIGHT ASCENSION AND DECLINATION OF ONE HUNDRED FUNDAMENTAL STARS, VISIBLE AT GREENWICH, FOR JANUARY 1, 1916.

In Opposition January 22.

The times of Southing of the above planets may be obtained with sufficient accuracy by taking the arithmetical mean between the times of Rising and Setting.

THE ROTATION PERIOD OF NEPTUNE.

From observations of the planet made by Mr. Maxwell Hall in the year 1883 it was noticed that while the light of certain stars in the field of the telescope remained constant during the night, the light of Neptune varied considerably, as if some portion of the planet's surface reflected light unequally. From these observations a period of rotation of about *7h.* 55*m.* was deduced.

During the opposition in 1915 similar comparisons were made on a rather more extended scale, which on reduction gave a value of *7h.* 50*m.* 6*s.* —rather smaller than the value obtained in 1883.

Mr. Maxwell Hall suggests that observers in widely differing longitudes should undertake similar observations during the opposition of Neptune in 1916, in order to obtain more data for a full discussion of the various points of interest connected with these observations.

These figures represent the dimensions of Saturn's Ring as seen from the Earth and refer to the outer limit of the outer Ring. The sign − means that the southern surface will be visible. The Ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the Ring.

Illuminated Portions of the Discs of Mercury and Venus, 1916.

η Argûs, magnitude ranges from 1 to 7·4.

α Centauri.

It is supposed that this star, one of the brightest in the Southern Hemisphere, is the nearest of the fixed stars to the Earth. Its parallax has been found to be 0·75″, which would make its distance from the Earth 275,000 times that of the Sun. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

Telescopic Powers Suitable for Observing Celestial Objects.

COMETS, and large nebulæ such as those in Orion and Andromeda, require very low powers and extensive fields of view, so that the whole of the objects may be viewed, and their light sufficiently concentrated to display the fainter portions. To examine critically the structure of a comet's nucleus or details of form in a nebula, powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun are to be very distinctly seen in a small telescope, care being taken to protect the eye with deeply-tinted glass. Large spots or clusters of spots are sometimes visible to the naked eye. A 3-in. refractor, powers from 60 to 100, reveals the solar markings in detail and under many varieties of form and grouping. The craters, mountains, clefts, and ridges of the Moon are satisfactorily seen in general outline with 50 and 75, though, for minute formations, powers of 300 and 400 are necessary on a 10 or 12 in. glass. Solar and lunar eclipses are best observed with low powers, with fields sufficiently ample to include a picture of the whole phenomenon.

The phases of Mercury may be discerned with 150 or 175, but the air must be steady and the object not very near the horizon; those of Venus are plain with quite a low power. Whenever practicable these planets should be examined in daylight, for definition is often agreeably sharp at such times. Mars and Jupiter, too, should be observed in very strong twilight.

The chief spots on Mars, such as the *Syrtis Major* and *Acidalium Mare*, may be distinguished with 90 on a 2-in. refractor, but powers of 300 and 350 and an 8-in. refractor or 10-in reflector are desirable to exhibit the outlines of the fainter, narrower markings, many of which are delicate streaks and spots requiring very sharp images as well as ample magnification.

Jupiter's equatorial belts are perceptible in a 1½-in. telescope, power 40, but for studying their variable appearances and taking transit-times of the bright and dark spots 200 and 250 are requisite on a much larger instrument. The writer has successfully employed 1540 with a 12½-in. reflector on Jupiter, but found no advantage over powers of 200 to 440. The four bright satellites are visible in an opera-glass. Dark transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and powers of 120 or 150.

Saturn and Mars usually appear well defined under higher powers than Jupiter. The division in Saturn's ring and his principal dark belt are to be readily glimpsed, when the globe is sufficiently inclined, with a 2½-in. glass, power 120. But magnifiers of 250 to 350, and greater aperture, are essential to reach the delicate features of the planet, such as the spots which appeared in his northern hemisphere in 1903. Titan is visible in any small telescope, and Iapetus is sometimes an easy object, but Tethys, Rhea, and Dione are much more difficult.

In planetary work the observer will ultimately find it an advantage to accustom himself to one and the same power. If on special occasions or for particular purposes really high magnifiers are employed, they should be single lenses, as they possess a decided advantage in light and definition at the centre of the field.

For planetary observations generally, a telescope of less than 6 inches aperture is not really effective for reliable and comprehensive work, nor can powers under 200 be expected to deal satisfactorily with the markings on Mars, Jupiter, and Saturn. When the air is very steady large telescopes and fairly high magnifying powers may be used to the best advantage.

Occultations of stars by the Moon are generally to be well observed with a 3-in. glass, power 50 to 75.

For double stars the eye-piece required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as Vega, Polaris, or Rigel, then a moderate power, such as 100 or 150, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars a comet eye-piece, power 25 or 30 and field about 1½°, will be best. The latter would also be well adapted for comet-seeking, and for general views of large comets, nebulæ, and parts of the Milky Way.

The Variable Star Algol (Beta Persei).

THE Solar or Planetary System consists of the Sun, with eight planets circulating around him at varying distances, in oval figures not greatly differing from the circular form. Six of these planets have other secondary and smaller bodies circulating round their primary, forming separate systems, and all receiving their light and heat from the Sun.

The periodic comets, which return to perihelion at regular intervals and have the Sun in one focus of their elongated ellipses, are also members of the Solar System, but shine chiefly by their own light.

THE SUN.

The surface of the Sun presents a mottled appearance, with here and there in definite positions certain black spots, the nature of which is not yet certainly known. They vary in numbers, reaching a maximum about every 11 years. They are found in the region of the Sun's equator. As the Sun rotates on its axis in 25 days 8 hours, the spots appear to pass across the disc in 13½ days, moving from east to west, disappearing at the western edge, and, supposing the spot to last long enough, re-appearing again at the eastern limb in 13 or 14 days. They are of irregular shape, vary greatly in size, and consist of several distinct parts—a nucleus quite black, an umbra less dark, and a penumbra faintly dark; the nucleus being at a lower level than the others, and all lower than the bright surface.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon, as in a total solar eclipse, certain red prominences are seen projecting from the Sun's limb, consisting of masses of glowing hydrogen gas which arise from the chromosphere, sometimes to a height of nine or ten times the diameter of the Earth. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun, extending to an immense distance, is called the corona, and can at present only be seen during total eclipses of the Sun. The lower portion consists of a pale green light containing hydrogen, the upper a beautiful mass of silvery white light, in form of feather-like plumes with dark spaces between. These plumes have sometimes been traced to twice the Sun's diameter. The corona does not always appear of a constant form, but has been observed to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots.

The distance from the Sun to the Earth is about 93,000,000 miles. In comparing distances expressed in such high numbers it is not very easy to get a clear idea of their relation to each other. It will answer the purpose better to take this distance as the unit and express all others in terms of it.

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system, his mean distance in terms of the unit being 0·387. Moving in an orbit between the Sun and the Earth he can never be seen far from the former body, being sometimes to the West, and sometimes to the East of the Sun; in the former case appearing as a morning star and in the latter as an evening star. These apparent excursions are technically known as elongations, the times and distances of which are given in the third page of each month. The great ellipticity of the orbit causes the amount of these excursions to vary considerably, they may be as small as 16° or as large as 29°. His period of revolution round the Sun, in other words his year, consists of 88 solar days, and he turns on his axis in the same time, and therefore always presents the same face to the Sun, like the Moon with respect to the Earth, and also, like the Moon, shows similar phases to the Earth; like the Moon in her first quarter if the elongation be in the East and like her last quarter if in the West.

A planet is said to be in conjunction with another body when it is seen in the same direction in the heavens. In the case of the inferior planets, those between the Earth and Sun, the conjunction is obviously of two kinds, the one when the planet is between the Earth and Sun, and the other when the Sun is between the Earth and the planet, the former named inferior and the latter superior conjunction.

Mercury will be favourably visible from January 15–25 and from May 5–15, in the evenings, above the western region of the horizon, about an hour after sunset. He will also be well observable at the end of June in the morning sky, and again during the last half of October.

VENUS.

Venus, nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth, and presents phenomena similar to those of Mercury, only that, being farther from the Sun and nearer to the Earth than Mercury, her angles of elongation exceed those of Mercury, extending to 47°. Her year consists of 225 days. The disc of Venus is not telescopically interesting, as owing to her dense cloud-laden atmosphere but very few markings are visible, rendering the determination of her axial rotation uncertain. By many astronomers her day is supposed to be very nearly equal to that of the Earth. At the time of her greatest brilliancy Venus appears as a beautiful crescent, like the Moon when about 3½ days old.

Venus will be splendidly displayed during the year; in fact, the conditions for the favourable presentation of this brilliant orb could hardly be better. During the first six months of 1916 she will shine as the evening star, and throughout the last half of the year will appear as the morning star. In the first half of May the planet will not set until nearly midnight, and early in October she will come above the horizon at about 2 a.m. and remain visible until after sunrise. On February 13 and 14 a very interesting spectacle will be presented in the western sky, Venus and Jupiter being very near together. The former planet will be at her greatest elongation E. (45° 39′) on April 24, and at her greatest brilliancy on May 27. At the end of June Venus will be invisible for a short period, but quickly re-appears as a morning star, and reaches her greatest brilliancy on August 9. On September 12 she will be at her greatest elongation W. (46° 1′), and may be observed very near the Moon on September 23.

Either for popular naked-eye observation or for scientific telescopic study Venus will offer almost unique facilities in 1916.

THE MOON.

Our own planet has one satellite, the mean distance of which from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the solar system. When viewed through a telescope, charts of very great accuracy can be made of her surface, having no appreciable atmosphere to obscure the more delicate markings. With a powerful telescope the Moon may be brought apparently within about 500 miles, so that any changes which occur over large tracts of country could be easily distinguished: cities perhaps from cultivated fields. The Moon's surface shows signs of tremendous volcanic action; craters are found all over the surface, varying greatly in size and crowded closely together. The most conspicuous of these craters is Tycho, with a breadth of 50 miles and 20,000 feet deep, having a central cone about 5,000 feet high. It will be noticed that we only see one side of the Moon, and from this fact we infer that she must turn on her axis in the same time that she turns round the Earth. There being no sign of water or vapour on her disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature: heated in the lunar day of half a month to a very high temperature indeed, and in the other half subjected to cold equal to that of interstellar space. Her diameter is 2,160 miles, or a trifle more; and her rate of motion through the firmament 13° 10′ 35″ per day and 32′ 56″ per hour. Thus she travels over a space slightly exceeding her own diameter in one hour. The actual time she takes to move around the Earth is *27d. 7h. 43m. 11·46s.*, but the time from one New Moon to another is *29d. 12h. 44m. 3s.* When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. Quite a small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. We see, as it were, a cold dead world apparently devoid of water or atmosphere. Deep down in the clefts and valleys it is possible that some small amount of moisture may exist, and with it a very low form of vegetation, but it is certain that the water has long since left the regions popularly known as seas. Owing to the absence of moisture all details on the lunar surface stand out with startling distinctness, and the shadows of the mountain peaks are sharp and clear.

Plato is, perhaps, the best known ring-plain, and is easily identified by amateurs. It lies at the extreme lower (N.) edge of the dark greyish sea called the Mare Imbrium. Plato is 60 miles in diameter, the walls average 3,800 feet, and the highest peak nearly 7,300 feet in altitude.

Tycho is the lunar volcano from which radiate the wonderful systems of bright streaks about whose origin and meaning we know so little. These rays, as they are often called, can be best seen at Full Moon, when they cross almost the entire visible hemisphere of our satellite.

The plane in which the Moon moves is inclined about 5° to the Ecliptic and cuts it in two opposite points, called her nodes. These points are subject to a motion round the Ecliptic, making the complete circuit in about 19 years; so that after every 19 years the eclipses recur in the same order. Owing to this tilt the Moon will have passed over a zone in the heavens of 10° in the course of 19 years, eclipsing, or occulting, as it is called, all the stars and planets which lie along a line joining the Earth, Moon, and star or planet. A list of these phenomena, with the time of disappearance and reappearance, as well as the point on the Moon's limb at which they occur, will be found on p. 81. When the Moon passes between the Earth and Sun and the three bodies lie on a line joining their centres, there will be an eclipse of the Sun, which may be either total or annular—total if the Moon happens to be near perigee, and annular if near to apogee; the Moon in this latter case being farther from the Earth, looks smaller than the Sun and leaves at the middle of the eclipse a ring of light from the Sun round the dark circular disc of the Moon. When the centres of the Sun and Moon are not coincident, but differing by something less than the Moon's semi-diameter, the eclipse will be partial. Solar eclipses are only total at certain places on the globe, and will be partial in localities off the line of totality, owing to the change in the observer's position placing the Moon out of the direct line between him and the Sun. Total eclipses of the Sun are very rare in this country; there will be none till the year 1927.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon, causing a lunar eclipse, which may be either total or partial as in the case of Solar Eclipses, but with this difference—that the eclipse will be visible alike to all observers where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but owing to the Sun's light being scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a dark copper-coloured disc. From what has been said above, it will be seen that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

When the Moon is full in that part of the Ecliptic called the vernal equinox, her motion towards the north is most rapid, and in north latitudes nearly parallel to the horizon; then her tendency to rise later each night is compensated by the northward part of her motion, and she will in that case rise about the same time, nearly full, for two or three successive nights at the time of sunset, and thus give light to get in the harvest. Hence the full Moon which happens nearest to September 22 is called the Harvest Moon. In the United Kingdom, however, the harvest is usually gathered in some three or four weeks before this time.

Beyond the advantage we get from her light, the Moon is most important to us as a tide-producing body.

It is not possible within the limits assigned to this article to enter minutely into all the causes which produce the complex phenomena of the tides, though the most prominent factors may be explained without having recourse to the higher mathematics necessary to a full comprehension of this difficult subject.

The Newtonian law of gravitation teaches us "that every particle of matter in the universe attracts every other particle, with a force varying inversely as the square of their mutual distances, and directly as the mass of the attracting particle."

Suppose the Earth to be a sphere covered by a sea of uniform depth, and the Earth and Moon relatively at rest, then the layer of water immediately under the Moon will be attracted

more per unit of mass than the Earth, and heaped up towards the Moon; the layer of water on the opposite side of the Earth will be attracted less than the solid Earth per unit of mass: being further off, the water here will be heaped up away from the Earth and Moon. At these opposite places there will be high water, though in this latter case not quite so high as in the former. The sea will thus have very nearly the form of a prolate spheroid, with the major axis passing through the Earth and Moon. At places situated on a circle 90° from the major axis there will be low water.

As the Moon revolves around the Earth, and the Earth rotates on its axis, this figure never has time to perfect itself, and an imperfect form of it travels round the Earth in a lunar day, which is longer than a civil day by about 50 minutes. So that high water occurs, generally speaking, about that time later at the same place each day.

Besides the Moon, the Sun exerts a considerable disturbing force, producing tides exactly similar to those produced by the Moon, but smaller in effect, for although the mass of the Sun is immensely greater than that of the Moon, yet his distance from the Earth is such that the ratio of his tide-producing force to that of the Moon is as 1 to 2¼. The observed tide, therefore, is the effect of the superimposed lunar and solar tides. Calculation shows that the difference between the major and minor axes of the spheroid due to the Moon alone amounts to 58 in., and according to the ratio above would make the same difference due to the Sun alone about 25¾ in.

The following heights of tides on the Thames, with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxxiii. 204):—

	Height.	Distance.
	ft. in.	m.
London Docks	18 10	60
Putney	10 2	67½
Kew	7 1	73
Richmond	3 10	76
Teddington	1 4½	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

THE EARTH.

The Earth in its orbital motion round the Sun has the effect of making the latter body apparently describe a complete revolution among the stars in the course of a year, half of its path being above the Earth's equator, as in summer, and half below, as in winter. The Sun does not, of course, move, but the Earth moves in a direction opposite to the apparent motion of the Sun, in a plane, called the Ecliptic, passing through the Sun's centre. The Earth's equator is inclined 23½° with respect to the Ecliptic, and this tilt it is which causes our seasons. The Earth's equator, therefore, in consequence of this tilt, cuts the Ecliptic in two opposite points, the vernal and autumnal equinoxes; and when the Sun is at either of these points the days and nights all over the globe are of equal duration. The Earth travels over one half of the Ecliptic in summer, and the other half in winter. It will be noticed in comparing the times of the beginning of the seasons, that in the summer half, from spring to autumn, the Earth is delayed in traversing this part some eight days longer than the winter half, from autumn to spring. This is caused by the eccentricity of the orbit and the law of areas—a law which requires that the imaginary line joining the Earth and Sun shall sweep over equal areas in equal times. The Earth when farthest from the Sun, as at the summer solstice, must move more slowly than at the winter solstice, when the radius vector, as this imaginary line is called, is shorter. In relation to the Sun the Earth is a very small body, the diameter of the Sun being 866,400 miles, that of the Earth only 7,918 miles. The Earth revolves around the Sun, in the Ecliptic, with an average velocity of 18 miles a second, and rotates on its axis once in 23 hours 56 minutes. Mercury and Venus, being nearer to the Sun, have a velocity of 29 and 21 miles a second respectively.

The Ecliptic is the fundamental plane to which the planets' places are generally referred, the planes of their orbits being inclined more or less to this fundamental plane; the longitude is measured along the Ecliptic from the vernal equinox, the latitude to the north or south of the Ecliptic. Astronomers also refer their observations to another system of co-ordinates. Taking the Earth's equator as the fundamental plane, they measure Right Ascension from the same point of intersection along the *equator*, and Declination north or south of it. These latter being derived from observation, the corresponding celestial longitude and latitude can be deduced from them by calculation.

The inclination of the planetary orbits to the Ecliptic is not large, the greatest being that of Mercury, 7°; Venus, 3¼°; Saturn, 2½°; Mars, Jupiter, and Neptune, rather more than 1°; and Uranus, ½°. The point of intersection of the equator with the Ecliptic is not stationary, but has an annual motion of 50″, thus causing an annual increase in the celestial longitudes, and Right Ascensions of the stars. The Ecliptic is divided into twelve divisions of 30°, called the signs of the Zodiac, and named after the constellations. This sometimes causes a little confusion, because, at the present time, the precession has carried this point from the constellation of Aries into Pisces. In the time of Hipparchus, B.C. 125, it was situated in Aries, and astronomers still speak of the first point of Aries, by which they mean the first sign of the Zodiac, and not the *constellation* of Aries. This precessional movement will carry the equinoctial points completely round the Ecliptic in 26,000 years, called the Annus Maximus. The inclination of the planetary orbits to the Ecliptic being but small, it will occasionally happen that the inferior planets, Mercury and Venus, when near their nodes, and passing between the Earth and Sun, will be seen projected as black spots on his disc. These *transits*, as they are called, take place more frequently in the case of Mercury than Venus. The transits of Venus are useful in determining the parallax of the Sun—that is, his distance from the Earth. Mercury might be used for the same purpose, but the conditions

are far less favourable. Such transits may be considered as particular cases of eclipses, but from the smallness of the planetary discs, as compared with that of the Sun, no sensible obscuration of the latter is produced.

MARS.

The next planet is Mars, moving in an ellipse with a mean distance from the Sun of 1·524, and having a diameter rather more than half that of the earth. His year consists of 687 days, and period of rotation, or day, equals 24*h.* 37*m.* Mars, like Mercury and Venus, exhibits phases, but in a much less degree than the inferior planets. He is never seen in crescent phase, and only gibbous to the extent of one-eighth of his disc; the maximum occurring when the planet is in quadrature, or 90° of longitude from the Sun. The other superior planets are too far away to show any appreciable phase.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained, besides white spots at the poles of rotation. These are supposed to consist of snow—a reasonable supposition if, as is probably the case, Mars has a considerable atmosphere. When it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely. The continents and seas, as the markings are called, have been charted and their positions accurately laid down. Many excellent photographs of Mars have also been obtained showing the white polar spots and other markings very plainly.

In 1877 Professor Asaph Hall discovered that Mars was attended by two very small satellites, both too faint to be seen except in the most powerful telescopes. The outermost, Deimos, revolves in 30 hours 18 minutes; and Phobos, the larger and nearer the planet, takes only 7 hours 30 minutes, or less than one-third the time of the rotation of its primary. In consequence of the rapid motion of the inner satellite a very interesting appearance would be presented to an inhabitant on Mars; it would be seen to rise in the *west* and set in the *east* twice in the course of one night, while the outer satellite would revolve in the opposite direction—from *east* to *west*. Mars is an interesting object for telescopic study, as his actual surface may be seen—and white polar caps are amongst the most prominent and easily distinguished features on his disc. Mars, and the further planets, moving in orbits exterior to the Earth, are said to be in opposition when distant from the Sun 180° of longitude; they are then nearest to the Earth, generally at their brightest, South at midnight, and attain their greatest altitude.

Mars will be in opposition to the Sun in February, and may be very successfully observed at that period. His distance from the Earth will be considerable, but his northern declination and consequent great height above the horizon will partly compensate for his small diameter. The latter, even when the planet is nearest to the Earth on February 9. will be only 13″9, but the definition of the surface markings on the disc will probably be excellent, as the altitude of the object will be far above the disturbing vapours which usually induce the bad quality of telescopic images. During the months of January and February Mars apparently moves westwards amongst the stars of Leo, and at about the middle of January will be placed a little above the bright star Regulus in that constellation.

ASTEROIDS.

Between Mars and the next conspicuous planet, Jupiter, there are a number of small planets, or asteroids. Of this number Vesta, Juno, Ceres, and Pallas are the larger; the brightest, Vesta, when in opposition, being just visible to the naked eye. Her diameter is 239 miles. Her light-reflecting capacity is very great. The diameter of Ceres is 477 miles.

The periodic times of their revolutions vary considerably, amounting on an average to about 1,600 days, or 4½ years. Some of the orbits are very oval and the inclination of their planes varies considerably; in the case of Pallas it amounts to 35°, that of Juno being only 13°. Many of these asteroids are less than 10 miles in diameter, and they are probably nothing more than great masses of rock flying round the Sun. One of the more recently discovered of these small bodies is named Eros, which at some oppositions approaches nearer to the Earth than Mars does at any time, thus affording the best opportunity for the determination of the solar parallax.

The distances of the planets from the Sun are observed to be connected by a curious progression known as *Bode's Law*, that holds good approximately for all of them except Neptune, which it would make too far from the Sun. According to this law there ought to be another planet in the space between Mars and Jupiter. Although this law is quite empirical, and only roughly true, it led astronomers to explore the region between Mars and Jupiter, which resulted in the discovery of Vesta, Ceres, Juno, and Pallas, and subsequently of the vast number at present known—about a thousand.

It has been suggested that these bodies, very small as contrasted with the other members of the solar system, may be the result of the destruction of a large planet originally circulating between Mars and Jupiter, which had become shattered by some catastrophe scattering its fragments in all directions. One of the difficulties in accepting this explanation is that if all of the fragments of the exploded planet started from the same place their orbits should have a point of intersection with the Ecliptic common to them all, which is not now the case.

JUPITER.

The next planet, Jupiter, distant from the Sun 5·20 times that of the Earth, is the largest planet in the system, having a diameter eleven times that of the Earth. His year is equivalent to twelve of our years, and his day 9*h.* 56*m* long. Though so much larger than the Earth, his density is but ⅓th of the latter. His orbit is only inclined 1° 20′ to the Ecliptic. On viewing Jupiter through a telescope the first thing that strikes the observer is that his disc is not circular, but oval, the polar diameter being 84,570 miles and the equatorial 90,190 miles.

This form, of an oblate spheroid, is due to his rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon. They were the first celestial objects discovered with the telescope, by Galileo, its improver, in

the year 1610. Their orbits are but slightly inclined to that of Jupiter, and in consequence eclipses of the three inner moons occur every lunation, the shadow of the planet being large as compared with their distances. As seen from the Earth, before opposition, the eclipses will take place when the satellites are west of Jupiter, and after opposition on the east of the planet. The motions of the satellites are eastwards. Besides the eclipses of the satellites, they are seen at times to transit the disc of the planet, with their shadows, and are sometimes occulted, behind his disc.

Besides the four principal satellites Jupiter has five other very small ones, visible only in large telescopes.

Jupiter will be strikingly visible as an evening star during the first two months of the year. In March he will draw near to the Sun, and become invisible as a naked-eye object at the end. He will share with the brighter planet Venus the glories of the evening sky in January and February. In June he will prominently reappear as a morning star, and in the summer months Venus and Jupiter will form a very lustrous pair of morning stars. The latter planet will be very suitably placed for the study of his surface features, which are abundant and of peculiarly interesting character.

There is one remarkable feature—a large oval spot—which has been visible for many years, situated partly within a hollow on the southern equatorial belt of Jupiter. Its rotation period has varied in different years, increasing from $9^h.\ 55^m.\ 33^s.$ in 1879 to $9^h.\ 55^m.\ 42^s.$ in 1900, when irregularities of striking character soon after developed, and these were probably due to the disturbing action of a large dusky spot in nearly the same latitude. Since the year 1910 the red spot and hollow in the belt have exhibited a surprising increase of velocity, the rotation period having decreased to about $9^h.\ 55^m.\ 35^s.$

We give below a table of the times when the spot will be visible in telescopes. It will be useful to remember that the spot returns to the same apparent position on the disc at intervals of $9^h.\ 55^m.\ 35^s.$, so that at intervals of 12 days (29 rotations) the spot is presented at nearly the same times (really a few minutes earlier) as before. There are a great many other features of fairly distinct outlines on Jupiter, but they do not seem to exhibit the same durableness as the red spot, for the latter has been visible during more than half a century. The hollow in the southern belt in which the red spot is situated has existed, with some variations of shape, since September, 1831, when Schwabe, of Dessau, detected it and represented its aspect in a series of drawings.

APPROXIMATE TIMES OF TRANSIT OF RED SPOT ON JUPITER.

Date. 1916.	Probable time of transit. H. M.	Date. 1916.	Probable time of transit. H. M.

Jupiter will be near Venus on the night following February 13, and create a brilliant and attractive picture in the evening sky at about that date. On October 23 he will arrive at opposition to the Sun, and be exhibited under the best circumstances during the whole of the night. Any small telescope will display the chief features upon his surface, and with one of 3 inches aperture it is possible to discern the belts and certain marks on Jupiter, and the four larger moons are plainly revealed. The two outer ones, viz., Sats. III. and IV., when crossing over the disc of the planet appear as dark spots, and their shadows are also perceptible, though usually projected on another region of the disc and visible possibly at a different time. Occasionally all of the brighter satellites are on one and the same side of the planet (see third page of each month).

SATURN.

The next planet we come to is Saturn, distant from the Sun 9½ times that of the Earth, having a diameter of 76,470 miles, or more than nine times that of the Earth; his day consists of 10 hours 38 minutes, and his year 29½ of our years. His rings consist of three bright ones and one interior dusky ring, through which the body of the planet can be seen. Some recent observations seem to show that another dusky ring, outside the bright ones, also exists. The rings appear to consist of three flat annular discs of extreme thinness, inclined at 28° to the Ecliptic, and extending to a distance a little greater than the radius of the planet. It has been shown that these rings cannot be a coherent mass, or in one piece, whether solid or liquid, as in that case it would be difficult to account for their stability. On the contrary, they probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Of the three bright rings the middle one is the brightest. When the Earth is in the plane of the rings they would be seen edgewise, but owing to their thinness they would be invisible to us except in the field of a good telescope. Also when the Sun and Earth are on opposite sides of this plane the rings will be invisible. On p. 83 will be found a table showing the dimensions of Saturn's outer ring as seen from the Earth. Belts like those on Jupiter may be seen on Saturn, but not of so pronounced a character. His figure also shows a bulging out of his equator, the ratio of the polar to the equatorial diameter being as 14 to 15.

Saturn has ten satellites, situated outside the rings, some of which are visible in low-power telescopes. Titan, the largest, is about 1½ times the size of our moon, whilst Iapetus is about the same size as our satellite.

Saturn will be well visible during the earlier months of 1916, and will arrive at opposition to

the Sun on January 4, when he may be viewed to the best advantage. His position is in Gemini, near the star ζ Geminorum. He will draw near the Sun and become invisible in June, but will reappear to the west of the Sun and shine as a morning star in August, when Venus and Jupiter will also be visible, so that the sky will be especially replete with planetary pictures at this period. Saturn will be an interesting object in the vicinity of the Moon on the evenings of January 18, February 14, March 12, and April 9.

He will be occulted by the Moon on the morning of August 25 between 9.42 and 10.52 a.m.

There are undoubtedly many changes occurring on the surface of Saturn, and they are probably of a very similar character to those affecting Jupiter. The belts on Saturn are formed by the dark material (perhaps of volcanic nature) evolved from the globe of the planet and spun into longitudinal bands owing to the very swift axial rotation. The motion of different portions of the disc is probably variable, and exhibits some striking irregularities and discordances. Thus Sir W. Herschel determined the rotation period of the planet to be about 10*h.* 16*m.*, while Prof. Hall made it 10*h.* 14½*m.* in 1876. But in 1903 great disturbances affected the northern region of Saturn's disc, and an array of dark and bright spots formed in the north temperate region. These, on being watched during several months, gave a rotation period of 10*h.* 37*m.* 55·4*s.*, which is more than 23 minutes longer than the value found 27 years before. This sufficiently proves that the disc of the planet visible to us is not the real globe, but a layer of atmospheric vapours moving at a rate inconsistent with the motion of the solid sphere.

SATELLITES OF SATURN.

Of the ten known satellites of Saturn, revolving in periods from 22½ hours to 550½ days, only five or six are usually visible in small telescopes. Titan, the sixth satellite, is by far the brightest of them all, and may be distinguished in any small glass. The periods when it will arrive at its elongations from Saturn will be as under in 1916; the times are given in hours and tenths, and astronomical reckoning is employed :—

The rings of the planet are now widely open, and the attractive aspect they present may be discerned with a small telescope of only 2 inches aperture. To view the unique structure of this wonderful object to the best effect and under a sufficiently large angle will require a large instrument and rather high magnifying power There is probably no telescopic scene in the heavens more alluring than that formed by the rings of Saturn.

URANUS.

The next planet we come to is Uranus, rather more than nineteen times further from the Sun than is the Earth, and 4 times the Earth's diameter. His orbit is approximately circular, and nearly coincident with the Ecliptic. His year is equivalent to eighty-four of our years, and the velocity in the orbit amounts to only 4½ miles in a second.

Uranus has four satellites, differing from those of other planets in that they revolve round the primary in orbits nearly perpendicular to the Ecliptic and in a retrograde direction (westerly). The satellites are only visible in the largest telescopes. A recent determination of the period of rotation gives it as 10*h.* 45*m.*

Uranus will be visible to the best effect in August and September, when he will be placed in that region of the heavens opposite to the Sun. He is, however, a faint distant object, only just visible to the unaided eye, being of the 5½ mag. near the best time. He will be situated in Capricornus, very near the star ε Capricorni, in August and September, and it will form an important aid to his ready identification. Uranus will be only 1° 7′ S. of the brilliant planet Venus on January 6, and just a quarter of a degree from Mercury on January 17, 5.43 p.m.

NEPTUNE.

Neptune, the outermost planet of our system, is distant from the Sun thirty times that of the Earth, with a diameter slightly greater than Uranus. Neptune has one satellite, like those of Uranus moving in a retrograde direction in an orbit inclined 35° to the Ecliptic. His year is equivalent to 165 of ours, and velocity in orbit a little more than three miles in a second.

A quite recent determination of the rotation period of Neptune, by Maxwell Hall, gives 7*h.* 50*m.* 6*s.* No belts or spots have been glimpsed on Neptune's disc, but probably both he and Uranus resemble Jupiter in this respect.

Neptune will be in opposition to the Sun on January 22, and will be well visible in telescopes during the early months of the year. This planet is very small, being of about the eighth magnitude.

COMETS.

In addition to the planets, there are other interesting objects belonging to the solar system, called comets. Some of these revolve in elliptical orbits, and their periodic times range from 3½ years to more than a million years. Others move in parabolic courses and do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve around the Sun in periods from 3½ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases.

Their orbits extend outwards to the position where Jupiter performs his revolution, and from this circumstance they are termed Jovian comets. The following are the approximate months when

members of this family may be expected to return to perihelion:—

Expected Return.	Period in Years.	Name of Comet and Year of Discovery.
1916. March	7·186...	Swift 1895
May	7·418...	Denning 1894
May	6·453...	Perrine 1896
June.....	6·480...	Daniel 1909
June.....	8·687...	Denning 1881
July	6·420...	Spitaler 1890
October ...	6·647...	Giacobini 1896
1917. January ...	5·398...	Barnard 1884
March	6·686...	D'Arrest 1851
June.....	5·456...	Brorsen 1846
November.	7·100...	Brooks..... 1889
1918. March	7·414...	Faye 1843
May	6·539...	Tempel 1867
May	3·33 ...	Encke 1785
1919. August.....	6·67 ...	Kopff 1906
September.	6·86 ...	Holmes 1892
October ...	6·62 ...	Finlay 1886

The above comets move in elliptic orbits not much inclined to the Ecliptic. The great majority of them travel in *direct* courses, and in these respects present an analogy to the planets, but of those that move in very long ellipses, or parabolas, about two-thirds have a retrograde (westerly) motion.

In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. On examination of the light of comets with the spectroscope, it appears to consist of carbon in various forms, and cyanogen has also been detected. These materials exhibit themselves as bright bands. Generally a continuous spectrum is shown as a background to the bright lines, from which we infer that a part of the comet's light is due to reflected sunlight. Comets' tails are generally directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

METEORS.

Another class of objects which belong to the solar system are the meteoric streams, giving rise to occasional showers of meteors, falling stars, or fire-balls, as they are differently called, but which represent one and the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form attractive pictures. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. The following is a table of the radiant points of some of the more prominent meteoric streams visible during the year 1916:—

No.	Epoch.	Radiant Point. R.A.	Dec.	Name of Shower.
		°	°	
1	January 2—4 ...	230	+53	Quadrantids.
2	January 25—29	131	+32	ι Cancrids.
3	February 20	263	+36	ρ Herculids.
4	March 1—4	166	+ 4	τ Leonids.
5	March 13—24 ...	161	+58	β Ursids.
6	April 12—24.....	208	−10	α Virginids.
7	April 20—22.....	271	+33	Lyrids.
8	May 1—6	338	− 2	γ Aquarids.
9	May, June, July	253	−21	α Scorpiids.
10	May 18—26	246	+29	Coronids.
11	June—Aug.	312	+61	δ Cepheids.
12	June–Sept.....	303	+24	η Sagittids.
13	July 8—13.....	316	+31	ζ Cygnids.
14	July 15—28	304	−12	α Capricornids.
15	July—Aug.	280	+57	*b* Draconids.
16	July 4—Aug. 4	47	+43	α–β Perseids.
17	July 25—30	339	−11	δ Aquarids.
18	August 10—12...	45	+57	Perseids.
19	August 5—16 ...	292	+53	κ Cygnids.
20	August 15—25...	291	+60	o Draconids.
21	August 16.....	280	+44	α Lyrids.
22	Aug. 21—Sep. 21	62	+37	ε Perseids.
23	August 29.....	106	+52	Lyncids.
24	Sept. 27.....	75	+15	o Orionids.
25	October 11—24...	40	+20	ε Arietids.
26	October 17—24...	92	+15	Orionids.
27	October 23	100	+13	ξ Geminids.
28	Nov. 5	61	+35	ε Perseids.
29	Nov. 13—15	150	+23	Leonids.
30	Nov. 14—25	64	+22	ε Taurids.
31	Nov. 17—23	25	+43	Andromedids.
32	Nov. 30—Dec. 9	162	+58	β Ursids.
33	Dec. 1—14.....	108	+33	Geminids.
34	Dec. 21—25	166	+33	ξ Ursids.

THE PERSEIDS.

This is the most regular and long-continued display of the whole year. It visibly commences early in July, and ends in the fourth week of August. The radiant shows a motion to the E.N.E., and its positions on eight nights are:—

July 8.....	9°+46°	Aug. 1.....	33°+55°
,, 14.....	14°+48°	,, 7.....	40°+56°
,, 20.....	20°+51°	,, 13.....	48°+57°
,, 26.....	26°+53°	,, 19.....	57°+58°

THE FRENCH REPUBLICAN CALENDAR.

This, although reckoned from the 22nd September, 1792, was not introduced until the 22nd November, 1793. It remained in use only till the 31st December, 1805. The Gregorian Calendar was restored January 1st, 1806 (Nivôse 10, Year XIV.). The months varied in different years, thus Nivôse 1 commenced December 21st in 1793, December 22nd in 1795, December 21st in 1796, December 22nd in 1799, December 23rd in 1803, and December 22nd in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire	(*Vintage*),	23 Sept. to Oct. 22	
Brumaire	(*Foggy*),	23 Oct. to Nov. 22	
Frimaire	(*Sleety*),	22 Nov. to Dec. 21	
Nivôse	(*Snowy*),	22 Dec. to Jan. 21	
Pluviôse	(*Rainy*),	21 Jan. to Feb. 20	
Ventôse	(*Windy*),	20 Feb. to Mar. 21	
Germinal	(*Budding*),	22 Mar. to Apr. 21	
Floréal	(*Flowery*),	21 April to May 20	
Prairial	(*Pasture*),	21 May to June 20	
Messidor	(*Harvest*),	20 June to July 19	
Thermidor	(*Hot*),	20 July to Aug. 19	
Fructidor	(*Fruit*),	19 Aug. to Sept. 18	

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Primidi*), dedicated to Virtue; (*Duodi*) to Genius; (*Tridi*) to Labour; (*Quartidi*) to Opinion: and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, a sixth day, the 22nd or 23rd September (*Sextidi*), "Jour de la Révolution," was added. This variation of dates has led to considerable confusion, but those who may wish to trace the fourteen years will find some very elaborate tables in the English edition of Bourrienne's "Life of Napoleon": Bentley.

The Stellar System.

FAR beyond the confines of the Solar System we come to the Stars, apparently scattered about without any particular plan. We note also that "one star differeth from another star in glory."

THE CONSTELLATIONS.

In early times the stars were grouped into constellations, named after a fanciful resemblance to some animal or mythological personage, the individual stars in the group being distinguished by the letters of the Greek alphabet, in order of brightness, so that α Orionis was meant for the brightest star in that constellation, β for the next brightest, and so on. As by the help of the telescope more stars were observed, it was not possible to continue this method. At the present time the numbers of the stars in the various catalogues are generally used to identify particular stars. In England some eight thousand stars are visible to the naked eye. The number visible in the whole heavens is about fourteen thousand. This includes stars down to the sixth order of magnitude—the faintest stars thus visible. For stars below the sixth magnitude a telescope would be required, and with every increase in their power the number of stars is enormously multiplied. Since the introduction of photography still more have become known, till the number becomes almost beyond counting.

An object, viewed in the field of a telescope, which is so faint as to be seen only with difficulty, cannot be held long under inspection in consequence of the fatigue of the optic nerve; but the photographic film feels no such fatigue, and exposures can be prolonged till an image is formed, for hours if need be. In this way a great number of objects have been indirectly observed which in all probability no human eyes will ever directly see. The most superficial observer of the stars must have noticed that they describe circles about the pole, and that at any place, a star whose distance from the pole is less than the complement of the latitude will be a circumpolar star, and never set to that place.

VARIABLE STARS.

Although the stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of stars, is one situated in the constellation Cetus, and known by the name of o Ceti, or Mira Ceti. It has a period of nearly 331·6 days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. The next maximum in the light of the star will probably occur in January, 1916. It will be found in R.A. *2h. 15m. 6s.* and South Declination 3° 22′.

Another remarkable variable star is Algol, β Persei. This has a very short period—not quite three days—and has a range of magnitude from 2·2 to 3·7. On page 84 will be found the times of minima of this star throughout the year. In R.A. *3h. 2m. 42s.*, Declination 40° 38′ N.

U Ophiuchi varies from the 6th to the 6¾ magnitude, with a period of *20h. 8m.* It may be observed in June, southing about midnight on the 9th. Will be found in R.A. *17h. 12m. 16s.* and North Declination 1° 19′.

The variable star β Lyræ is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this star—that, although the two maxima are equal, the minima are unequal. It is situated in R.A. *18h. 46m. 59s.* and North Declination 33° 16′. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this star.

The star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5⅓ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R.A. *22h. 26m. 3s.* and North Declination 57° 59′. August and September are the best months in which to observe it.

FIXED STARS.

Many of the so-called fixed stars are gradually changing their position in space and are said to have a proper motion, part of which is due to the motion of our star, the Sun, moving with all the planets, through space, towards a point in the constellation Hercules. There are also many cases among the stars of binary systems, where we find two stars close together, one of which describes an orbit round the other; these appear as one star to the naked eye, being too near together to be distinguished apart, some so close as to be hardly separated from the rays of the larger star. The orbital periods of many of these have been well determined. The distance from the Earth to the nearest star is so great that it can only be referred to in terms of the velocity of light, which in round numbers amounts to 186,000 miles per second; moving with this enormous velocity it would require four years and four months for the light of the nearest star to reach the Earth, so that we see the star as it was that much earlier.

STAR CLUSTERS AND NEBULÆ.

Among the other apparently solitary stars we may notice groups of stars gathered close together, sometimes easily separable into individual stars, others that can only be separated in the most powerful telescopes, and some that appear as unresolvable patches of light; these last are called nebulæ, and appear to consist, in some instances, of an incandescent gas, according to the evidence of the spectroscope. Of the more interesting of these mention will be found at the foot of the last page of each month in the Almanack.

COLOURED STARS.

It will be noticed that among the stars some differ from others in colour, and in the case of some of the binary stars the contrast in the colours is very marked. White stars are at a very high temperature; yellow stars at a lower temperature—our Sun belonging to this class; while in red stars the temperature is so low as to show a spectrum with broad absorption bands. Temporary stars, as they are called, sometimes burst suddenly into view, and after a time become visible as very faint stars, or disappear altogether. As our Sun is in the second class as regards temperature we may suppose that he has passed his meridian, and may perhaps, after many ages, become a dark and burnt-out sun.

The changes in some of the variable stars lead to the idea that there are dark bodies in the universe, and that their interposition between us and the bright star will account for the variability observed. As our Sun has his family of planets, we might imagine that the other suns are similarly provided, and may go on to speculate whether or no they are inhabited, and what sort of creatures they may be. There will be no harm in any amount of speculation, but we are never likely to be able to prove our speculations true.

CLOCK STARS.

Certain of the stars, whose places have been determined with the greatest accuracy, and technically known as Clock Stars, are used in determining the error of the Astronomical or Observatory Clock, which should show *0h. 0m. 0s.* when the great circle passing through the vernal equinox is on the meridian, and as the Right Ascension of a star or planet is the arc measured along the equator from this point it may be called the sidereal time of southing. The observed sidereal time of a star's southing by the clock, compared with the star's Right Ascension on pp. 82 and 83, will give the error of the clock on sidereal time.

The Mean Right Ascension for any other year may be found from this table by multiplying the annual precession by the number of years elapsed, and applying the result to the quantities given in the table. If the required date be earlier than 1916 the signs of the annual variations must be changed. In applying the precession to the declinations it must be borne in mind that N. Declination means +, and S. Declination −, and that the corrections must be applied algebraically.

Besides these Clock Stars, the Sun can also be used to ascertain the error of the clock—by observing its passage over the meridian, as in the case of the stars, or by showing equal altitudes on each side of the meridian. For all practical purposes this would probably be a sufficiently accurate method, but in observatories where calculations are made to determine the places of the Sun, Moon, and planets for comparison with their places deduced from the tables, clock errors obtained from the Sun would fail to give them with that accuracy which is possible from observation of the stars. Occasionally, during long spells of cloudy weather, when no star observations have been made, an observation of the Sun will be used for the service of the time ball at Greenwich, but only on such occasions, the stars being always used when available. Not only is an observation of the Sun less easily taken, but the solar tables are to some extent affected with errors, which, though very small, would render the clock errors to that extent unsatisfactory.

MAGNETIC ELEMENTS.

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
	° ′		° ′
1898	16 39·0	·1839	67 12·0
1899	16 34·2	·1844	67 10·2
1900	16 29·0	·1846	67 8·5
1901	16 26·0	·1850	67 6·1
1902	16 22·8	·1852	67 3·4
1903	16 19·1	·1852	67 0·9
1904	16 15·0	·1854	66 57·2
1905	16 9·9	·1854	66 55·9
1906	16 3·0	·1854	66 55·17
1907	15 59·8	·1855	66 56·0
1908	15 53·5	·1856	66 56·3
1909	15 47·6	·1855	66 53·57
1910	15 41·2	·1855	66 52·37
1911	15 33·0	·1855	66 52·1
1912	15 24·3	·1855	66 51·8
1913	15 15·2	·1853	66 50·5
1914	15 6·3	·1852	66 51·2

The diurnal variation of the magnetic declination at Greenwich is about 12′ in summer and 7′ in winter. The needle occupies its mean position about *10h.* a.m., and again about *6h.* p.m., throughout the year. It reaches its most westerly position about *2h.* p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking, coincident with the passage of great outbursts of Sun-spots across the Sun's central meridian.

SIGNS OF THE ZODIAC.

♈ *Aries*, the Ram; ♉ *Taurus*, the Bull; ♊ *Gemini*, the Twins; ♋ *Cancer*, the Crab; ♌ *Leo*, the Lion; ♍ *Virgo*, the Virgin; ♎ *Libra*, the Balance; ♏ *Scorpio*, the Scorpion; ♐ *Sagittarius*, the Archer; ♑ *Capricornus*, the Goat; ♒ *Aquarius*, the Water-Bearer; ♓ *Pisces*, the Fishes.

AN INCH OF RAIN.

THE statistics concerning rainfall are expressed in "inches," and are based upon observations recorded at the Royal Observatory, Greenwich. The expression "an inch of rain" refers to the marks upon a standard rain-gauge, the amount of rain equivalent to the distance between two such marks being represented by nearly 101 tons over an acre of land, as follows:—

An inch of rain on the surface of an imperial acre = 43,560 sq. feet = 3,630 cubic feet = 100·993 tons.

The Weather.

THE question is often put by friends who may suppose us to be more weather-wise than themselves: "Is it going to rain?" &c.—a question which cannot always be answered positively, yes or no, yet which any fairly observant person may answer for himself by paying attention to certain premonitory signs which may be observed.

For instance, beasts and birds, being generally more sensitive to climatic changes than are human beings, afford rough indications of coming bad weather. Sea birds, as stormy weather comes on, fly inland in search of food; wild-fowl leave the marshy ground for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees, and in hill countries come down to the plains at the approach of bad weather.

The indications of the barometer, taken in conjunction with those of the thermometer, help us much in prognosticating changes in the weather. The former is not, as some folks imagine, simply a weather indicator, though it serves this purpose inferentially. From the indications of these instruments we learn generally that:—

A *rising barometer* usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been *about* its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A *rapid rise* generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A *rapid and considerable fall* signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

The north-east wind tends to *raise* the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

The state of the atmosphere also affords pretty accurate indications of the kind of weather that may be expected in the near future.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is, when the first signs of the dawn appear on the horizon), all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions:—Soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

GREENWICH OBSERVATORY.

John Flamsteed (a *protégé* of Sir Jonas Moore, the mathematician, and of Sir Christopher Wren, the architect) was appointed "Astronomical Observator" by Charles II., the royal warrant being dated 4 March, 1675. A building was hastily run up on the summit of a hill in Greenwich Park from the designs of Wren at the cost of £520, realised in those impecunious times by the sale of some spoilt gunpowder.

SCIENTIFIC CHRONOLOGY is not yet a hundred years old, and in so far as it deals with the age of the world in which we live, it may be said to have its origin in the researches of geologists and ethnologists in the nineteenth century. These researches led to the discovery of extinct mammals buried under a surface which was calculated by geologists to have required many thousands of years in formation. The geological measure of time is the period occupied in the stratification of rocks, with allowances for intervals between the periods. By this measure the conjectural age of the World varies from 40 to 100 million years.

Geological Chronology.—The periods of stratification of the Earth's crust are classified by geologists as shown in the following list, each period having sub-divisions :—

I. EOZOIC.
II. PALÆOZOIC or PRIMARY
  i. *Cambrian.*
  ii. *Silurian.*
  iii. *Devonian* or *Old Red Sandston*
  iv. *Carboniferous.*
  v. *Permian.*
III. MEZOZOIC or SECONDARY.
  i. *Triassic.*
  ii. *Jurassic.*
  iii. *Lower Cretaceous.*
  iv. *Upper Cretaceous.*
IV CAINOZOIC or TERTIARY.
  i. *Eocene.*
  ii. *Oligocene.*
  iii. *Miocene.*
  iv. *Pliocene.*
V. QUATERNARY or POST-TERTIARY.
  i. *Pleistocene* or *Glacial.*
  ii. *Recent* or *Post-Glacial.*

No dates are assigned to these periods, as they are too indefinite and remote for comprehension. Traces of human life are found in V. i. and ii., which correspond with the Eolithic, Palæolithic, Neolithic, Bronze, and Iron Ages of our next paragraph.

Ethnological Periods.—The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods, not of time, but of culture, and are of local application only. The terms in use are :—

1. Eolithic, or Dawn of the Stone Age.
2. Palæolithic, or Older Stone Age.
3. Neolithic, or Later Stone Age.
4. Bronze Age.
5. Early Iron Age.

Of these periods the last three can be dated for Europe as follows :—

Neolithic ends about 2000 B.C.
Bronze Age ends about 1000 to 500 B.C.
Early Iron Age from about 500 B.C.

Various systems of Chronology are dealt with in alphabetical sequence in the following list :—

Abyssinian. — The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D.

Armenian. — The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Assyrian or Babylonian.—In the eighth century B.C. the Babylonians commenced a chronology with the era of the founder of their Empire. Their epoch corresponds to 20th February, 747 B.C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century James Ussher, Archbishop of Armagh, adopted the system, and *Ussher's Notation* was thenceforward printed in marginal notes to the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Chinese.—In 1913 the Chinese Republic adopted the calendar of Western Europe.

Christian.—The Christian year was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*) and A.D. (*Annus Domini*). The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, and the 4714th year of the Julian Period. The Christian Era commenced originally on 25th March, but in England Christmas Day was adopted as the beginning of the year from the seventh to twelfth centuries, after which time the Annunciation (25th March) prevailed until January 1 was adopted at the reform of the calendar in 1752. The reform of 1752 (*see also* "Roman Chronology" below) omitted 11 days from the year in order to connect the civil and astronomical years, and thenceforward the *New Style* was adopted, the previous period being known as the *Old Style*. Through the omission of the extra day in 1800 and 1900 (which were not leap years) the difference between the Old and New Styles is now 13 days. The Eastern Church employs the Old Style, and a Greek and Russian calendar for 1916 will be found on p. 97.

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyu-ga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1916 A.D. is, therefore, the year 1973 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1916 A.D. is 1838 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Jewish. — In the fifteenth century the Jews adopted as their epoch the Creation of the World, which was placed in a year called in the Christian chronology 3760 B.C. Thus the year 1916 A.D. is *Annus Mundi* 5677 in the Jewish Calendar. A calendar for 5676–5677 will be found on p. 97.

Julian Period.—"A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting

of the product of the number of years in the solar and lunar cycles and the cycle of the indiction ($28 \times 19 \times 15$)."—*New English Dictionary.*

Macedonian.—The epoch was the occupation of Babylon by Seleucus Nicator in 311 B.C., and this system of chronology prevailed in all Greek countries until the Middle Ages, and was adopted by the Jews until the fifteenth century. It is extant among certain nomadic Arab tribes.

Muhammadan.—The Muhammadan Epoch is the Hejira, or Flight of Mahomet, from Mecca to Medina in 622 A.D. The first day of the first month of the Muhammadan Era corresponds to 16th July, 622 A.D. The year 1916 is therefore 1334–1335 of the Hejira, a calendar for which year will be found on p. 97.

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 10th June, 632 A.D. The year 1916 is, therefore, 1285 of the Parsees.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which they signified by the abbreviation A.U.C., *Ab* (anno) *Urbis Conditæ* (From the year of the founded city). This epoch is believed to fall in the year 753 B.C. The Calendar as we know it was a Roman institution; it was revised and reformed in 46 B.C. by Julius Cæsar, and remained unchanged in Western Europe until the year 1752 A.D. The Julian year contained 365¼ days, so that of every four years three were *Common Years* of 365 days and the fourth a *Leap Year* of 366 days. But this system made the civil year longer than the astronomical year, the difference being 3 days in 400 years, so that in the year 1752 A.D. there was an error of 11 days. Under the reformed scheme 3 leap years are omitted in each 400 years, and the years 1800 and 1900 each consisted of 365 days only. The year 2000 will be a leap year, the next subsequent end-century leap year being 2400.

CHRONOLOGICAL TERMS EXPLAINED.

Golden Number, so called from its importance in calculating the date of Easter, is the number of any year in a lunar cycle of nineteen years. It contains (approximately) 235 lunations, in which period the Moon returns to the same apparent position with regard to the Sun, so that new and full Moons occur at the same dates in the corresponding year of each cycle.

Easter Day is the first Sunday after the *Paschal Full Moon* (*i.e.*, the full moon which happens upon, or next after, March 21; if that full moon occurs on a Sunday, Easter Day is the Sunday after).

Epact.—The age of the Moon at the commencement of the year, thus indicating the difference between the solar and lunar cycles.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the first seven letters of the alphabet, A–G, which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

ASTRONOMICAL TERMS EXPLAINED.

The time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time as shown by the Sun.

N. North; S. South; E. East; W. West.

h. hours; m. minutes of time; s. seconds of time; ° deg. of arc, or thermometer; ′ minutes of arc; ″ seconds of arc.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds—the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from a spectator on the Earth, certain of the Fixed Stars, and occasionally one or other of the Planets; these occurrences are called *Occultations*. Among the "Celestial Phenomena," on the third page of each month, are given the dates at which certain of these Occultations take place, with reference to the pages where details of each occurrence may be found. The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versâ* when viewed through an inverting or astronomical telescope. Stars to the sixth magnitude inclusive have been included in this summary.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

JEWISH CALENDAR. (A.M. 5676 and part of A.M. 5677.)

A.M. 5676.	A.D. 1915.	
Tishri 1	Sept. 9	Rosh Hashanah (New Year).

* Peculiar to Russia.

JULIAN CALENDAR.

In the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year—which, with the Romans, began with March—were called Quintilis and Sextilis; afterwards they were named in honour of the emperors Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undevicesimum Kal. Jan.*), Dec. 13th being *Idibus Decembribus*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

Standard, or Zone, Time.

By *Standard Time* is meant that the hour of each 15° of longitude becomes the local mean time for the zone or belt extending 7½° on each side of the central meridian, though in practice the zone has to be adapted to local circumstances, and so cannot conform to the exact line or meridian, but is arranged to suit boundaries of States or Provinces as may be most convenient. By way of illustration, it may be noted that in the Province of Ontario, Canada, by Act of the Legislature, the hour of 75° W is Standard Time for the Province as far as 87° W., and that the S.W. point, 83° W., extends westerly beyond the eastern part of the State of Michigan, where the time of 90° W is used, so at Windsor, Ontario, it is noon while in Michigan—mode to the east—it is 11 A.M. The *Standard Time* as used in the chief cities of Canada and the United States may be noted: at Quebec, Montreal and Toronto, at Boston, New York and Washington, the time of 75° W., five hours earlier than Greenwich, is used; at Winnipeg in Manitoba, and at Detroit, Chicago and New Orleans, the time of 90°, six hours earlier than Greenwich, is used; at Regina and Denver it is the time of 105°, seven hours earlier than Greenwich; and in British Columbia and at San Francisco the time of 120° W., eight hours earlier than Greenwich, is used; and when 180° is reached another day begins in Eastern Siberia, at the Fiji Islands, and a little to the east of New Zealand.

The same rule applies to places east of Greenwich, where noon is earlier than at Greenwich according to the longitude. When noon at Greenwich it is 2 P.M. in Egypt and South Africa; it is 5½ P.M. in India, 82½° E.; in Japan and Korea, 135° E., it is 9 P.M.; and in Eastern Australia, 150° E., it is 10 P.M.

STANDARD, OR ZONE, TIME.

Country.	Central Meridian.	Fast or Slow on Greenwich Time.
Belgium, Faroes, France, Gibraltar, Portugal, Spain	(Greenwich Time.)	
Mid-Europe	15° E.	1*h.* fast.
East Europe, British S. Africa, Egypt	30° E.	2*h.* fast.
Mauritius, &c.	60° E.	4*h.* fast.
Chagos Archipel...	75° E.	5*h.* fast.
India	82½° E.	5½*h.* fast.
Calcutta	90° E.	6*h.* fast.
Burma	97½° E.	6½*h.* fast.
Straits Settlemts.	105° E.	7*h.* fast.
Hong Kong, Borneo, West Australia...	120° E.	8*h.* fast.
Japan and Korea	135° E.	9*h.* fast.
South Australia	142½° E.	9½*h.* fast.
Victoria, New South Wales, Queensland, Tasmania	150° E.	10*h.* fast.
New Zealand	172½° E.	11½*h.* fast.
Iceland, Sierra Leone	15° W.	1*h.* slow.
America—		
Atlantic	60° W.	4*h.* slow.
Eastern	75° W.	5*h.* slow.
Central	90° W.	6*h.* slow.
Mountain	105° W.	7*h.* slow.
Pacific	120° W.	8*h.* slow.
Brazil	30° W.	2*h.* slow.
	45° W.	3*h.* slow.
	60° W.	4*h.* slow.
	75° W.	5*h.* slow.
Yukon	135° W.	9*h.* slow.
Sandwich Islands	157½° W.	10½*h.* slow.
Samoa	172½° W.	11½*h.* slow.

TWELVE O'CLOCK NOON GREENWICH MEAN TIME,

AS COMPARED WITH THE CLOCK IN THE FOLLOWING PLACES.

(In other words, the longitude in time.)

	H. M.		H. M.		H. M.		H. M.

Cape Town	1 14 P.M.	Madrid	11 45 A.M.	Port Moresby	10 4 P.M.	Vancouver	3 38 A.M.
Chicago, Ill.	6 10 A.M.	Malta	0 58 P.M.	Prague	0 58 P.M.	Vienna	1 5 P.M.

For convenience in practice, the arbitrary arrangement called *Standard Time*, described above, has been adopted generally throughout the world.

ALMANACK.—A word derived from the Arabic article *al*, and *manah*, to count. It is not precisely known when almanacs first appeared in Europe; the oldest copies in existence belong to the 14th century, and appear to have been in MS. only. The first printed almanac was composed about 1475. Originally intended as a table or calendar of the divisions of the year, notices concerning Fairs, with certain astronomical predictions, they came afterwards to contain astrological predictions of coming events, weather warnings, and many other absurdities. Nostradamus is said to have foretold, among other events, the execution of Charles I. of England, the Great Fire of London, and the Restoration in 1660. The prognostications at this time were filled with an immense amount of quackery and superstition, which has not yet quite died out, though among all intelligent people they are looked upon rather as affording amusement than matter for serious consideration.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926 English miles, and at the Poles 7,899 English miles. The Equatorial *Circumference* is 24,872·4 English miles, divided into 360 Degrees of Longitude, each of 69·09 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	400,000,000
Asia	17,000,000	900,000,000
Africa	11,500,000	170,000,000
North America...	8,000,000	110,000,000
South America ...	6,800,000	35,000,000
Oceania	3,450,000	8,000,000
Polar Regions ...	5,000,000	...
	55,500,000	1,623,000,000

The British Empire extends over the largest area (13,123,000 sq. miles); Russia is the second largest Empire (8,400,000 sq. miles); France is third, with 4,330,000 sq. miles; China extends over 4,300,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows :—

Division.	Area.	Estimated Number.
Mongolian ...	Asia	655,000,000
Caucasian ...	Europe & Orient	645,000,000
Negro.....	Africa	170,000,000
Semitic	North Africa ...	80,000,000
Malayan	Australasia	50,000,000
Red Indian ...	America	23,000,000
		1,623,000,000

* The Earth is a *Sphere*, with a Northern and Southern *Hemisphere*; the Ocean surface is called the *Hydrosphere*, and the gaseous envelope the *Atmosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*. The study of the Races of Mankind is *Ethnology*, and of their location *Ethnography*. The study of extinct organic life is *Palæontology*, and of existing life *Biology*.

If an airship, with a constant speed of 50 miles an hour, started from the Earth on a journey to the Sun on January 1, 1916, it would be nearly 210 years on the journey, as it would not arrive until Nov. 23, 2125! The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,872·4 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,000 miles an hour (520,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2100, at the present rate of increase.

THE LARGEST CITIES.

The following 48 cities have an ascertained population exceeding half a million, according to the latest census returns :—

New York (Greater), U.S.A. (1914) (estimated)	7,300,000
LONDON (Greater), England (1911) ...	7,251,358
PARIS, France (1911)	2,888,000
TOKYO, Japan (1908)	2,186,000
Chicago, U.S.A. (1910)	2,185,000
BERLIN, Prussia 1910)	2,071,000
VIENNA, Austria (1910).....	2,031,000
PETROGRAD, Russia (1910)	1,908,000
Philadelphia, U.S.A. (1910)	1,550,000
Moscow, Russia (1909)	1,481,000
Osaka, Japan (1908).....	1,227,000
RIO DE JANEIRO, Brazil (1910)	1,130,000
BUENOS AIRES, Argentina (1905)	1,026,000
Calcutta, India (1911)	1,222,000
Bombay, India (1911).....	980,000
Hamburg, Germany (1910)	931,000
BUDAPEST, Hungary (1910)	880,000
Birmingham, England (1911)	840,000
Glasgow, Scotlan (d1911)	785,000
WARSAW, Poland (1909)	781,000
Liverpool, England (1911).....	748,000
Naples, Italy (1911)	723,000
Manchester, England (1911)	716,000
St. Louis, U.S.A. (1910).....	687,000
Boston, U.S.A. (1910).....	671,000
CAIRO, Egypt (1907)	654,000
SYDNEY, New South Wales (1911).....	641,000
BANGKOK, Siam (1909)	630,000
Milan, Italy (1911)	599,000
MADRID, Spain (1910).....	598,000
Munich, Bavaria (1910).....	596,000
MELBOURNE, Victoria (1911)	594,000
Leipsic, Saxony (1910)	590,090
Barcelona, Spain (1910).....	587,000
Amsterdam, Netherlands (1909).....	568,000
Cleveland, U.S.A. (1910)	561,000
COPENHAGEN, Denmark (1911)	559,000
Baltimore, U.S.A. (1910)	558,000
Marseilles, France (1911)	551,000
DRESDEN, Saxony (1910)	548,000
ROME, Italy (1911)	539,000
Pittsburgh, U.S.A. (1910).....	534,000
Birmingham, England (1911)	526,000
Lyons, France (1911)	524,000
Madras, India (1911)	520,000
Cologne, Prussia (1910)	517,000
Breslau, Prussia (1910)	512,000
Hyderabad, India (1911)	500,000

Estimated Populations.

Canton (China)	1,250,000
PEKING (China).....	1,000,000
CONSTANTINOPLE (Turkey)	1,000,000
Hankow (China)	900,000
Tientsin (China)	850,000
Shanghai (China)	700,000
Montreal (Canada)	650,000
Fuchow (China).....	650,000
Chungking (China)	600,000
Suchow (China).....	500,000

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each :—

Name.	Area of Basin (sq. miles).	Greatest Depth (feet).
Oceans.		
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200
Seas.		
Malay	3,137,000	Kei Trench, 21,342
Central American	1,770,170	Caribbean, 20,568
Mediterranean	1,145,000	*Pola* Deep, 12,276
Behring	878,000	Buldir Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	*about* 10,500
Hudson Bay	472,000	*about* 1,500
Japan	405,000	*about* 10,200
Andaman	305,000	*about* 11,000
North Sea	221,000	Skaggerak, 1,998
Red Sea	178,000	20° N., 7,254
Baltic	158,000	*about* 12,000

THE HIGHEST MOUNTAINS.

Name.	Range.	Height in Feet.
Everest	Himalayas	29,002
Godwin-Austen (K 2)	,,	28,250
Kanchanganga I.	,,	28,146
,, II.	,,	27,803
Makalu	,,	27,790
Tengri Khan	Thian Shan	24,000
Chumalhari	Himalayas	23,944
Aconagua	Andes	22,868
*Sahama	Bolivia	22,349
Illampa (Sorata)	Andes	21,490
Illimani	,,	21,031
Chimborazo	,,	20,498
Lullaillaco	,,	20,243
Ruwenzori	Uganda	20,000
*Cotopaxi	Andes	19,612
Kilmia Njaro	German E. Africa	19,600
Mount Logan	Rockies	19,539
Licancaur	Andes	19,521
*Mount Elias	Rockies	19,500
Elburg	Caucasus	18,526
Demavend	,,	18,464
Tolima	Cordilleras	18,320
El Potra	Andes	18,045
Charles Louis	New Guinea	18,000
*Popocatepetl	Mexico	17,540
Maipo	Andes	17,421
Citlaltepetl	Mexico	17,360
*Sangay	Ecuador	17,124
Koshtan Tau	Caucasus	17,096
Ararat	Armenia	16,916
Kazbek	Caucasus	16,546
Mont Blanc	Alps	15,781

* *Volcanoes.* In addition to those marked, Vesuvius, Etna and Stromboli in Europe, Erebus and Terror in the Antarctic, Hecla and Skaptar Jokul in Iceland, Mauna Loa, Kea and Hualalai in Hawaii, Tomboro in Japan, and Le Souffrier and La Pelée in the West Indies.

THE LARGEST ISLANDS.

Name of Island.	Ocean.	Area in Sq. Miles.
Greenland (Danish)	Arctic	827,300
New Guinea (Br.-Germ.-Neth.)	Pacific	330,000
Borneo (Anglo-Netherlands)	,,	280,000
Baffin Land (British)	Arctic	236,000
Madagascar (French)	Indian	228,000
Sumatra (Netherlands)	,,	160,000
Great Britain	Atlantic	88,603
Honshiu (Japan)	Pacific	87,500
Celébes (Netherlands)	Indian	72,000
Prince Albert, &c. (British)	Arctic	60,000
South Island, N.Z. (British)	Pacific	58,500
Java (Netherlands)	Indian	48,400
North Island, N.Z. (British)	Pacific	44,500
Cuba (Independent)	Atlantic	44,000
Luzon (U.S.A.)	Pacific	41,000
Newfoundland (British)	Atlantic	40,200

Ellesmere (British)	Arctic	40,000
Mindanao (U.S.A.)	Pacific	37,000
Hokkaido (Japan)	,,	36,500
Ireland (U.K.)	Atlantic	32,600
Novaya Zemlya (Russian)	Arctic	30,000
Sakhalin (Russo-Japanese)	Pacific	29,100
Haiti (Independent)	Atlantic	28,200
Tasmania (British)	Pacific	26,215
Ceylon (British)	Indian	25,400
Banks (British)	Arctic	25,000
North Devon (British)	,,	24,000
Vancouver (British)	Pacific	20,000
Melville Land (British)	Arctic	20,000
Tierra del Fuego (Argentine)	Atlantic	18,500
Southampton (British)	Arctic	17,800
West Spitzbergen (No Man's Land)	,,	15,260
Prince of Wales (British)	,,	15,000
Formosa (Japanese)	Pacific	13,500
North Somerset (British)	Arctic	12,000
Sicily (Italian)	Medit.	10,000

THE LONGEST RIVERS.†

River.	Outflow.	Length in Miles.
Amazon	Atlantic	4,000
Nile	Mediterranean	3,600
Yangtse	North Pacific	3,400
Yenisei	Arctic Sea	3,300
Mississippi	Gulf of Mexico	3,160
Missouri	Mississippi River	3,000
Congo	Atlantic	3,000
Lena	Arctic Sea	3,000
Niger	Gulf of Guinea	3,000
Obi	Arctic Sea	2,700
Hoangho	North Pacific	2,600
Amur	,, ,,	2,500
Volga	Caspian Sea	2,400
Mackenzie	Beaufort Sea	2,300
La Plata	South Atlantic	2,300
Yukon	Behring Sea	2,000
St. Lawrence	Gulf of St. Lawrence	1,800
Rio del Norte	Gulf of Mexico	1,800
Sao Francisco	Atlantic	1,800
Danube	Black Sea	1,725
Euphrates	Persian Gulf	1,700
Indus	Arabian Sea	1,700
Brahmaputra	Bay of Bengal	1,680
Zambesi	Moçambique	1,600
Ganges	Bay of Bengal	1,500
Mekong	China Sea	1,500
Amu Daria	Aral Sea	1,300
Ohio	Mississippi River	1,280

† The most famous river falls are *Niagara*, between the Provinces of Ontario and New York State, on the Niagara River; the *Victoria Falls* on the Zambesi River; and the series of falls on the Merced River in the *Yosemite Valley* in California.

SHIPPING OF THE WORLD.

In 1915 the various nations of the world possessed 24,508 ocean-going steam vessels of over 45,729,208 gross tons; and 6,202 sailing vessels of 3,532,561 net tons. More than 43 per cent. of this tonnage is under the British flag, the next largest owners being the United States, Germany, Norway, France, Japan, Italy, Netherlands, Sweden, and Russia. An article upon the *Mercantile Fleets of the World* occupies some 20 pages of the Supplement (*see* Table of Contents, p. 554). From June 30, 1914, to June 30, 1915, the total British mercantile tonnage increased by 229,019; that belonging to Germany had, during the same period, decreased by 753,269 tons.

THE GREATEST SEAPORTS.

	Entered Tons.	Cleared Tons.
New York (1914)	15,767,547	15,421,394

* Special Trade includes Imports retained for Home Consumption and Exports of Domestic Produce or Manufacture, and excludes Imports that are re-exported.
† General Trade includes the total value of Imports and the total value of Exports, and the combined total under these two headings is given where the value of the Special Trade cannot be definitely ascertained.

Merchant Shipping Owned in each Country.—(Extracted from "Lloyd's Register Book," 1915-1916.)

° Lloyd's Register Book does not include vessels trading on the Caspian Sea nor wooden vessels trading on the Great Lakes of North America.

† In the absence of satisfactory information the records of numerous small sailing vessels belonging chiefly to Greece, Turkey, Southern Russia, and the Netherlands' East Indies) have been omitted from the Register Book.

‡ Japanese sailing vessels are not recorded in Lloyd's Register Book.

The Nobel Prizes.

THE Nobel Prizes are awarded each year from the income of a fund bequeathed to trustees for distribution to those who have contributed most largely to the common good, and is divided into five shares, which are devoted to workers in the domains of (*a*) Physics, (*b*) Chemistry, (*c*) Medicine or Physiology, (*d*) Literature, and (*e*) the Preservation of Peace. The testator was the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec. 10, 1901. The awarding authorities are the Swedish Academy of Science—(*a*) Physics, (*b*) Chemistry; the Stockholm Faculty of Medicine—(*c*) Medicine or Physiology; the Swedish Academy of Literature—(*d*) Literature; and a committee of five persons elected by the Norwegian Storthing—(*e*) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from the Board of Directors of the Nobel Institute ("Nobelstiftelsens Styrelse"), Stockholm, Sweden.

LIST OF AWARDS (Value about £8,000 each).

YEAR.	(*a*) PHYSICS.	(*b*) CHEMISTRY.	(*c*) MEDICINE OR PHYSIOLOGY.	(*d*) LITERATURE.	(*e*) PEACE.

Welsh Sovereigns and Princes.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

Franklin Pierce	1853	Woodrow Wilson	1913

The Family of King George III.

GEORGE III., King of the United Kingdom of Great Britain and Ireland, was the eldest son of Frederick, Prince of Wales (eldest son of George II.), and of Princess Augusta (youngest daughter of Frederick, Duke of Saxe-Coburg-Gotha). His Majesty was *born* at Norfolk House, St. James's Square, June 4, 1738; *succeeded* to the Throne Oct. 25, 1760; *married* Princess Charlotte (daughter of Charles, Duke of Mecklenburg-Strelitz); and was *crowned* with her on Sept. 22, 1761. Early in his reign he showed symptoms of insanity, and after recovering from two serious attacks (1788 and 1804) his mind entirely gave way; many of his latter years were consequently passed in seclusion, and the government was carried on, from Feb. 5, 1811, until his death, by his eldest son George, under the title of *Prince Regent*. His Majesty *died* at Windsor, Jan. 29, 1820. Their Majesties had issue:—

1. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline (daughter of Charles, Duke of Brunswick-Wolfenbüttel), succeeded to the Throne as GEORGE IV., Jan 29, 1820, and died without surviving issue at Windsor, June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1763, married Princess Frederica (daughter of King Frederick William II. of Prussia), was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. William, *Duke of Clarence*, born Aug. 21, 1765; was Lord High Admiral of England; married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him; succeeded to the Throne as WILLIAM IV., June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Württemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov. 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov. 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenburg-Strelitz), succeeded as KING OF HANOVER June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov. 28, 1851.    H.R.H. Olav, *Crown Prince of Norway*, born July 2, 1903.

6. H.R.H. Prince ALEXANDER John Charles Albert, born April 6, died April 7, 1871.

ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the Civil List, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £156,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made the following recommendations, which were adopted by the House of Commons:—

Their Majesties' Privy Purse	£110,000
Salaries of Household	125,800
Expenses of Household	193,000
Works	20,000
Royal Bounty	13,200
Unappropriated	8,000
	£470,000

Queen Alexandra	£70,000
Princess Christian of Schleswig-Holstein	6,000
Princess Louise (Duchess of Argyll)	6,000
Duke of Connaught	25,000
Duchess of Edinburgh	6,000
Duchess of Albany	6,000
Princess Beatrice (Henry of Battenberg)	6,000
Duchess of Mecklenburg-Strelitz (*susp.*)	3,000
King Edward VII.'s Daughters	18,000

THE CROWN LANDS.

The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £89,000, and the net return to about £11,000.

In the year ended 31 March, 1914, the total Receipts by the Commissioners were £730,319, of which amount £614,284 was derived from Crown Rents, and £43,988 from the Mines. The Expenditure was £186,660, of which £124,470 represented the expenses of the Land Revenue, and £62,190 the Woods and Forests. The sum of £530,000 was paid to the Exchequer in 1913–1914, being a net sum from which no deductions have to be made for administration.

THE DUCHY OF LANCASTER.

Lancaster was erected into a Palatine Duchy by Edward III. for his son John of Gaunt in 1359, but in 1399 it became merged in the Crown through the accession of his son as Henry IV.

The Revenue of the Duchy of Lancaster was £29,000 in 1847, and amounted to £112,098 in the year ended 31 December, 1914. The contributory items are Rents and Profits of Courts, £61,254; Royalties and Dues, £36,250. Expenditure: £15,392, Outlay for the benefit of the Estate; £1,048, Restoration of Ancient Castles; £7,566, deducted under various Acts of Parliament; £6,553, Allowances, Donations, and Charities; £2,000, Salary of the Chancellor of the Duchy; and £7,421, Expenses of Management. The sum of £61,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

THE DUCHY OF CORNWALL.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1914, was £162,440, and was derived principally from Rents and Profits of Courts, £109,321; Annuity in lieu of Tin Coinage Duties, £16,217; and Dividends on Stock, £11,501. The Payments include £20,602, Outlay for the benefit of the Estate; £21,273, Deductions under various Acts; £7,302, Allowances, Donations, and Charities; and £12,041, Expenses of Management. The sum of £42,107 was paid on account of His Royal Highness the Prince of Wales.

The Royal Family of the United Kingdom.

His Most Excellent Majesty **George the Fifth,** by the Grace of God King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Defender of the Faith, Emperor of India; only surviving son of His late Majesty King Edward VII. and of Her Majesty Queen Alexandra; *born at Marlborough House*, June 3, 1865; *married* July 6, 1893, Her Serene Highness Princess Victoria Mary Augusta Louise Olga Pauline Claudine Agnes, *born* May 26, 1867 (Queen Mary), only daughter of Her Royal Highness the late Duchess and His Highness the late Duke of Teck; *succeeded* to the Throne May 6, 1910; *crowned* at Westminster Abbey, June 22, 1911. Their Majesties have issue:—

1. H.R.H. Edward Albert Christian George Andrew Patrick David, Prince of Wales and Earl of Chester, Duke of Cornwall (Duke of Rothesay, Prince of Saxe-Coburg and Gotha and Duke of Saxony, Earl of Carrick, Baron of Renfrew, Lord of the Isles and Great Steward of Scotland), K.G., a Lieutenant, R.N., and 2nd Lieutenant, Grenadier Guards, *born* June 23, 1894.
2. H.R.H. Albert Frederick Arthur George, a Midshipman, R.N., *born* Dec. 14, 1895.
3. H.R.H. Victoria Alexandra Alice Mary, *born* April 25, 1897.
4. H.R.H. Henry William Frederick Albert, *born* March 31, 1900.
5. H.R.H. George Edward Alexander Edmund, *born* Dec. 20, 1902.
6. H.R.H. John Charles Francis, *born* July 12, 1905.

His Majesty's Household.

Personal.

Surgeon Apothecary to Her Majesty and Apothecary to the Household, Frederick Stanley Hewett, M.D.
Laryngologist, Milsom Rees, C.V.O., F.R.C.S.Ed.
Bacteriologist, H. R. Spitta, M.V.O., M.D.
Clerks, T. G. Watson; R. H. Short.

HOUSEHOLD OF H.M. THE QUEEN OF NORWAY

(Princess Maud of Great Britain and Ireland).
Comptroller and Private Secretary, Col. Sir Henry Knollys, K.C.V.O.

IN a broad sense this heading is commonly taken as identical with the one that follows; but there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland only. But, as further explained below, there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

THE HOUSE OF LORDS,

the *Magnum Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 of the Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and of Representative Peers of Scotland and Ireland, together with such Scottish and Irish Peers as have also Imperial titles. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The *full* Assembly would consist of 3 Princes of the Blood Royal, 2 Archbishops, 21 Dukes, 26 Marquesses, 126 Earls, 45 Viscounts, 24 Bishops, 364 Barons, and 16 Scottish and 27 Irish Representative Peers: total 654. (Earl Curzon of Kedleston, one of the Irish Representative Peers, is included among the Earls.) See WHITAKER'S PEERAGE for complete table, showing numbers of Life Peers, Minors, &c. There are also 24 Ladies who are Peeresses in their own right, whose titles and names, along with those of Scotland, are given below at page 138. Female succession may occur in the Imperial Peerage in any Barony of England which was conferred by writ of summons; but it is subject to the rule of *abeyance* whenever there are more than one daughter, sister, &c., eligible to succeed. There are also a few cases in which "special remainders" have been granted to female relatives in the absence of males. We use the term "Imperial" as including the three series of Peers of "England" (up to June 20, 1707), "Great Britain" (thence till close of 1800), and "United Kingdom" (1801 onward).

SCOTTISH AND IRISH PEERS.

There are in all 86 Scottish Peers and 170 Irish, but of the total 256 there are 134 possessing Imperial titles and 122 without them. Of the 86 Scottish, 51 have Imperial titles and 16 are elected or re-elected every Parliament to sit in the Lords; and similarly of the 170 Irish 83 hold Imperial titles, and 28 are elected for life. Of the Imperial titles of the two kingdoms there are 77 which are inferior to the native ones, 29 are superior, 14 are identical in rank but differing in designation, and 14 are absolutely the same. Of the 5 Scottish Peeresses cited on page 138, that of Melfort is subject to a degree of doubt, so that the lady does not assume it. There are other lines in the Scottish Peerage which are open to female succession, and this is not subject to abeyance as in England. In the Irish Peerage, on the other hand, the only titles open to female succession are the Massereene Viscounty and the La Poer Barony, the latter now held by the Marquess of Waterford. It will be observed that Ireland possesses a great advantage over Scotland in the Lords as it does in the Commons, its native Peers who hold Imperial titles numbering, as just stated, 83 as against 51 of Scotland, and its elected Representative Peers 28 as against 16. An Irish Peer who holds no Imperial title has also the special privilege of being able to seek election to the Commons for any constituency not in Ireland itself.

Contractions.—*S.* or *I.* appended to the date of creation denotes a *Scottish* or *Irish* title; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to *S.* or *I.* implies that the Peer is an elected Representative to the House of Lords. For the mark ° see heading to Marquesses; *b.* signifies born; *s.*, succeeded; *m.*, married; *w.*, widower or widow; *div.*, divorced; *M.*, minor.

COMPLETE LIST OF THE PEERS.

PRINCES OF THE BLOOD ROYAL (3).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

		Eldest Son or Heir.
1910	Edward Albert Christian George Andrew Patrick David, Prince of Wales, Duke of Cornwall (1337) (*Scott. Duke, Rothesay*), K.G., *b.* 1894, *s.* 1910.	(None)

Members 5th Class of the Royal Victorian Order.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military, and other Esquires by Office.

Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.*

There are three Orders confined to Ladies: The Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Aldermen, Sheriff, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

* For fuller tables (and for *Scottish and Irish Precedency*) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 5s. net.

OFFICERS OF THE HOUSE OF COMMONS.—£53,149.

The Order of Merit—O.M.

INSTITUTED *26th June*, 1902.

Membership is of two kinds, Military and Civil, the former having crossed swords, and the latter oak-leaves, upon the badge. Membership of this Order confers no precedence, and is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and of the remaining Orders of Knighthood.

MILITARY MEMBERS.

Field-Marshal Earl Kitchener of Khartoum, K.G.
Admiral of the Fleet Rt. Hon. Sir Edward Hobart Seymour, G.C.B.
Admiral of the Fleet Lord Fisher, G.C.B.
Admiral of the Fleet Sir A. Knyvett Wilson, *V.C.*, G.C.B.
Fld.-Marshal Sir John Denton Pinkstone French, O.C.B.

CIVIL MEMBERS.

Viscount Morley of Blackburn.
Lord Rayleigh.
Earl of Cromer.
Viscount Bryce.
Professor Henry Jackson.
Sir William Crookes.
Thomas Hardy.
Sir George Otto Trevelyan, Bart.
Sir Edward Elgar.
Sir Joseph John Thomson.
Sir Archibald Geikie.
Viscount Haldane, K.T.

HONORARY MEMBERS.

Field-Marshal Prince Yamagata.
Field-Marshal Prince Oyama.
Admiral Count Togo.

Secretary and Registrar, Col. Hon. Sir Henry Charles Legge, K.C.V.O.

Sir Charles Wyndham Murray, C.B.; *Chancery* The Lord Chamberlain's Office.—G.C.B., Knight Grand Cross; K.C.B., Knight Commander; C.B., Companion—each marshalled (*m*) or (*c*) for Mil. or Civ. Division.

ORDER OF MERIT (1902)—O.M.

O.M.Civ.

This Order confers no precedence, but authorises the holders to place its designating initials next after those denoting membership of Grand Cross of the Order of the Bath. It is designed as a special distinction for men eminent in any department whatever—war, science, literature, or art—without in itself conferring a knighthood, though it happens that of the twelve originally appointed, all but one were either a Peer, Knight, or Privy Councillor. The Order is limited in numbers to 24, with the addition of foreign honorary members. *Secretary and Registrar, Col.* Sir Henry Charles Legge, K.C.V.O.

O.M.Mil.

G.C.V.O.

THE ROYAL VICTORIAN ORDER (1896).

K.C.V.O.

THE SOVEREIGN; *Chancellor*, The Lord Chamberlain; *Secretary*, The Keeper of His Majesty's Privy Purse.—G.C.V.O., Knight Grand Cross; K.C.V.O., Knight Commander; C.V.O., Commander; M.V.O., Member, marked 4th or 5th Class.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Bestowed in recognition of especial services of commissioned officers in the Navy and Army. The members are Companions only and rank immediately after the 4th Class of the Royal Victorian Order. The sequence of Companions, &c., is thus—C.V.O., C.B., C.S.I., C.M.G., C.I.E., M.V.O. 4th Class, D.S.O., I.S.O., M.V.O. 5th Class.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the SOVEREIGN, the Prince of Wales, and Companions (not exclusively male) to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian (100 European and 100 Native) and 250 to the services of Dominions, Colonies and Protectorates.

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Instituted in 1862, and enlarged in 1864, 1865, and 1880, but no fresh conferments are now made.

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1878.

THE ORDER OF ST. JOHN OF JERUSALEM.

The Order had its origin in Jerusalem and Acre, as an international lay confraternity for the relief of crusaders, and was later sovereign in Rhodes and in Malta, where its Knights kept galleys and galleons, to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 till 1798. The work of the British Order is the control of the St. John's Ambulance and Brigade, and of the British Ophthalmic Hospital, Jerusalem. *Sovereign Head and Patron*, H.M. King George V.; *Grand Prior*, H.R.H. Duke of Connaught, and a *Chapter* of about 350 knights of two degrees—"Knights of Justice" and "Knights of Grace." There are also "Ladies of Justice," "Ladies of Grace," and Esquires. These distinctions are notified in the *London Gazette*, but do not confer any rank or title.

THE VICTORIA CROSS (*V.C.*).

Instituted in 1856, on the close of the Crimean War. It was designed primarily for the rank and file and non-commissioned officers, but is held also by all grades up to Field-Marshals and Admirals of the Fleet, and was extended to civilians who had borne arms against the Indian mutineers. In 1911 the decoration was extended to native officers and men of the Indian Army. Conjoined with the decoration is a pension, for non-commissioned officers and men, of £10 a year, with an additional £5 for each bar.

THE MILITARY CROSS (1915)—M.C.

This decoration ranks immediately after the Victoria Cross, and is awarded to Captains, Lieutenants, and Warrant Officers in the Army and Indian and Colonial Forces.

THE DISTINGUISHED SERVICE CROSS—D.S.C.—Instituted in 1914, in substitution for the Conspicuous Service Cross, 1901; is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander.

THE DISTINGUISHED SERVICE MEDAL.—Established 1914; is designated for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A., and to all other persons holding corresponding positions in His Majesty's Service afloat, for distinguished conduct in war.

THE CONSPICUOUS GALLANTRY MEDAL.—Is bestowed upon warrant officers and men of the R.N.

THE DISTINGUISHED CONDUCT MEDAL — D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army

THE VOLUNTEER OFFICERS' DECORATION—V.D.—Was an honour for rewarding the meritorious services of officers of the force in question, who must have been in commission and have served twenty years.

THE TERRITORIAL DECORATION—T.D.—Established in 1908; is restricted to commissioned officers of twenty years' good service in the Territorial Force, and not holders of the Volunteer Decoration. Similarly, a TERRITORIAL LONG SERVICE MEDAL has been substituted for that formerly awarded to Volunteers.

THE ROYAL RED CROSS—R.R.C.—For ladies, founded 1883, is a distinction conferred upon ladies of any rank, even foreigners, who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

THE ORDER OF MERCY.—Both sexes; was established in 1899 in connection with the LEAGUE OF MERCY, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

THE INDIAN ORDER OF MERIT.—Instituted in 1837, as a reward for personal bravery, to native Indian officers and men.

THE KAISER-I-HIND MEDAL.—Was founded 1900, and is a reward for any person, of either sex, whatever who shall have rendered useful service in or for India.

THE NAVAL GENERAL SERVICE MEDAL (1915).—For officers and men of the R.N.; awarded for minor naval warlike operations where no other medal would be appropriate.

THE ALBERT MEDAL.—Dates from 1866, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever. "For Gallantry in Saving Life at Sea" or "on Land."

(EXCLUSIVE OF THOSE HOLDING HIGHER RANK AS PEERS OR BARONETS, *q.v.*)

Knights Bachelor.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*Principal*, Sir Henry Pellatt, Kt., C.V.O.; *Hon. Registrar*, Sir William Bull, Kt., M.P.; *Secretary*, Willoughby Bullock; *Registry and Library*, Clifford's Inn, E.C.

A List of the Gentlemen who have Received the Honour of Knighthood.

(Exclusive of such as have afterwards received the higher honour of K.C.B., *etc., q.v.)*

A'Beckett, Sir Thomas.
Acland, Sir R. B. Dyke, K.C.
Adam, Sir F. Forbes, C.I.E.
Adamson, Sir Wm., C.M.G.
Adcock, Sir Hugh, C.M.G.
Addis, Sir Chas. Stewart.
Adkins, Sir Ryland, M.P.
Adlard, Sir J. Ormiston, M.D
Aikins, Sir James A.M.
Aikman, Sir Robt. Smith.
Aitken, Sir Wm. Maxwell, M.P.
Alexander, Sir George.
Allan, Sir H. Montagu, C.V.O
Allen, *Col.* Sir Charles, V.D.
Allen, Sir Harry B., M.D.
Allison, Sir Robt. Andrew.
Allom, Sir Charles.
Ames, Sir Herbert Brown.
Anderson, Sir George.
Anderson, Sir John.
Anderson, Sir R. Rowand.
Anderson, Sir Wm. M. A., M.V.O. (4th).
Angers, Hon. Sir Auguste R.
Annier, Sir Theodore V. S.
Arbuthnot, Sir Geo. Gough.
Archambeault, Hon. Sir Horace.
Armstrong, Sir Charles H.
Armstrong, Sir Walter.
Arthur, Sir Allan.
Ascroft, Sir William.
Ashton, Sir Ralph P.
Aske, Sir Robt. Wm., LL.D.
Astbury, Hon. Sir Jn. Meir.
Atkin, Hon. Sir J. Richard.
Avory, Hon. Sir Horace E.
Ayling, Hon. Sir Wm. Bock.
Azopardi, Sir Vincenzo F., G.
Baddeley, Sir John James.
Bailey, Sir Rowland, C.B. (*c*), I.S.O., M.V.O.(5th).

The House of Commons.

THE second Parliament of King George V. was elected in December, 1910, and met on January 31, 1911. The General Election had returned 398 Ministerialists (272 Liberals; 42 Labour Members; 84 Nationalists) and 272 Opposition (Conservatives and Unionists), distributed as shown in the following table:—

	Distribution of Members.				Party Strength (Dec., 1910).

POLITICAL PARTIES AND ORGANISATIONS.

LIBERAL.—The *Liberal Central Association*, 21, Abingdon Street, Westminster, S.W., is the official organisation and headquarters of the Liberal Party. *Chairman*, J. W. Gulland, M.P.; *Hon. Sec.*, Sir Robert Hudson; *Treasurer*, Sir Jesse Herbert. The *National Liberal Federation*, 42, Parliament Street, Westminster, S.W., is a union of Liberal Associations in England and Wales. The *Liberal Publication Department*, 42, Parliament Street, under the combined auspices of the two above bodies, issues periodical literature and political magazines. *Home Counties Liberal Federation*, 42, Parliament Street, S.W.; the *London Liberal Federation*, 41, Parliament Street, S.W.; *Devon and Cornwall Liberal Federation*, Clarence Chambers, Tavistock Road, Plymouth; *Eastern Counties Liberal Federation*, Cumbergate, Peterborough; *Lancashire, Cheshire, and North-Western Liberal Federation*, 37, Cross Street, Manchester; *Midland Liberal Federation*, Newton Chambers, Cannon Street, Birmingham; *Northern Liberal Federation*, Pilgrim House, Pilgrim Street, Newcastle-on-Tyne; *Western Counties Liberal Federation*, 2, Bristol Bridge, Bristol; *Yorkshire Liberal Federation*, 38, Boar Lane, Leeds. Among other organisations, the *National Reform Union*, 50, Haworth's Buildings, Cross Street, Manchester, founded in 1864 for the advocacy of electoral reform and opposition to Protection, aims at inculcating Liberal principles by means of lectures and the distribution of literature; the *Eighty Club*, 3, Hare Court, Temple, E.C., was founded in 1880, and works on similar lines; *League of Young Liberals*, Dacre House, Victoria Street, S.W.; *Liberal Social Council*, 92, Victoria Street, S.W.; the *Women's Liberal Federation*, 72, Victoria Street, S.W.; and the *Women's National Liberal Association*, 138, Palace Chambers, Westminster, S.W. The *Scottish Liberal Association* is at 7, West George Street, Glasgow, and at 95, Princes Street, Edinburgh; the *Scottish Women's Liberal Association* is at the Glasgow office. The *Welsh National Liberal Council* is at 35, Charles Street, Cardiff.

UNIONIST.—The chief Unionist organisation is the *National Unionist Association of Conservative and Liberal Unionist Organisations*, St. Stephen's Chambers, Westminster, S.W.

The *National Unionist Association of Conservative and Liberal Unionist Organisations* is a federation of Conservative and Liberal Unionist Associations and Clubs in England and Wales. As constituted at present it consists of 34 Provincial Divisions, a Council of about 300 members, which meets quarterly, and a Conference, which meets annually. It also has Committees, which have the duties of strengthening, stimulating and creating electioneering organisation in the constituencies, publishing and distributing the whole of the Party literature for the education of the electorate, and providing and controlling the staff of speakers and lecturers. The *Scottish Unionist Association* is at 2, Frederick Street, Edinburgh. *National Conservative League*, 8, Lansdowne Road, East Croydon. The *Unionist Club of Canvassers: Secretary*, Nigel Bellairs, 14, Lexham Gardens, W. The *Primrose League*, 64, Victoria Street, S.W., founded in 1883, is an educating body, and aims at the Maintenance of Religion, of the Constitution, and of the Unity of the British Empire: *Grand Master*, Earl Curzon of Kedleston, G.C.S.I., G.C.I.E.; *Chancellor*, The Earl of Crawford and Balcarres; *Vice-Chancellor*, G. Arbuthnot; *President Ladies' Council*, Miss Balfour; *Registrar*, F. Willis; *Clerk of the Council*, R. Bennett; *Organising Sec.*, H. Crowe. *Junior Imperial League*, St. Stephen's Chambers, S.W.; *Sec.*, H. H. Cannell. The *United Club*, Mitre Court Chambers, Temple, E.C., supplies speakers for the Unionist cause. *Union Defence League*, 25, Victoria Street, S.W.

LABOUR.—The Labour Party in Parliament is composed of 39 members. *Acting Chairman*, Arthur Henderson; *Vice-Chairman*, James Parker; *Secretary*, Charles Duncan; *Whips*, J. Pointer, F. W. Goldstone, and James Parker. The organisation outside the House of Commons has offices at 28, Victoria Street, Westminster, S.W. *Secretary*, Arthur Henderson; *National Agent*, Arthur Peters. The Party is financed by contributions of 1d. per member per year from affiliated Trade Unions and Socialist organisations, &c. An Executive Committee conducts questions of elections, &c., endorses candidates selected by affiliated bodies, and contributes 25 per cent. of the Returning Officers' charges in all elections held under Party auspices. The *National Women's Labour League* is an organisation of women of Labour sympathies, and works in co-operation with the Labour Party. *Secretary*, Dr. Marion Phillips, 3, Lincoln's Inn Fields, London, W.C.

SOCIALISTS.—*British Socialist Party*, Chandos Hall, 21A, Maiden Lane, Charing Cross, W.C. *Secretary*, Albert Inkpin. *Independent Labour Party*, St. Bride's House, Salisbury Square, E.C.; *Gen. Sec.*, Francis Johnson. The *Fabian Society*, 3, Clement's Inn, Strand, W.C., preaches an intellectual Socialism to the middle classes. *The*

Anti-Socialist Union of Great Britain, 58, Victoria Street, S.W., is a central organisation to oppose Socialism.

IRISH PARTIES.—The *United Irish League* represents the Nationalist Party, and the Nationalist Whips are Capt. A. J. C. Donelan, Pat O'Brien, E. Haviland Burke, and J. P. Boland. *The All for Ireland League*, founded by W. O'Brien, M.P., aims at regaining a national parliament for Ireland with the universal consent of the English people, by bringing about a Conference of all political parties, British and Irish. The Irish Unionist Party is represented by the *Irish Unionist Alliance*, 109, Grafton Street, Dublin (*Sec.*, R. J. Herbert Shaw), and by the *Ulster Unionist Council*, Old Town Hall, Belfast (*Sec.*, R. Dawson Bates). *Irish Unionist Whip*, Sir J. B. Lonsdale, Bt., M.P.

FREE TRADE.—The *Free Trade Union*, 65, Victoria Street, S.W., was founded to resist a reactionary tariff policy and to safeguard the free import of food and raw material.

TARIFF REFORM.—The *Tariff Reform League*, 7, Victoria Street, Westminster, S.W., was founded in 1903, in furtherance of Mr. Chamberlain's proposals for the reform of the Fiscal System of the United Kingdom. *Sec.* (vacant).

*WOMEN'S SUFFRAGE.—The principal organisations for putting forward the claims of women to the Parliamentary franchise are the *National Union of Women's Suffrage Societies*, 14, Great Smith Street, Westminster, S.W., with over 450 affiliated societies and 35,000 members: the *London Society for Women's Suffrage*, 58, Victoria Street, S.W., is a society in the above Union, and has over 4,000 members; the *Women's Social and Political Union*, Lincoln's Inn House, Kingsway, W.C.; the *Women's Freedom League*, 1, Robert Street, Adelphi, W.C. (*Pres.*, Mrs. Despard; *Sec.*, Miss F. A. Underwood), which aims at securing for women a Parliamentary vote as it is or may be granted to men; the *Lancashire and Cheshire Women's Textile Workers' Representation Committee*, 5, John Dalton Street, Manchester; the *Women's Co-operative Guild*, 28, Church Row, Hampstead, N.W.; the *Northern Men's Federation for Women's Suffrage*, 6, Wellington Road, St. John's Wood, N.W. (*President*, Mrs. Arncliffe-Bennett). The *Conservative and Unionist Women's Franchise Association*, 48, Dover Street, W. (*Pres.*, The Countess of Selborne), aims at a qualified suffrage for women, and opposes universal suffrage of either sex. (Political work entirely suspended in favour of relief work during the war.) The offices of the *Women's Local Government Society* are 19, Tothill Street, S.W. *The National League for Opposing Women Suffrage*, 515, Caxton House, Tothill Street, Westminster, S.W. (*Presidents*, Earl Curzon of Kedleston, Lord Weardale), seeks to prevent the Parliamentary enfranchisement of women.

ELECTORAL REFORM.—*Proportional Representation Society*, *Sec.*, J. H. Humphreys, 179 St. Stephen's House, Westminster, S.W.

RESIGNATION OF MEMBERS OF PARLIAMENT.—No member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant and a writ issued.

PUBLIC PETITIONS.

EVERY Petition offered to be presented to the House must begin with the words "To the Honourable the Commons of the United Kingdom of Great Britain and Ireland, in Parliament Assembled"; or with words equivalent thereto.

Every Member presenting a Petition to the House must affix his name at the beginning thereof.

Every Petition must contain a prayer.

Every Petition must be written and not printed or lithographed.

Every Petition must be signed by at least one person on the skin or sheet on which the Petition is written.

If signatures are affixed to more than one sheet, the prayer of the Petition must be repeated at the head of each sheet; but on every sheet after the first, the prayer may be reproduced in print or by other mechanical process. (*Vide* the Terms of Reference to the Select Committee on Public Petitions.) Signatures upon sheets not so headed will not be counted. The "Prayer" signifies that part of the Petition which expresses the object of the Petitioners, as distinguished from formal parts.

Every person signing a Petition must write his address after his signature or his signature will not be counted.

Every Petition must be written in the English language, or be accompanied by a translation certified by the Member who shall present it.

Every Petition must be signed by the parties whose names are appended thereto by their names or marks, and by no one else except in case of incapacity by sickness.

No letters, affidavits, or other documents, may be attached to any Petition.

No erasures or interlineations may be made in any Petition.

No reference may be made to any Debate in Parliament.

No application may be made for any grant of public money, except with the consent of the Crown.

No application may be made for a charge upon the revenues of India, except with the consent of the Crown.

All Petitions, after they have been ordered to lie upon the Table, are referred to the Committee on Public Petitions, without any questions being put; but if any such Petition relate to any matter or subject with respect to which the Member presenting it has given notice of a Motion, and the said Petition has not been ordered to be printed by the Committee, such Member may, after notice given, move that such Petition be printed with the Votes.

A Member cannot present a Petition from himself. While it is quite competent to any honourable Member to petition the House, his Petition ought to be presented by another Member. But this Rule is not to be understood to extend to cases in which a Member shall present a Petition signed by him in his representative capacity as Chairman of a County Council or of any public incorporated body.

---

* All Political propaganda suspended during the War.

THE KING'S SPEECH.—A historic Session, devoted exclusively to the prosecution of the war, and marked by the substitution of a National Ministry for a Party Government, was opened by the King in person on *Nov.* 11. His Majesty, who was accompanied by the Queen, read his Speech from the Throne with grave emphasis, and its delivery made a great impression upon legislators, whose ranks were considerably depleted by the large number on active service. Declaring that the energies of the Empire were concentrated on the prosecution of the war to a victorious issue, His Majesty remarked that he had summoned Parliament in order that, "sharing, as I am aware you do, my conviction that this is a duty of paramount and supreme importance, you should take whatever steps are needed for its adequate discharge." After a reference to the entrance into the struggle of the Ottoman Empire, driven by "bad counsels and alien influences" into "a policy of wanton and defiant aggression," the King expressed appreciation and gratitude for the proofs which his Mussulman subjects had hastened to give of their loyal devotion and support. "My Navy and Army continue throughout the area of conflict," said His Majesty, "to maintain in full measure their glorious traditions. We watch and follow their steadfastness and valour with thankfulness and pride, and there is, throughout my Empire, a fixed determination to secure, at whatever sacrifice, the triumph of our arms and the vindication of our cause." The announcement was made that the only measures which would be submitted were such as seemed necessary for "the attainment of the great purpose upon which the efforts of the Empire are set." In the Lords, the Address in reply was moved by Field-Marshal Lord Methuen, representing the Army, and seconded by Lord Bryce, on behalf of diplomacy. In the absence of Lord Lansdowne, owing to illness, Earl Curzon, reviewing the situation, referred to the loyalty of the Muhammadans of India and the patriotism of General Botha, and declared that the Government would continue to receive the hearty co-operation of the Opposition in the prosecution of the war. After a brief debate the Address was agreed to. In the Commons, the Address was moved and seconded by Mr. Robert Price and Mr. Middlebrook. Assuring the Government that, while there ought to be criticism, there would be no partisan criticism, Mr. Bonar Law touched briefly upon various points; and the Prime Minister, after acknowledging the tone of the Opposition Leader's remarks, in reply said that the responsibility for the Antwerp Expedition belonged to the Government, and that the War Secretary was consulted and approved of what was done. He expressed agreement with the Opposition Leader's suggestion for an inquiry into the question of allowances and pensions. Some criticism of the Government's attitude towards the alien danger was expressed during a debate initiated by Mr. Joynson-Hicks. Mr. Bonar Law declared that the men who were likely to injure us were the best-educated and best class of alien enemies in this country. The Address was agreed to on *Nov.* 12 without a division.

THE PROSECUTION OF THE WAR.—On the motion of the Prime Minister, the House of Commons on *Nov.* 16 granted a vote of credit for £225,000,000, and an addition of 1,000,000 men to the regular army. Mr. Asquith said the greater part of the loan would be for the Army and Navy. The Government proposed to relieve the Oversea Dominions of the responsibility of raising loans, and to raise £30,250,000 for their benefit. The vote was intended to carry the country on to March 31. He added that we now had under arms a regular army of practically 1,100,000. In replying for the Opposition, Mr. Long urged improvement in the pay and allowances of officers; and two days later, at the instance of the Premier, a Committee was appointed to consider a scheme of pensions and grants for officers and men, and for their dependents. Rapid progress was made with a Bill to consolidate and amend the Defence of the Realm regulations; and before Parliament adjourned for Christmas, on *Nov.* 27, the Royal Assent was given to a measure giving the Admiralty and Army Council powers to take whatever steps they thought necessary in the interests of national safety, including the commandeering of factories. Shortly after the Commons reassembled, a debate on the increase in food prices took place, on *Feb.* 11. Agreeing that prices had grown considerably, Mr. Asquith said there was very little evidence of a diminution on any important scale in the country's consumption. The rise in the price of wheat was attributed to smaller supply and increased demand, and he thought wheat would be available in sufficient quantities after June. He declined to fix minimum prices. Mr. Bonar Law expressed the view that the Government should have bought a supply of wheat for the nation at the beginning of the war. A Labour amendment calling upon the Government to fix minimum prices and acquire the control of commodities subject to artificial influences was talked out. On *Feb.* 24 the Commons gave a second reading to a Bill to amend the Defence of the Realm Act, introduced by the Attorney-General, providing that British subjects arrested for offences under the Act should have the option of trial in a civil court instead of by a court-martial. There was little discussion on the measure, which was added to the Statute Book before the adjournment for Easter, on *March* 16. Speaking of the treatment of British prisoners in Germany, Mr. Asquith, on *April* 27, declared that when the war came to an end Great Britain would not forget "this horrible record of calculated cruelty and crime," and would exact reparation. In moving a further vote of credit for £250,000,000, the Prime Minister, on *June* 15, delivered an eloquent speech, calling upon the Empire to make whatever sacrifice was necessary for the conduct of the war. He anticipated that the vote would be spent during the succeeding few months at the rate of three millions a day. In the subsequent discussion, Mr. McKenna, the new Chancellor of the Exchequer, made a powerful plea for economy. Now, he urged, was the golden time for saving. Every pound saved now would be of vital use when peace came. The vote was agreed to. The Prime Minister asked for a third vote of credit—of £150,000,000—on *July* 20, bringing the total for the financial year to £650,000,000, or, since the outbreak of war, to £1,012,000,000. Mr. Asquith said the previous vote would probably last until the end of August, and he asked for the additional sum to make the position absolutely secure. The financial requirements of our Allies,

he said, might grow with the adherence to our cause of States which did not take part in the war in its earlier stages. Remarking that the limiting words "the Dominions and Protectorates and the Allied Powers" had been omitted from the vote, the Prime Minister said he was sure the House would not ask him to go into details, and that the Government ought to have a free hand in the matter. The vote was granted. Before Parliament adjourned, a Bill to suspend the work of annual registration and to render municipal and local elections for 1915 unnecessary was carried, Mr. Long intimating that it would save the ratepayers £100,000. Despite appeals from Lord Crewe and Lord Lansdowne, the Lords postponed until after the recess consideration of the Naval and Military War Pensions Bill, designed to supplement the grants for dependents of men in the services. In moving the adjournment for some six weeks—a proposal which aroused considerable criticism—Mr. Asquith, on *July* 28, declared that the House had no fresh legislation to propose. After praising the work of the Allies, the Prime Minister said recruiting was highly satisfactory, the latest returns being the best for a long time. There was no greater calumny, he declared, than to say that our own people had not risen to a high and great occasion, unless it was to suggest that our Allies did not realise and appreciate to the full the contribution which we were making to the ultimate triumph of the common cause. An amendment to shorten the vacation was negatived without a division, and Parliament adjourned on *July* 29 until Sept. 14. On the final day, Mr. Asquith, in a printed answer to a question, stated that the total British casualties, naval and military, in all fields of operations except German South-West Africa, up to July 20 was 330,995, of which 69,313 were killed.

THE BUDGETS.—Following upon the granting of the vote of credit, Mr. Lloyd George introduced the first Budget of the Session on *Nov.* 17. Its main features were the doubling of the income-tax and super-tax, an additional half-penny on a half-pint of beer, and 3*d.* per pound on tea. For the year 1914–15, however, the new rate of income-tax was only to be collected in respect of one-third of the income, the rate being 1*s.* and 1*s.* 8*d.* on earned and unearned incomes respectively, while for the ensuing year it would be 1*s.* 6*d.* and 2*s.* 6*d.* respectively. The Chancellor also announced that the Government proposed to raise immediately a War Loan of £350,000,000, to be issued at 95, to bear interest at the rate of 3½ per cent. and to be redeemed at par in 1928 or earlier. Describing himself as a coal-heaver engaged in filling up the bunkers of a battleship, Mr. Lloyd George explained that the Budget estimate of revenue for that year was £207,000,000; but, owing to the war, the Treasury would be short of that amount by £11,000,000. He estimated the actual war expenditure for the eight months of the year 1914–15 at £328,000,000, so that he had to find a total sum of £535,000,000, leaving a deficiency not yet provided for of £339,000,000. He justified his proposal to raise a substantial sum by taxation by quoting the precedents of Pitt in the Napoleonic Wars and of Gladstone in the Crimean Campaign, and urged that if the Government did not impose taxation it would be a serious departure for the first time from the honoured traditions set and maintained by this country in every war in which we had been engaged. The Chancellor estimated that the increase in the income-tax and super-tax would yield £12,500,000 that year and £44,750,000 in the succeeding year. With regard to the new beer tax, which should be passed on to the consumer, the publican would, in return, be allowed one-fifteenth of the licence duty for every hour of curtailment in hours of opening up to a maximum of one-fourth. The increased duty would bring in £2,500,000 that year and £17,600,000 the following year, while the concession to the publicans would cost £450,000 and £550,000. He expected a reduced consumption of tea of five per cent., and on this basis the higher taxation would bring in £950,000 and £3,200,000 in the two years. Thus £15,500,000 was obtained in new taxation for 1914–15, together with £2,750,000 from the suspension of the Sinking Fund. There was still a deficiency of £321,000,000, and as £91,000,000 had already been borrowed, it was necessary to secure £230,000,000 to carry the Treasury on to the end of the financial year. The War Loan would enable the Government to finance the war, without further appeal to the public, till the end of July. Mr. Austen Chamberlain, while not taking exception to the principles, remarked that the Budget was not that which he and his colleagues might have proposed, and he regretted that we should be confined to so few fruitful channels for raising our revenue. During a discussion a few days later, Mr. Chamberlain announced that he had accepted Mr. Lloyd George's invitation to co-operate in making the proposals as workmanlike as possible. The suggestion was made by Mr. Henderson that intricate taxation should be replaced by a direct tax on wages collected from the employers; and the Chancellor agreed that such a tax would be a very much better way of securing the workman's contribution, but said he had abandoned the project this year. Concessions were explained in cases of incomes appreciably reduced by the war. The Finance Bill was read a second time on *Nov.* 23; and in Committee on the following day Mr. Lloyd George announced rebates on the beer duty, while Mr. Chamberlain intimated that he had withdrawn his co-operation, being unable to agree with this decision, as the burden on the trade was still too heavy. With the addition of relief from income-tax to members of the forces proportionate to their sacrifices, the Bill was reported, and on *Nov.* 26 it was read a third time, the House of Lords passing it through all its stages a day later. Explaining how British credit had been maintained, Mr. Lloyd George on *Nov.* 27 said the £350,000,000 to £500,000,000 worth of bills of exchange based on British credit at the outbreak of war had all been disposed of in the ordinary course with the exception of £50,000,000. The British money market was in a better position than any other in the world. The balance at the Bank of England at the beginning of the war was £26,000,000; the gold now amounted to £85,500,000. The War Loan had been oversubscribed, the feature having been the number of small applicants—nearly 100,000. British credit, he declared, was built on solid foundations which no foreseeable contingency could destroy. After his conference with the Finance Ministers of France and Russia, the Chancellor, on *Feb.* 15, said it was estimated that the expenditure of the Allies by the end of December would not be far short of £2,000,000,000. Great Britain

would have spent considerably more than either of her Allies by probably £100,000,000 to £150,000,000. We had already advanced £32,000,000 to Russia, and another £8,000,000 was being lent. Russia's requirements would be satisfied for a very considerable time by £50,000,000 which the French and British Governments had decided to raise in equal sums. The House on *Feb.* 23 approved an arrangement made by Mr. Lloyd George with the French and Russian Finance Ministers for pooling the resources of the Allies. On *March* 1 Mr. Asquith moved a supplementary vote of credit of £37,000,000 to meet the expenditure on naval and military operations for 1914–1915, and a vote of credit for £250,000,000 for 1915–1916. The total expenditure for 1914–1915 was thus brought to £362,000,000, of which £275,000,000 had been required for the Army and Navy in addition to the sum voted before the war. Of the remainder, £38,000,000 represented advances for war expenditure to the Colonies and Protectorates, £10,000,000 was advanced to Belgium, and £800,000 to Serbia. Further advances to these Allies were under consideration. Mr. Lloyd George on *May* 4 introduced his second War Budget, which contained no new taxation. If the war were prolonged, however, the Chancellor remarked, it would be necessary to consider what further contributions must be demanded. The only straightforward course to finance the war, he said, was to depend very largely upon the income of the country. We must look primarily to the savings of the community, and urge the country to increase its savings in order that there should be funds for investment in national loans. His estimate of the expenditure during the financial year was £1,132,654,000, which was based on the estimation that the war would last until April, 1916, and the deficit would be £862,322,000. Apart from loans to our Allies and Dominions, the average daily cost of the war was now £2,100,000. The revenue budgeted for was £270,332,000—an increase of £43,938,000 over last year. The yield of excise and customs was expected to be £95,200,000, that of estate duties £28,000,000, and that of property and income tax £103,000,000. The Finance Bill was eventually passed through both Houses.

THE COALITION.—Rumour was busy in May with the possibility of the formation of a Coalition Ministry, and on the 19th, when Parliament adjourned for Whitsuntide, Mr. Asquith announced that steps were in contemplation which would involve the reconstruction of the Government on a broader basis. The Prime Minister added that the change would not affect his own office or that of Sir Edward Grey. There was, he proceeded, absolutely no change of any kind in contemplation in the policy of the country with regard to the continued prosecution of the war with all possible energy, and by means of every available resource. Any reconstruction would be for the purpose of the war alone, and did not indicate anything in the nature of surrender or compromise. Mr. Bonar Law made a brief statement of concurrence. The recess was marked by the fall of the old Administration and the formation of a Coalition Ministry, which met Parliament for the first time on *June* 3. The most important changes included the appointment of Mr. Balfour as First Lord of the Admiralty, Mr. Bonar Law as Colonial Secretary, Mr. Austen Chamberlain as Secretary for India, Lord Lansdowne as Minister without portfolio, and Sir Edward Carson as Attorney-General. Mr. Churchill remained in the Cabinet, but Lord Haldane, Mr. J. A. Pease, and Mr. Hobhouse no longer held office, and several Under Secretaries relinquished their positions. The first business of the Government was to introduce a Bill to relieve the new Ministers of the obligation of seeking re-election. This went through all its stages by the following day. Another measure which was at once brought in had the effect of creating a Ministry of Munitions, to the head of which Mr. Lloyd George was appointed, Mr. McKenna succeeding him as Chancellor of the Exchequer. The second reading of this Bill was given on *June* 7, several members protesting against the possibility of the application to labour of compulsory measures. The new Home Secretary, Sir John Simon, explained that there was no intention of using the Bill for the introduction of forced labour, and that if any special powers were needed they would be asked for. By *June* 9 the measure had passed through all its stages with but slight amendment, and had received the Royal Assent. A few days later Mr. Asquith, speaking on the vote of credit, referred to the formation of the new Ministry, and emphasised the reluctance with which he parted with his colleagues, to whom he paid a high tribute. But, said the Prime Minister, he came to the conclusion that there was needed a broadening of the basis of the Government to take away from it even the semblance of a party character, and to demonstrate beyond the possibility of doubt, not only to our own people, but to the whole world, that after nearly a year of war, with all its fluctuations and vicissitudes, the British people were more resolute than ever, with one heart and one purpose, to obliterate all distinctions and unite every personal and political, as well as every moral and material, force in the prosecution of their cause. He reiterated that he abandoned none of his political convictions, and that the changes in the Cabinet involved no change in the national policy. There was one plain and paramount duty to perform—to bring to the service of the State the willing and organised help of every class of the community. "When our cause has been vindicated," declared Mr. Asquith amid cheers, "may it be recorded as the proudest page in the annals of this nation that there was not a home or a factory in the whole United Kingdom which did not take its part in the common struggle and earn its share in the common triumph."

THE GREAT WAR LOAN.—Shortly after the formation of the Coalition, Mr. McKenna, on *June* 21, outlined the terms of the new War Loan, the amount of which was not specified. It was to be issued at par, and would carry interest at 4½ per cent., said the Chancellor, the State having the right to re-buy at par in 1925, and the investor being able in any event to demand his money back in 1945. Holders of the first War Loan, of Consols, and of 2½ per cent. and 2¾ per cent. Government annuities would be allowed to convert their holdings into the new War Loan stock, the chief provision being that purchases of an equal or greater amount of new stock must be made. In addition to the ordinary method of subscription through the Bank of England, bonds of £5 and £25 would be on sale at the post offices for small investors.

These bonds would bear the same interest as subscriptions through the Bank. For the working classes vouchers for five shillings would be on sale at the post offices, at the offices of trade unions and friendly societies, and at factories and workshops. The interest on these vouchers would be at the rate of five per cent. per annum for every complete calendar month. The vouchers would be converted into bonds of £5 or £25 when a sufficient quantity was obtained. Should it become necessary to issue any further War Loan at a higher rate of interest, said Mr. McKenna, holders of the present Loan would participate in it. The Chancellor later announced that subscriptions to the amount of £570,000,000 had been received through the Bank of England from 550,000 subscribers, and £15,000,000 through the Post Office by 547,000 subscribers.

THE SUPPLY OF MUNITIONS.—As Parliament was on the point of adjourning for Easter, the Government sprang a surprise on the nation by introducing, on *March* 9, a Bill—which had been received from the War Office the preceding night—to mobilise our industrial resources. In presenting the measure, Mr. Lloyd George said the Government had already power to take over any works in which war material was being produced. They now sought power in respect of works in which war material was not being produced, but which were capable of being used for that purpose. Employers holding contracts which were interfered with would be protected. While not opposing the proposals, Mr. Bonar Law said he could not understand why, if they were necessary then, their necessity could not have been foreseen in the preceding August or September. Moving the second reading, Mr. Lloyd George said manufacturers in each district would be summoned and taken into consultation with the Government, and, if possible, business men would be secured. The Government, he added, were on the look-out for a good strong business man with some "push and go" in him who would be able to put the thing through. The second reading was obtained the same night, and on *March* 10 the Bill passed through its remaining stages, Mr. Lloyd George remarking during the debate that we could not conduct the war and allow business to go on as usual—instead of "business as usual," the nation wanted "victory as usual." It was necessary, he said, that we should enormously increase our output of munitions, and he declared that those who knew the military position understood how much depended on an overwhelming supply of explosives at the critical moment. The Bill received the Royal Assent on *March* 16. During a debate on *April* 21, Mr. Lloyd George mentioned that in the fortnight's battle round Neuve Chapelle almost as much ammunition was used by our military forces as during the whole of the Boer War. The output, he added, was now nineteen times as high as in the previous September, over 2,500 firms being engaged in production. Speaking for the first time as Minister of Munitions on *June* 23, Mr. Lloyd George brought in his Munitions Bill, and, in a forcible speech, declared that ultimate victory or defeat depended upon the supply of munitions which the rival countries could produce. The Central European Powers were, he said, turning out 250,000 shells a day. If we were in earnest we could surpass that enormous production. The Bill provided that there should be no strike or lock-out at works engaged in the supply of munitions, and that any dispute must be referred to arbitration. Seven days were given for the voluntary enrolment of skilled men in a mobile munition corps. There would be Government control of workshops, and Munitions Courts would have power to inflict penalties. Trade union regulations restricting output would be suspended, and employers' profits limited. Mr. Lloyd George explained that each of the ten munition areas to be set up would do its share of the national task with a committee of management formed of local business men. He believed that the appeal for workers would be successful, and that the need for industrial compulsion would to that extent have been removed. The Bill was read a first time, and, on *June* 28, a second time, after some criticism of the late Government for not having realised the serious nature of the struggle. The Committee stage and the third reading were secured on *July* 1, after a lively debate, in which the Department of the Master-General of the Ordnance was condemned for its alleged failure to equip the armies. The discussion produced the second division since the outbreak of the war, eleven members going into the lobby in support of an amendment providing that munitions tribunals should take into account any increase in the prices of necessaries in considering any application for an advance of rates or wages. On the following day the measure passed through the Upper Chamber and received the Royal Assent, Earl Curzon declaring that it was not unfair to speak of the country as being in grave peril, but expressing the belief that during the year the output would not only in most respects satisfy our own needs, but would minister to the even more growing needs of our Allies. On the day before the adjournment, Mr. Lloyd George gave an account of the work of the Ministry of Munitions. He said it had been found that the existing armament firms had been allotted more work than they could accomplish because of a dearth of machinery and labour. They had now been assisted considerably by the new Department. Nearly 100,000 volunteer munition workers had been enrolled, but only about one-fifth of them were available, as a large number were already engaged on Government work. Thousands of skilled engineers had been released from the colours, and more would become available in the next few weeks. He urged trade union leaders to bring pressure upon their men to suspend trade union regulations, which, he declared, were reducing the output of shot and shell and other war material by twenty-five per cent. He announced that the country had been divided into co-operative areas, and boards had been set up to organise the whole available machinery, while sixteen national factories which were being supplied with the necessary machinery and labour, had been set up. There were also two or three national factories for the supply of special component parts of shells. As a result of a conference with the British and French military authorities, it had been decided to embark on a new and great programme which would tax the engineering resources of this country for some months. To meet this gigantic demand, it would be necessary to set up immediately ten large national establishments in addition to those already mentioned. They would be controlled by the Government, and the new munition volunteer army would be drawn upon for labour.

The necessary machinery had been ordered, and steps were being taken to erect the buildings. He hoped the equipment would be ready in the next few weeks or months, which would enable them to equip our armies in such a way that even the best armies in Europe would not be able to claim superiority so far as war material was concerned.

LORD KITCHENER'S SPEECHES.—Reviewing the military situation on *Nov.* 26, Lord Kitchener said that approximately 30,000 recruits were coming forward every week, and he expressed confidence that when further calls were made on the manhood of the nation they would be responded to as before in a manner and spirit which would ensure the prosecution of the war to its successful conclusion. The War Secretary made a further survey when the House of Lords reassembled on *Jan.* 6 after the Christmas adjournment. He explained that for some time the operations on the western front had resolved themselves into a phase of siege warfare, while in the eastern theatre German aspirations in Poland had suffered a severe check. The Turkish advance against Egypt had failed to materialise. The great initial advantage which the Germans enjoyed by reason of their numerical superiority and extensive war preparations was, said the War Secretary, diminishing, while the Allies were daily increasing those resources of men and material that would enable them to prosecute the war to a triumphant end. Before Parliament adjourned for Easter, Lord Kitchener made a further statement in the Lords dealing with the progress of the campaign. He said the output of munitions was not only not equal to our necessities, but did not fulfil our expectations, as a very large number of contracts had not been completed by the dates on which they were promised. The work of the forces in the field, declared the War Secretary, had been seriously hampered by the failure to obtain sufficient labour, and by delays in the production of the necessary plant. "The supply of war material at the present moment, and for the next two or three months," said Lord Kitchener, "is causing me very serious anxiety"; and he urged workmen to realise that it was absolutely essential, not only that the arrears in the deliveries of our munitions of war should be wiped off, but that the output of every kind of munition was of the utmost importance. He added that the Government were arranging a scheme under which important armament firms would come under Government control and their workmen would reap some of the benefits which the war conferred on those companies. Referring to the treatment of British prisoners in Germany, Lord Kitchener, on *April* 27, said Germany had stooped to actions comparable to the barbarous savagery of the Dervishes in the Sudan. On *May* 18 the War Secretary announced that in self-defence the Allies intended to employ poisonous gases against the Germans; otherwise, they would be under an enormous and unjustifiable disadvantage. Lord Kitchener said the output of munitions had been considerably improved, and he was confident that in the very near future the country would be in a satisfactory position with regard to the supply of high-explosive shells. He appealed for 300,000 more recruits, and prophesied that the new armies would worthily uphold their reputation in the activities in the field which immediately awaited them.

REGISTERING THE NATION.—As President of the Local Government Board, Mr. Walter Long, on *June* 29, introduced a Bill for the compilation of a register of the people of the United Kingdom between the ages of 15 and 65, with a record of the work which each was willing to undertake in the service of the State. Mr. Long said the registration would be conducted by the urban and rural authorities throughout the country, and he expressed the belief that the Bill would enable the Government to utilise to the fullest advantage the capacity of the nation to serve the State. The first reading was agreed to, and on *July* 5 the second reading was obtained after the defeat, by 253 to 30, of an amendment moved by Sir Thomas Whittaker declining to proceed with the Bill. Mr. Long denied that the measure concealed a policy of conscription, but said that should the need for conscription arise, the register would afford the necessary information of the resources of the country. After the addition of a provision to preserve the secrecy of the register, the Bill left the Commons on *July* 8. In moving the second reading in the Lords, on *July* 13, Lord Lansdowne pointed out that there was not a word of compulsory service in the Bill; but he added that he did not believe that voluntary service would be tolerated much longer by the country, and if compulsory service came the register would shorten the interval between the decision to adopt compulsion and the actual application of the measure. The final stages were obtained on *July* 14.

THE SUBMARINE "BLOCKADE."—The Prime Minister, on *March* 1, announced the Allies' reply to the German submarine "blockade," and declared that commodities of any kind would be prevented from reaching or leaving the German Empire. These retaliatory measures, Mr. Asquith said, would be enforced by the British and French navies without risk to neutral ships or to neutral or non-combatant lives, and in strict observance of the dictates of humanity. "The British and French Governments," continued the Premier, "will, therefore, hold themselves free to detain and take into port ships carrying goods of presumed enemy destination, ownership, or origin." Mr. Bonar Law said that the Government, in taking this course, would have, not the support of the House of Commons only, but the support of the whole people of the country, when they declared that no power in their hands would be left unused to bring at the earliest moment this terrible conflict to an end.

THE DRINK PROBLEM.—The Government's policy on the question of drink facilities was outlined by Mr. Lloyd George on *April* 29. It was proposed that the duty on spirits should be doubled; a graded surtax imposed on beers containing over seven per cent. of proof spirit, ranging from 12*s.* to 36*s.* per bulk barrel, according to the specific gravity; the duty on wines quadrupled; and the tax on sparkling wines raised to 15*s.* per gallon. The maximum dilution of spirits to be permitted by law was to be increased from 25 to 35 under proof. The Government also proposed to take powers, limited to the duration of the war, to close public-houses, or to control them, in certain areas where their presence was considered to be prejudicial to the output of munitions of war, the work of transport, or the discipline of troops; compensation to be paid. In explaining the plan, Mr. Lloyd George said it was necessary to remove the obstacle of excessive drinking

among sections of those engaged in the works. The only consideration was to clear the road to enable them to increase the output which meant life for the Empire. Reports from the Clyde, the Tyne, and Barrow, he said, showed that men were doing less work than would be regarded as ordinary under peace conditions. The Irish members condemned the scheme, and after the Bill had been given a first reading, the first division since the outbreak of war was caused by the Independent Nationalists on the resolutions to sanction the new duties on spirits and beer, the figures being 89 to 5, and 74 to 5. Negotiations were set on foot, and eventually the proposed spirit, beer, and wine duties were withdrawn. The Bill, now confined to the State control of the sale of liquor in munition areas, was read a second time on *May* 10; while on the following day another measure to restrict the sale and supply of immature spirits, the result of the negotiations over the duties, was introduced. In effect, it prohibited the sale of spirits under three years of age. The two Bills were passed expeditiously, and received the Royal Assent on *May* 19.

THE ARMY.—In a Session devoted so largely to the active work of the services, little time was spent on the usual procedure. The Army Estimates were presented in token form, the nominal figure of £1,000 being put down to permit of discussion, and it was explained that the Government would take votes of credit as they were needed. Mr. Tennant, introducing the Estimates on *Feb.* 8, appealed to Labour members to help the Government to organise the forces of labour so that when a man joined the colours his place might be taken by another not of military age or physique, or by a woman. Before the Coalition was formed, Lord Haldane, on *May* 13, said compulsory military service might come, but "at present we have our hands full with the material we possess, and magnificent material it is." Later, on the eve of the adjournment, Mr. Tennant, the Under Secretary for War, declared that the Government would not and could not close the door to a compulsory policy. Shortly after the death of Earl Roberts, each Chamber, on *Nov.* 17, adopted an address praying the King to give instructions that a monument should be erected at the public charge to the famous soldier's memory, eloquent tributes being paid by Lord Kitchener, Lord Curzon, Lord Crewe, Mr. Asquith, Mr. Bonar Law, and Mr. Redmond.

THE NAVY.—Reviewing the work of the Fleet, Mr. Churchill, on *Nov.* 27, announced that by the end of 1915 the Navy would have received an accession of fifteen battleships, as compared with the maximum reinforcement of three by Germany. There was no reason whatever for anxiety or alarm, he said, but every reason for complete confidence in the power of the Navy to give effect to the wishes and purposes of the Empire. Subsequently, on *Feb.* 15, the First Lord declared that there were good reasons for believing that the economic pressure which the Navy exercised was beginning to be felt in Germany. With regard to Germany's threat of a blockade, Mr. Churchill announced that the Allied Governments would promptly make a declaration which would have the effect for the first time of applying the full force of naval pressure to the enemy. So far we had not attempted to stop imports of food into Germany, or prevented neutral ships trading direct with German ports. The time had come when a State which had, as a matter of deliberate policy, placed itself outside all international obligations, must be deprived of the enjoyment of these amenities. Mr Churchill added that our resources were then incomparably superior to those at our disposal at the beginning of the war. The Navy had actually moved about one million men without accident or loss of life. Arising out of the *Lusitania* crime, Mr. Churchill on *May* 10 said the Admiralty were not able to supply a destroyer escort for merchant or passenger ships.

CONTROVERSIAL SUBJECTS.—Early in the year, Mr. Asquith said the Government would confine its legislative proposals to such measures as might be found necessary for the successful prosecution of the war, and he added that the Plural Voting Bill and other commitments of that character must be postponed. The question of Welsh Disestablishment was raised occasionally, and shortly before the adjournment, on *July* 25, the Commons agreed to the withdrawal of the Welsh Church Postponement Bill, which had come from the Lords and which provided that disestablishment should not take place until six months after the conclusion of the war, on condition that no proposals for repeal or amendment should be made, except with the consent of both parties, before the date of disestablishment had been fixed. In announcing the withdrawal, the Home Secretary explained that the Bill would not receive support in all quarters of the House, and consequently the Government contemplated making an Order in Council postponing the date of disestablishment until after the war.

THE FRANCHISE IN 1915.

The following table shows the number of Electors in the three Kingdoms classified according to their respective qualifications. It will be seen that about one sixth of the whole population, or about one third of the male population, are in possession of the franchise.

Division.	Electors for Counties.			Electors for Boroughs.			University Electors.	Total Electors (1915).	Population, July, 1914.
	Owners.	Occupiers.	Lodgers.	Occupiers.	Lodgers.	Freemen, Freeholders, &c.

The Balance of Parties since 1837.

THE following table shows the Balance of Parties at the meeting of each Parliament since 1837, the Majority being that ascertained at the conclusion of the polling at the General Election. It will be seen that the 18 elections have returned 13 Liberal and 5 Conservative majorities, while the Liberal Party has been in power for 45 and the Conservative Party for 29 of the 74 years included in the table. The largest Liberal majority was 354 (1906), and the smallest 1 (1847); the largest Conservative majority was 152 (1895), and the smallest 46 (1880).

Parliament met.	Liberal.	Nationalist.	Labour.	Conservative.	Liberal Unionist.	Majority.

Premiers, Principal Secretaries,

Premiers and Secretaries of State.—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1905 the office of Prime Minister was officially recognised. The first mention of a King's Secretary of State is under Henry III. In 1433, owing to press of work in France, two Secretaries were appointed, and until 1794 two seems to have been the normal number. From 1688 to 1782 one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home,

Irish, and Colonial business. In 1782 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801 he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed.

ADMIRALTY, Whitehall, S.W.

The management of all maritime affairs, the government of the Royal Navy, jurisdiction in maritime cases, and the appointment and commissioning of Naval Officers, was in early times the province of the "Lord High Admiral," the ninth Great Officer of State. The judicial functions of the office have long been vested in other hands, and the office itself has been "in commission" since 1708 (except for a short time in 1827, when the Duke of Clarence was Lord High Admiral), the duties being performed by "Commissioners for executing the Office of Lord High Admiral of the United Kingdom." These Commissioners, or "Lords of the Admiralty" as they are more generally called, consist of a Political "First Lord" (who, by virtue of the importance of his office, is a Cabinet Minister), a "First Sea Lord," "Second Sea Lord," "Third Sea Lord," "Fourth Sea Lord," now always selected from Officers of the Service, a Political "Civil Lord," and an additional "Civil Lord." There is also a "Parliamentary and Financial Secretary" and a non-political Permanent Secretary. The *net* amount provided in the Navy Estimates 1914-15, for administration, is £483,500.

(*See* NAVAL DEPARTMENT, *pp.* 250-252.)

AGRICULTURE AND FISHERIES, Board of,

4, 5, & 8 Whitehall Place; 3 & 21 St. James's Square; 43 and 54 Parliament Street, S.W.; and Craven House, Northumberland Avenue, W.C.

The Board of Agriculture was established by the Act of 1889, when there were transferred to it the duties of the Privy Council in connection with Diseases of Animals, and the functions of the Land Commissioners for England. Technically, the membership of the Board is analogous to that of the Local Government Board, and "Board" of Education, but in effect the establishment consists of a President, a Parliamentary Secretary, a Permanent Secretary, Assistant Secretaries, &c., and its main functions are to prevent the introduction or spread of certain diseases among animals, to control the transit of animals and the exportation of horses in Great Britain, to deal with insect and fungus pests, to collect and distribute information relating to agriculture, horticulture and forestry, to administer Grants for Agricultural Education and Research (including Forestry), to collect and publish agricultural statistics, to administer the Fertilisers and Feeding Stuffs Act and the Sale of Food and Drugs Acts in England and Wales so far as the latter relate to agricultural produce, to control the redemption and re-apportionment of tithe rent charge and the regulation or enclosure of common land, to enfranchise copyhold land, to administer the Small Holdings and Allotments Acts and the Acts relating to the improvement of land by private owners, to administer the Acts relating to Sea, Salmon and Freshwater Fisheries. The Board also publish a monthly "Journal," price 4*d.* By the Board of Agriculture and Fisheries Act of 1903 certain powers and duties formerly exercised by the Board of Trade with respect to fisheries were transferred to this Department, the designation of which was at the same time altered. The Board also control the Ordnance Survey of the U.K., which is the subject of a separate Vote. By an Order in Council of 28 March, 1903, the supervision of the Royal Botanic Gardens, Kew, was transferred to the Board. The cost of administration in the financial year 1915-16 was estimated at £582,274.

President, Rt. Hon. Earl Selborne, K.G., G.C.M.G. £2,000
Private Secs., A. W. Monro, £250; R. S. Langford £150

ARMS, COLLEGE OF, or **HERALDS' COLLEGE,** Queen Victoria Street, E.C.

The Heralds' College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the granting and the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Pulteney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.

Earl Marshal, His Grace the Duke of Norfolk, K.G., G.C.V.O.

Kings of Arms.

Garter, Sir Alfred Scott Scott-Gatty, K.C.V.O., F.S.A.
Clarenceux, William Henry Weldon, C.V.O., F.S.A.

Earl Marshal's Sec., Gordon A. de Lisle Lee.
Registrar, Charles Harold Athill, M.V.O., F.S.A.

CHARITY COMMISSIONERS, Ryder Street, St. James's, S.W.

The Charity Commission was appointed by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1874 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely Educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899.

Chief Commissioner, Sir Charles Cook, K.C.B. £1,500

Director of Examinations, D. B. Mair ...£700 to £900

COLONIAL OFFICE, Downing Street, S.W.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Colonies, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £61,410 for 1915-1916.

Principal Secretary of State for the Colonies, Rt. Hon. A. Bonar Law, M.P. £5,000
Priv. Sec., F. G. A. Butler, C.M.G. £300
Assist. do., †A. C. C. Parkinson, £100; †R. Furse, £150; J. C. C. Davidson

Under-Secretaries.

Permanent, Sir John Anderson, G.C.M.G., K.C.B. £2,000

Head of Appointments Dept., H. Martin £550 to £700
Head of Shipping Dept., T. H. Holt (*and £300 personal allowance*) .....£550 to £700

* Absent on war service.

CUSTOMS AND EXCISE, BOARD OF, E.C.

Commissioners of Customs were first appointed in 1671 and housed by the King in London, the present "Long Room" replacing that built by Charles II. and rebuilt after destruction by fire in 1718 and 1814. In 1830 the Customs business of Ireland was transferred to London. The Excise Department was formerly under the Inland Revenue Department, and was amalgamated with the Customs Department on 1 April, 1909.

Chairman, Sir Laurence N. Guillemard, K.C.B.....£2,000
Private Sec., O. A. Sherrard.

Assist. Sec., R. C. Woodhead .....£600 to £800

DURHAM, COUNTY PALATINE OF.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of *palatine* privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.
Chancellor, Edward Tindal Atkinson, K.C.
Attorney-General, Herbert F. Manisty, K.C.
Solicitor-General, Arthur W. Bairstow, K.C.
Registrar of Chancery Court, A. O. Smith.
Steward & Clerk of Halmotes, F. A. Manley.

EXCHEQUER AND AUDIT DEPARTMENT, Victoria Embankment, E.C.

The Comptroller and Auditor-General was appointed by Letters Patent under 29 & 30 Vict. c. 39 § 3 (1866), in place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were handed over to him. The main functions of the office are: (1) Exchequer:—To authorise Issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (2) Audit of Public Accounts:—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide; that the expenditure is supported by proof of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon. The net expenses of the Department were estimated at £66,382 in 1915-16.

FRIENDLY SOCIETIES' REGISTRY,
Central Office, Dean Stanley Street, S.W.

A Barrister was appointed in 1828 to certify the Rules of Savings Banks, and in 1829 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, the National Insurance Act, and a great number of local and personal Acts. The Chief Registrar is also a member of the National Health Insurance Commissions for England, Scotland, Ireland, and Wales, and of the National Health Insurance Joint Committee.

Chief Registrar, G. Stuart Robertson £1,200 to £1,500
Private Sec., G. H. Cooper.

Office Keeper, G. H. Taylor .....£120 to £150

GENERAL REGISTER OFFICE,
Somerset House, W.C.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the above Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office for 1915-16 were estimated at £58,601 (including £1,072 for the Census Office).

Registrar-General, Bernard Mallet, C.B. £1,200
Private Sec., T. A. Saunders.

HOME OFFICE, Whitehall, S.W.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of the United Kingdom, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the improvement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy The administrative expenses of the Home Office were estimated at £267,169 in 1915-16.

INLAND REVENUE, BOARD OF,

Somerset House, W.C.

The appointment of Commissioners of Stamps dates from 1694 and of Commissioners of Taxes from 1719. By 4 and 5 Will. IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 22 and 23 Vict. c. 1 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. In 1909 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps, Taxes, and Land Value Duties. The estimated cost of the Department in 1914-15 was £2,207,320 (the establishment charges of the Chief Office being £368,535).

Secretary, Capt. T. D. Butler, C.V.O. £200
Clerk, W. B. Paley £100
Resident Supt. House of Lords, T. Whitehead £300

METEOROLOGICAL OFFICE,

South Kensington, S.W.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and the control is now vested in a Director and Committee appointed by the Lords Commissioners of the Treasury. The work of the office includes the collection and discussion of meteorological observations from all oceans, the maintenance of a number of stations for daily telegraphic reports upon which forecasts and gale warnings are based, and other work incidental thereto. The Kew Observatory at Richmond and the Observatory at Eskdalemuir are administered by this Office. The administrative expenses are met by Government grants, which amounted to £22,500 in 1915-16.

Director and Chairman of Committee, Sir Napier Shaw, LL.D., SC.D., F.R.S.
Marine Superintendent, Comm. M. W. Campbell Hepworth, C.B., R.D., R.N.R.
Supt. of Forecast Division, R. G. K. Lempfert, M.A.
Supt. of Statistics, Capt. Ernest Gold, M.A.
Supt. of Instruments, F. J. W. Whipple, M.A.
Secretary to Director, and Clerk of Publications, R. Corless, M.A.
Chief Clerk, T. Duncan Beil.
1st Class Clerks, W. Allingham; F. J. Brodie; H. Harries; R. Sargeant; J. Sheerman.

Dir. of Experiments in Upper Air, W. H. Dines, F.R.S.

METROPOLITAN ASYLUMS BOARD,

Office: Victoria Embankment, E.C.

Constituted under Orders of the Local Government Board to provide, for the Metropolis, hospital accommodation for infectious disease, both acute and convalescent, hospital accommodation for certain classes of sick children, and asylums for imbeciles. Also to provide training ships, an ambulance service, land and river, sanatoria for consumptives, National Insurance Act, and casual wards. Particulars of fever hospitals (acute) are given on p. 335, of imbecile asylums on p. 335, and of training ships on p. 306.

The Board consists of 73 members, 55 being elected by the several metropolitan boards of guardians and 18 nominated by the Local Government Board. All hold office for three years.

Chairman of the Board, R. Woolley Walden.
Vice-Chairman, The Very Rev. Canon Sprankling.
Clerk to the Board, Sir Duncombe Mann, *Barrister-at-Law.*
Assistant Clerks, J. Mallett; G. A. Powell.
Treasurer and Accountant, Morris Heyes, A.C.A.
Principal Medical Officer, H. E. Cuff, M.D., F.R.C.S.
Controller of Supplies, G. J. Cooke.
Engineer-in-Chief, W. T. Hatch; M.I.C.E., Sheffield House, Sheffield Street, W.C.

MINT, THE ROYAL, Tower Hill, E.

The Royal Mint, as now constituted, may be said to date from 1817, and the buildings from 1810, the latter being completed in that year at the cost of over £250,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I. and the last Warden was Lord Maryborough (1814-23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £163,263 for 1915-1916.

Master and Worker, The Chancellor of the Exchequer.
Deputy Master and Engraver of H.M. Seals, Sir Thomas Henry Elliott, K.C.B. £1,750
Chief Clerk, F. L. D. Matthews ..... £500 to £700

MUSEUM, THE BRITISH,
Bloomsbury, W.C.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1857, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £154,935 (including Natural History Museum) in 1915-16, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Service Estimates.

Assistant, 1st Class, Basil H. Soulsby, B.A., F.S.A. ..... £300 to £500
Clerks, W. H. R. Holl; W. J. Anderson ..... £250 to £350
Assistant. 1st Class (Library), B. B. Woodward £500
Keeper of Zoology, Dr. Sidney F. Harmer, M.A., F.R.S. £800
Assistant Keeper, W. R. Ogilvie-Grant ..... £520 to £650
Assistants, 1st Class, George A. Boulenger, F.R.S.; Oldfield Thomas, F.R.S.; Fras. Jeffrey Bell, M.A.; Randolph Kirkpatrick; Dr. W. T. Calman; C. T. Regan, M.A.; W. P. Pycraft ..... £300 to £500
Assistants, 2nd Class, A. S. Hirst; J. G. Dollman, B.A.; G. C. Robson, B.A.; C. Court Treatt; H. A. Baylis, B.A.; A. K. Totton ..... £150 to £300
Keeper of Entomology, Dr. C. J. Gahan, M.A. ..... £700 to £800
Assistants, 1st Class, Sir George F. Hampson, Bart.; Ernest E. Austen; J. Hartley Durrant; G. J. Arrow ..... £300 to £500
Assistants, 2nd Class, G. Meade-Waldo, M.A.; F. W. Edwards, B.A.; K. G. Blair, B.SC.; N. D. Riley; B. F. Cummings; F. Laing, M.A., B.SC. ..... £150 to £300
Keeper of Geology, Dr. A. S. Woodward, F.R.S. £800
Assistant do., Dr. F. A. Bather, F.R.S. £650
Assistants, 1st Class, R. B. Newton; Dr. C. W. Andrews, F.R.S.; G. C. Crick; W. D. Lang, B.A. ..... £300 to £500
Assistant, 2nd Class, W. N. Edwards, B.A. £150 to £300
Keeper of Mineralogy, Dr. George T. Prior, M.A., F.R.S. £800

Assistants, 1st Class, L. J. Spencer, M.A.; Dr. G. F. H. Smith, M.A. ..... £300 to £500
Assistant, 2nd Class, W. Campbell Smith, M.A. £150 to £300
Keeper of Botany, Dr. A. B. Rendle, F.R.S. £800
Assistants, 1st Class, A. Gepp, M.A.; E. G. Baker £300 to £500
Assistants, 2nd Class, H. F. Wernham, B.A., D.SC.; J. Ramsbottom, B.A.; A. J. Wilmott, B.A. £150 to £300

MUSEUM, THE VICTORIA AND ALBERT, South Kensington, S.W.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1851 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the various Schools of Design since 1837, dispersed among the various Schools. Additions have since been made by gift and bequest. The older parts of the building were erected between 1860 and 1884; the new buildings were completed in 1909. The administrative expenses were estimated at £70,459 in 1915-16, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally. The administrative expenses were estimated at £5,433 in 1915-16.

Director and Secretary, Sir Cecil H. Smith, LL.D. £1,200 to £1,500

Secretariat.

Secretary to the Advisory Council, H. A. Kennedy £400 to £600
Museum Superintendent, E. Hart ..... £400 to £500
Minor Staff Clerks, A. V. Fullerton; J. F. Freeth £250 to £300

Department of Architecture and Sculpture.

Assistant Keeper, E. R. D. Maclagan, B.A. £520 to £650
Assistant, 2nd Class, R. P. Bedford ..... £150 to £300

Department of Ceramics.

Assistant Keepers, C. H. Wylde, M.R.C.S.; B. Rackham, M.A. ..... £520 to £650
Technical Assistant, F. G. M. Beaumont £214

Department of Engraving, Illustration, and Design, and of Painting.

Assistant Keeper, M. Hardie, B.A. ..... £520 to £650
Assistants, 2nd Class, B. S. Long, M.A.; F. W. Stokes, B.A. ..... £150 to £300
Technical Assistant, E. A. Reid ..... £150 to £200

Library.

Keeper, G. H. Palmer, B.A. ..... £700 to £800
Assistant Keepers, T. C. Grove; A. Van de Put £520 to £650
Assistant, 1st Class, H. C. Andrews, M.A. £300 to £500
Technical Assistant, A. K. Sabin ..... £120 to £300

Department of Metalwork.

Keeper, W. W. Watts, F.S.A. ..... £700 to £800
Assistant Keeper, H. P. Mitchell ..... £520 to £650
Assistants, 1st Class, A. J. Koop, B.A.; C. T. P. Bailey £300 to £500

Department of Textiles.

Keeper, A. F. Kendrick, B.A. ..... £700 to £800
Assistant Keeper, P. G. Trendell ..... £520 to £650
Technical Assistant, A. D. H. Smith, B.A. £120 to £300

Department of Woodwork.

Keeper, E. F. Strange ..... £700 to £800
Assistants, 1st Class, O. Brackett; H. Clifford-Smith, M.A. ..... £300 to £500

Indian Section.

Assistant Keeper, C. S. Clarke ..... £520 to £650
Assistant, 1st Class, A. J. D. Campbell ... £300 to £500

Department of Circulation.

Secretary, J. Bailey £900
Assistant Keeper, R. F. Martin ..... £520 to £650
Assistant, 1st Class, E. W. Denniss ..... £300 to £500
Assistant, 2nd Class, A. E. J. Torrens ..... £150 to £300

Bethnal Green Museum.

Assistant Keeper, T. A. Lehfeldt ..... £520 to £650

MUSEUM, THE LONDON, Lancaster House, St. James's, S.W.

The London Museum was instituted, on the lines of the Carnavalet at Paris, for the conservation of the antiquities, &c., of London. The Collection was originally housed in Kensington Palace, and was re-opened in 1914 at Lancaster House.

Keeper and Secretary, Sir G. F. Laking, Bart., C.B., M.V.O., F.S.A.
Asst. Secretary, F. A. Harman Oates.
Inspector of Excavations, G. F. Lawrence.
Technical Assistant, H. W. Murray.

NATIONAL LIBRARY OF WALES, Aberystwyth.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. Contains MSS. and printed books in Welsh and other Celtic languages. One of the six libraries entitled to certain privileges under New Copyright Act. Open daily 10 to 5, Sat. 10 to 1.

Librarian, John Ballinger, M.A.

NATIONAL MUSEUM OF WALES, Cardiff.

Director, W. Evans Hoyle, D.SC.

NATIONAL DEBT OFFICE, 19 Old Jewry, E.C.

The National Debt Commissioners were appointed under 26 Geo. III., c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote (38-39 Vic., c. 45), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £13,403 in 1915-16.

Comptroller-General, W. G. Turpin, C.B. £1,500
Private Secretary, G. Rackham £100
Assistant Comptroller, Sir E. J. Soares £800 to £1,000
Actuary, H. Weatherill, F.I.A. £250
Chief Clerk, C. von Berg £800
Principal Clerks, H. Manwaring; T. Gowland, £600 to £700; G. F. Ansell ..... £550 to £700
Assistant do., E. R. Kennedy; H. Weatherill, F.I.A.; W. F. Doust; J. J. Bree; E. S. Jones, F.I.A. £350 to £450
Brokers, Messrs. Mullens, Marshall & Co. £1,500

NATIONAL GALLERY, Trafalgar Square, S.W.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876, 1887 and 1911.

Director, Sir Charles Holroyd £1,000
Keeper and Secretary, C. H. Collins Baker £600 to £750
Chief Clerk and Asst. Sec., G. E. Ambrose.

NATIONAL GALLERY, BRITISH ART (The Tate Gallery), Millbank, S.W.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The "Turner Wing," built at the expense of the late Sir Joseph Duveen, was opened to the public in 1910.

Director, Sir Charles Holroyd ....(*see above*)
Keeper, Charles Aitken ..... £300 to £500

NATIONAL HEALTH INSURANCE.

The administration of National Health Insurance is entrusted to a Joint Committee and four Commissions (one each for England, Wales, Scotland, and Ireland).

The Joint Committee.

Offices—Buckingham Gate, S.W.

Law Clerks, E. J. Maude; H. C. Talbot £400 to £500
Principal Medical Officer, G. F. McCleary, M.D. £1,000

Outdoor Staff.

Chief Inspector, E. A. Gowers £1,000
Chief Woman Inspector, M. M. A. Ward £400 to £550
Divisional Inspectors, P. R. T. Ashton, E. G. Bearn, G. W. Brake, F. N. Curtis-Bennett, S. A. Guest, W. T. Ivimey, A. Macfarlane, F. J. Matheson, J. J. Moynihan, W. F. Shinn .....£550 to £700
Inspectors: Male, F. B. Alcock, J. C. Arnold, N. B. Batterbury, C. E. Brackenbury, F. C. Brook, T. A. Brook, H. W. Bromby, F. Bryan, L. E. Buncher, J. G. Christopher, W. R. C. Clarke, A. H. Eady, J. W. Evans, T. M. Evans, R. J. Foot, E. G. Francis, T. A. Gailey, C. H. J. Garland, T. Gibson, G. E. Gladstone, H. T. Griffith, E. Holmes, O. W. Holstius, A. J. Langridge, C. B. Jeaffreson, S. M. Jessop, K. Loader, S. S. Lockhart, F. G. Mackereth, J. N. P. Mackie, A. Mason, W. Milledge, F. Morton, A. W. Neville, G. Ormsby, G. M. Robinson, A. C. Scott, J. H. Sinkinson, H. L. T. West, F. C. Wheeler, G. Wigglesworth... .....£350 to £500
Female, J. J. Brown, M. M. Dalglish, E. M. Gardner, E. A. McCleverty, M. B. Murby, A. E. Otter, E. E. Page, E. G. Roe, H. Todd, E. G. Woodgate .....£300 to £400

THE WELSH COMMISSION,
City Hall, Cardiff.

Chairman, Thomas J. Hughes £1,500
Private Secretary, T. Ll. Roberts.
Deputy Chairman, H. Meredith Richards, M.D. £1,200
Commissioners, J. Rowland, M.V.O., J.P., Hon. Violet Douglas-Pennant, each £1,000; the Chief Registrar of Friendly Societies (*q.v.*).
Secretary, Thomas Jones, M.A. .....£850 to £1,000
Asst. Secs., Arthur M. Leveaux; Percy E. Watkins .....£550 to £700
Accountant, John C. Morgan .....£550 to £700
Legal Adviser, Arthur M. Bulloch, B.A. ..£500 to £700
Medical Officer, D. Ll. Williams, F.R.C.S. (Ed.), D.P.H. .....£500 to £800
Asst. Accountant, F. J. Alban, F.S.A.A...£350 to £500
1st Class Clerks, H. E. James, B.A.; J. H. Jones; J. T. Davies; J. J. Scott; D. E. Jones; T. E. Metcalfe .....£350 to £500
Superintendent of Registry, W. G. Hayward .....£300 to £400

Outdoor Staff.

Chief Inspector, James Evans .....£550 to £700
Inspectors, J. O. Evans; R. T. Williams £350 to £500

NATIONAL PHYSICAL LABORATORY,
Teddington, Middlesex.

The National Physical Laboratory, founded in 1899 for standardising and verifying instruments, for testing materials, for the determination of physical constants, and for research into matters of technical and industrial importance, is controlled by a Board representing the Royal Society and the great Technical Institutions. In addition to capital sums, an annual grant of £7,000 is contributed by H. M. Treasury; and subscriptions from the Technical Societies and other sources amount to about £700 a year. A Government grant is also made to cover the expenses of Aeronautics work. The Laboratory comprises four main departments: (1) Physics; (2) Engineering; (3) Metallurgy and Metallurgical Chemistry; (4) The William Froude National Tank. The Physics Department of the Laboratory includes divisions for Thermometry, General Electrical Measurements, Electrical Standards, Electrotechnics and Photometry, Optics, and Metrology (measurements of length, area, volume and mass). The Engineering Department, in addition to research, undertakes tests on engineering apparatus and machines. An Aeronautics division has also been formed, to carry out investigations required by the Advisory Committee for Aeronautics, and arrangements have been made for tests on road materials, at the request of the Road Board. The Department of Metallurgy undertakes chemical, metallographic and other investigations into the nature and characteristics of metals and alloys, including examinations into the causes of failure of engineering structures, carried out jointly with the Engineering Department. New buildings for the Metallurgical work were provided by Sir Julius Wernher in 1910. The William Froude National Tank, the gift of Mr. A. E. Yarrow for the service of the nation, has been constructed for carrying out tests and researches on ship and propeller models, for the information of designers and naval architects. Additional buildings for Optics, and for administration purposes, were, in 1913, opened by Mr. Balfour.

Chairman, The President of the Royal Society.
Do. of Executive Committee, Lord Rayleigh, O.M., F.R.S.
Director, R. T. Glazebrook, C.B., D.SC., F.R.S.
Supt. Engineering Dept., T. E. Stanton, D.SC., F.R.S.
Supt. Metallurgical Dept., W. Rosenhain, D.SC., F.R.S.
Senior Asst., Physics Dept., J. A. Harker, D.SC., F.R.S.
Supt. William Froude National Tank, G. S. Baker, M. INST. N.A.

NATIONAL PORTRAIT GALLERY,
St. Martin's Place, Charing Cross, W.C.

The first grant to the institution was made in 1856; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £80,000 being contributed to its cost by Mr. W. H. Alexander.

Director, Keeper, and Secretary, C. J. Holmes .....£500 to £700
Clerk and Actg. Asst. Keeper, J. D. Milner.

NAUTICAL ALMANAC OFFICE,
3 Verulam Buildings, Gray's Inn, W.C.

The "Nautical Almanac" was first published in 1767, by H.M. Admiralty, under whose control the office now remains. The expenses of preparation were estimated at £3,546 in 1914-15.

Superintendent, P. H. Cowell, D.SC., F.R.S. £650
Chief Assistant, B. F. Bawtree .....£400 to £500
Assistants, J. A. Sprigge; W. F. Doak, M.A., F.R.A.S.; T. C. Hudson, B.A., F.R.A.S. .....£300 to £400

OBSERVATORIES.
Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The administrative expenses of the Observatory were estimated at £20,516 in 1914-15.

Astronomer Royal, Sir F. W. Dyson, LL.D., F.R.S. £1,000
Chief Assistants, J. Jackson, B.A., D.SC., F.R.A.S.; H. S. Jones, M.A., B.SC., F.R.A.S. .....£500 to £600
Assistants, Thomas Lewis, F.R.A.S.; William G. Thackeray, F.R.A.S.; H. P. Hollis, B.A., F.R.A.S.; Andrew C. D. Crommelin, D.SC., F.R.A.S.; W. W. Bryant, B.A., F.R.A.S. (*Magnetic and Meteorological*) .....£320 to £450
Clerical Assistant, H. Outhwaite.....£250 to £350

Royal Observatory, Cape of Good Hope.—£9,340.

Astronomer, S. S. Hough, M.A., F.R.S. .....£867 to £967
Chief Assist., J. K. E. Halm, PH.D., F.R.A.S. .....£667 to £767
Assistants, W. H. Cox; J. Lunt, D.SC.; R. T. Pett; J. Power.....£325 to £575
Clerical Assistant, Arnold Pilling, B.A. ...£333 to £433

For other Observatories, *see* p. 94.

PATENT OFFICE,
25 Southampton Buildings, W.C.

The prerogative of the Crown to grant monopolies was limited by 21 James I. c. 3 to the grant of Letters Patent for New Inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Vict. c. 57. The duties are performed by a Comptroller-General with a staff of officials. The administrative expenses were estimated at £154,281 in 1915-16.

Comptroller-General, W. Temple Franks, C.B. ...£1,500
Private Secretary, A. J. Martin.....£100
Registrar of Designs and Trade Marks, R. Griffin £1,100
Chief Examiner, H. Hatfield, I.S.O. £1,200
Chief Clerk, P. G. L. Webb £1,000
Supervising Examiners, A. Cliff§; W. Martin; A. R. Wright; W. H. D. Clark .....£800 to £900
Principals, F. W. Hodges, £650 to £850; R. P. Chope; A. Neeves.....£650 to £800
Librarian, E. W. Hulme £650

PORT OF LONDON AUTHORITY.

Head Office, 109 Leadenhall Street, E.C.
Office for River Dept., 9 Carmelite Street, Victoria Embankment, E.C.

The Port of London Authority, established under the Port of London Act, 1908 (8 Edw. VII., ch. 68), on the 31st March, 1909, for the purpose of administering, preserving, and improving the Port of London, consists of 29 members—10 appointed and 28 elected, with a Chairman elected by the Authority.

The following undertakings were transferred to the Port Authority as from the 31st March, 1909:—Thames Conservancy (all rights, powers, and duties of the Conservators of the Thames in respect of the river below Teddington); London and India Docks Company; Surrey Commercial Dock Company; Millwall Dock Company; and Watermen's Company, except certain property and funds.

Chairman, The Lord Devonport.
Vice-Chairman, Lord Ritchie of Dundee.

Secretary, Frank Ayliffe.
Harbour Masters, (*Upper District*) Capt. D. R. Buchan, Temple Pier, W.C.; (*Lower District*) Capt. F. W. Kershaw, Gravesend.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and while efficiently discharging its multifarious duties, shows an annual profit of about £5,000,000. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The administrative expenses of the Post Office were estimated at £26,836,380 in 1915-16.

Postmaster-Gen., Rt. Hon. Herbert Samuel, M.P. £2,500
Private Secs., L.W. A. Atkin-Berry, £100; V. Macan, £200; Sir John Barran, Bart., M.P. .....*unp.*

Townshend; L. E. J. Maude; E. B. Davies; D. Spottiswoode; P. W. McIntyre; G. P. Hall; A. E. Stocker

£150 to £450

PRIVY COUNCIL OFFICE, Whitehall, S.W.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on p. 139. Members of the Cabinet must be Privy Councillors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, *q.v.* The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, Most Hon. the Marquess of Crewe, K.G. £2,000

Private Sec., G. Cunningham, C.B. £300

Asst. Private Sec., N. D. Bosworth-Smith.

£600 to £800

Solicitor, C. L. Nicholson ..... £1,200 to £1,500

Chief Clerk to do., D. F. Buckley ..... £400 to £700

QUEEN ANNE'S BOUNTY, 3 Dean's Yard, S.W.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignitaries, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants to meet benefactions awarded to benefices not exceeding £200 in net annual value. The total amount distributed in 1915 was about £28,000. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.

Chief Clerk, Wm. Lipscomb.

First Class Clerks (*Senior Division*), George Simpson; John F. Sapsford; V. Gonville Bromhead; R. G. Rowland; E. Jump.

Do. (*Junior Division*), M. Rogers; W. Russell; D. Smeaton; W. Holford; W. J. P. Smith.

Junior Clerks (*Upper Division*), A. G. Spencer; S. D. Knight.

Solicitor, F. G. Hughes.

Asst. Solicitor, W. G. Hannah.

Architect, William Alfred Hughes.

Auditor, H. C. Garlant, 33 Nicholas Lane, E.C.

RECORD OFFICE, THE PUBLIC,

Secretary, F. W. Geary.

* Temporarily seconded for special duty.
† Receives additional allowance of £100.
‡ Receives additional allowance of £80.
§ Receives additional annual allowance of £30.

TRADE, BOARD OF,
Whitehall Gardens and Gwydyr House, Whitehall, S.W.

A Board of Trade and Plantations was established by Charles II. in 1660, and in place of this body a Committee of the Council on Trade was established in 1786. The duties of this Committee (which, unlike the other Council Committees, has a president of its own) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the non-legal machinery of Bankruptcy, the Registration of Joint Stock Companies, Railway, Tramway, Water and Gas Companies, Electric Lighting, Harbours and Lighthouses, and Merchant Shipping, acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. In addition, it administers the Conciliation Act (1896) for the settlement of trade disputes, the Labour Exchanges Act of 1909, Part II. of the National Insurance Act, 1911 (Unemployment Insurance), and the Trade Boards Act, 1909. The administrative expenses were £205,739 in 1915-16.

Storekeeper (Poplar), C. J. Young £450

TREASURY, Whitehall, S.W.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1612. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner, is, *ex officio*, Leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor expounds to the House, these plans being accepted, modified, or rejected by the House.

First Lord of the Treasury—
The Rt. Hon. Herbert Henry Asquith, K.C., M.P. (*Prime Minister*) £5,000
Private Secs. to Prime Minister, M. Bonham-Carter, E. H. Marsh, C.M.G., D. Davies (*total allowance £1,500*); and Hon. C. H. Lyell, M.P. ..... *unp.*

Chancellor of the Exchequer—
Rt. Hon. Reginald McKenna, M.P. £5,000
Private Secs., H. P. Hamilton, £300; Alan Parsons £100

Junior Lords—
G. H. Roberts, M.P. £1,000
Hon. Geoffrey Howard, M.P. £1,000
W. C. Bridgeman, M.P. £1,000
Walter Rea, M.P. ..... *unp.*

Joint Secretaries—
Parliamentary, Joint, J. W. Gulland, M.P.; Lord Edmund Talbot, M.P. £2,000
Private Secs., R. H. Davies, C.B., £300; S. A. Sweetman, £100; Godfrey P. Collins, M.P. ..... *unp.*
Financial, Rt. Hon. E. S. Montagu, M.P. £2,000
Private Sec., A. McFadyean £150
Joint Permanent Secretaries:—
Sir Thomas L. Heath, K.C.B., F.R.S. £2,000
Private Sec., Visct. Cross £150
Sir John S. Bradbury, K.C.B. £2,000
Private Sec., S. D. Waley £150
Assistant Secretary, Sir Malcolm G. Ramsay, K.C.B. £1,500
Director of Financial Inquiries, H. Withers ... £
Asst. Sec. to Com. on Fresh Issues, D. F. Buckley £
Auditor of the Civil List, Sir Thomas L. Heath, K.C.B., F.R.S.

Clerk, W. T. Chard ... .£200 to £400

Fines and Penalties,
30 Abingdon Street, S.W.

Receiver, T. E. Kebbel, M.A.

TRINITY HOUSE, Tower Hill, E.C.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to this Corporation. Until 1854 all light dues were collected by Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren. The present duties of the Elder Brethren have reference to Lighthouses, Buoys, Beacons, Pilotage, &c., and attendance at the Admiralty Court to act as Assessors, also to advise the Board of Trade in nautical matters. There are ten Acting Elder Brethren, of whom one is a retired officer of the Royal Navy and nine retired Commanders of the Mercantile Marine; there is also one Elder Brother who has retired from the Active List and there are eleven Honorary Elder Brethren. The income of the Corporation derived from light dues levied on shipping entering and leaving British ports amounts to £300,000 per annum, which is expended in the maintenance of the Lighthouse and coast-marking system of England and Wales, under the financial control of the Board of Trade. The Corporation also administers certain charitable trusts specifically dedicated to the relief of decayed master mariners and their widows, the accounts in respect of which are rendered to the Charity Commissioners.

ELDER BRETHREN.

H.M. The King; *Master*, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.; *Deputy Master*, Capt. Sir H. Acton Blake, K.C.V.O.; Rt. Hon. Lord George Hamilton, G.C.S.I.; Rear-Admi. H. B. Stewart (*retired*); The Earl of Rosebery, K.G., K.T.; Capt. A. E. Bell; Capt. A. S. Thomson, C.B.; Capt. A. W. Clarke; Capt. R. Hoare; Capt. L. H. Crawford, C.B.; Rt. Hon. A. J. Balfour, M.P.; The Earl of Selborne, K.G., G.C.M.G.; Adm. H.S.H. Prince Louis of Battenberg, G.C.B.; Capt. O. P. Marshall; Capt. T. Golding; Rt. Hon. H. H. Asquith, K.C., M.P.; Maj. H.R.H. Prince Arthur of Connaught, K.G., K.T.; The Marquess of Crewe, K.G.; Capt. G. R. Mansell, R.N., M.V.O.; Rt. Hon. Winston Spencer-Churchill, M.P.; Capt. Owen Jones, R.N.R.

Secretary, H. G. Willett.

Assistant to Keeper, S. J. Camp .....£100 to £300
Inspector of Armouries, Sir Guy F. Laking, Bart., C.B., M.V.O., F.S.A. ..... *hon.*

WAR OFFICE, Whitehall, S.W.

A Secretary of State for War was first appointed in 1794, the control of the Land Forces of the Crown having been previously exercised by a Secretary at War, who was responsible to Parliament through the Home Secretary. In 1801 the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for that purpose. In 1904 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army Annual Act of 1909 (9 Edw. VII. c. 3).

For **Army Council** and Departments and Staffs of the **War Office**, *see* pp. 262–5.

Trustees, The First Commissioner of Works and the Rev. F. S. Webster (Rector of All Souls).
Treasurer, W. J. Downer, C.B., C.M.G., I.S.O.

NAVY ESTIMATES.

The Navy Estimates for 1915–16, as presented to Parliament, were unique. The *personnel* provided for numbered 250,000 (increased to 300,000 by a supplementary vote), while under each of the seventeen headings of expenditure there appeared: "Gross Estimate, £1,100; Appropriations in Aid, £100; Net Estimate, £1,000." The grand total was thus £18,700, less £1,700 appropriations in aid, leaving a net estimate of £17,000. The presentation of these dummy estimates was a matter of constitutional form. The actual cost of the Navy is between £500,000 and £600,000 a day. Our naval expenditure in 1805, the year of Trafalgar, was £15,035,630.

LANGUAGES OF THE WORLD.

Of the 1,623,000,000 inhabitants of the globe about 600,000,000 speak the principal European tongues, of which English has the largest number of adherents through the predominance of that tongue in the British Dominions and in the United States of America. The principal European tongues are divided approximately as follows:—

Language	People.
English	160,000,000
German	110,000,000
Russian	100,000,000
French	70,000,000
Spanish	50,000,000
Italian	50,000,000
Portuguese	25,000,000

For Scotland, *see* p. 525 For Ireland, *see* p. 527.

APPELLATE TRIBUNALS.

House of Lords.

The Lord High Chancellor.

COST OF THE PRISON SERVICE.—The total cost of the Prison Service in England and Wales and the British Dominions in 1914-1915 was £799,990, reduced by Appropriations in Aid, £22,000 (proceeds of Prison Labour £18,000, Sale of Refuse, etc., £4,000), to a net total of £777,990, a decrease of £5,900 on the net total for 1913-1914. *Salaries and Allowances* account for £24,900; *Clothing, Bedding and Furniture*, £44,490; *Lighting, Water and Cleaning Articles*, £29,900; *New Buildings and Alterations*, £41,160; *Travelling and Removal Expenses of Officers*, £5,000; *Incidental Expenses*, £7,900; *Establishments in the Dominions*, £600. The estimates provide for 2,700 convicts, 14,000 ordinary prisoners, 80 in State inebriate reformatories, 1,000 in Borstal institutions, and 350 in preventive detention.

(a) The amount of the *Net Estimate* is obtained by deducting from the *Gross Estimate* certain *Estimated Receipts* (Cash and Stamps received, mainly under Classes II. and III.) and *Appropriations in Aid* as follows:—Under Class I.—Receipts at the Convalescent Home at Osborne, £2,200; Rents and Licences for letting chairs, &c., £13,000; Sale of Ordnance Survey Maps, £19,200. Class II.—Foreign Office (Passport) fees, £1,500; Board of Trade fees, £26,692; Patents (stamp receipts), £250,000, Designs, £7,000, Trade Marks, £15,000; Mercantile Marine Office fees, &c., £65,575; Bankruptcy Department, £108,690; Board of Agriculture fees, £269,252; Royal Mint profit on coinage, £450,000. Class III.—Supreme Court fees, £47,200; County Court fees, £322,000; Proceeds of Prison Labour, £18,000; Scottish Court fees, &c., £47,250; Irish Police Tax, &c., £57,400; Payments in aid of cost of Royal Irish Constabulary, £47,580. Class V.—Consular Court fees, &c., £106,120. Class VI.—Fees for honours and dignities, £5,050 (exclusive of £2,000 stamp duty on dignities conferred). Tower of London, Admission fees, £2,500.

Trade Organisation.

Constructive work of the highest importance has been undertaken with enthusiasm by the Board of Trade as a result of the war, and the Commercial Intelligence Branch of the Department is now very definitely attempting the organisation of British trade. The headquarters of the Branch are at 73, Basinghall Street, London. The Branch supplies generally information on such subjects as contracts abroad open to tender, demand for particular articles abroad, lists of importers and agents, methods of distribution, lists of home manufacturers of special articles, statistics, and the various conditions affecting foreign trade. A special Advisory Committee on Commercial Intelligence has been appointed, which includes official representatives of the Dominions. A good reference library is available for consultation, and valuable commercial information is published from week to week in the *Board of Trade Journal*. A special register is compiled, and firms paying a fee of one guinea to the Board receive, in addition to the Journal of the Board, special confidential information on the branches of trade in which they are interested, either as manufacturers or exporters. A British Industries Fair, similar to the Leipzig Fair, has been organised since the war, and the following steps have been taken to assist British firms to capture trade formerly in the hands of German and Austro-Hungarian competitors:—

(1) The collection and exhibition of samples of German and Austrian goods from abroad.

(2) The inauguration of "exchange meetings," trade by trade, for the exhibition of goods hitherto obtained from Germany and Austria-Hungary, at which British manufacturers have been able to meet former dealers in such goods.

(3) The issue of special memoranda giving information regarding possible developments in certain important trades.

(4) The issue of lists of articles in respect of which inquiries have been received for the names of

(*a*) Manufacturers, and
(*b*) Buyers.

The names of the firms concerned are furnished upon application to the Branch.

(5) The formation of a loan collection of foreign catalogues in the various trades, designed to show British manufacturers what steps have been taken by foreign firms with a view of pushing their trade in overseas markets.

Trade Commissioners have been appointed in S. Africa, Australia, New Zealand, and Canada to foster United Kingdom trade with these Dominions. They answer inquiries from manufacturers, and periodically visit the United Kingdom to interview firms interested in trade with the countries in which they are stationed. In the spring of 1915 Mr. Hamilton Wickes, H.M. Trade Commissioner in Canada, visited this country, and gave interviews to nearly 1,000 firms.

THE KING-EMPEROR. (*Admiral of the Fleet*, May 7, 1910.)

Personal Aide-de-Camp to the King, Admiral H.S.H. Prince Louis Alexander of Battenberg, G.C.B., G.C.V.O., K.C.M.G.

First and Principal Aide-de-Camp to the King, Admiral Sir George A. Callaghan, G.C.V.O., K.C.B.

Naval Aides-de-Camp to the King, Captains Sir A. J. H. Hughan, Bt., R. J. B. Keyes, C.B., M.V.O., L. Halsey, C.M.G., T. Jackson, C.B., M.V.O., E. S. Alexander-Sinclair, M.V.O., D. R. L. Nicholson, G. P. W. Pope, W. E. Goodenough, M.V.O., L. E. Power, M.V.O., Hon. V. A. Stanley, M.V.O.

Marine Aides-de-Camp to the King, Col. Sir George G. Aston, K.C.B., R.M.A., Col. Alfred E. Marchant, C.B., R.M.L.I.

Chaplain in Ordinary to the King, Ven. Archdeacon Hugh S. Wood, D.D.

EXPENDITURES AND PERSONNEL, 1914-15.

Navy.	£	Personnel.
British	52,550,000	151,000
American	30,331,364	67,644
Russian	26,149,294	59,427
German	23,284,531	79,386
French	25,387,306	69,585
Italian	10,313,009	40,063
Japanese	10,023,919	50,645
Austro-Hungarian	7,408,196	23,012

WEIGHT OF A BROADSIDE.

The increase in the weight of a broadside fired by the Dreadnought and by the super Dreadnoughts is shown in the following table. The 12-inch gun of the *Dreadnought* fired a projectile weighing 850 lb., the 15-inch gun of the *Queen Elizabeth* fires a projectile weighing 1,925 lb.

Ship.	Broadside.	
	Guns.	Weight.
Queen Elizabeth (1913)	8 15-in.	15,400 lb.
King George V. (1911)	10 13·5-in.	14,000 lb.
Orion (1910)	10 13·5-in.	12,500 lb.
Neptune (1909)	10 12-in.	8,500 lb.
Dreadnought (1906)	8 12-in.	6,800 lb.

SHIPS OF THE ROYAL NAVY, 1 NOV. 1914.

Many vessels have since been added, but no particulars of these have been issued by the Admiralty.
Typical Ships in *italic*; Turbine Engines are signified thus §; Oil fuel thus °.

RIVER OR COAST SERVICE MONITORS.—Humber, Mersey and Severn (1914). 1,260 tons, 11½ knots. Two 6-in. guns and two 4·7-in. howitzers. Were building for Brazil and taken over at beginning of the war, as also were Agincourt and Erin (battleships), Faulknor and Broke (flotilla leaders), and other vessels as to which no official announcement has been made. A large number of monitors of various types have been completed since the outbreak of the war.

PERSONNEL OF THE FLEET.—The number of officers and men voted for all purposes (including the R.N. Division) is 300,000, as compared with 120,000 voted and an average of 114,012 actually borne in the year of Trafalgar. On Sept. 18, 1915, the sea service officers were as follows:—

Executive Officers: Admirals of the Fleet, 3; Admirals, 12; Vice-Admirals, 24; Rear-Admirals, 55; Captains, 308; Commanders, 469; Temporary Commanders, 10; Lieutenant-Commanders, 745; Temporary ditto, 10; Lieutenants, 1,237; Temporary ditto, 8; Supplementary Lieutenant-Commanders, 23; Supplementary Lieutenants, 69; Sub-Lieutenants, 359; Acting Sub-Lieutenants, 92; Mates, 148; Midshipmen, 856; Chief Gunners, 239; Gunners, 1,082; Chief Boatswains, 119; Boatswains, 281; Chief Signal Boatswains, 5; Signal Boatswains, 98; Warrant Telegraphists, 39; Acting Warrant Officers, 3.

Engineer Officers: Engineer Vice-Admiral, 1; E. Rear-Admirals, 9; E. Captains, 21; E. Commanders, 294; E. Lieut.-Commanders, 293; E. Lieutenants, 195; Temporary E. Lieutenants, 92; Temporary E. Sub-Lieutenants, 24; Mates (E.), 42; Chief Artificer Engineers, 214; Artificer Engineers, 589; Warrant Mechanicians, 52; Warrant Electricians, 24.

THE ROYAL NAVAL AIR SERVICE, under Rear-Admiral C. L. Vaughan-Lee, Director of Air Services, comprised the following officers: Wing Captains, 2; Wing Commanders, 12; Squadron Commanders, 33; Flight Commanders, 58; Flight Lieutenants, 103; Flight Sub-Lieutenants, 402; Warrant Officers, 97. This gives a total of 707 officers in Sept., 1915, as compared with 197 in Oct., 1914.

STATIONARY SHIPS.

Actæon and *Actæon II.*	Torpedo School, Sheerness.
Columbine	Flagship, Rosyth.
Cormorant	Flagship, Gibraltar.
Defiance	Torpedo School, Devonport.
Egmont	Flagship, Malta.
Excellent	Gunnery School, Portsmouth.
Fisguard	Boy Artificers, Portsmouth.
Ganges	Training Ship, Harwich.
Impregnable	Training Ship, Devonport.
Indus	Boy Artificers, Devonport.
Pembroke	Flagship, Chatham.
Powerful	Training Ship, Devonport.
President	Blackfriars, Adm. Service.
Vernon	Torpedo School, Portsmouth.
**Victory*	Flagship, Portsmouth.
Vivid	Depôt, Devonport.
Wildfire	Depôt, Sheerness.

* H.M.S. *Victory*, Nelson's Flagship at the battle off Cape Trafalgar (Oct. 21, 1805), was a first-rate 100-gun ship of the line.

Clerks,
Medical Officer, J. Damer Priest, M.D.

*The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses marked * in the following pages preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income; they are consequently suffering more or less from the agricultural depression of recent years.*

*Canterbury. £15,000.

MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Birmingham; Chichester; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwark; Southwell; St. Albans; St. Asaph; St. Davids; Truro; Worcester; Chelmsford; St. Edmundsbury & Ipswich.
Apparitor-General (vacant).

Lower House.

Prolocutor, Ven. J. E. Stocks, D.D.
The Very Rev. the Deans; the Venerable the Archdeacons; and the Elected Proctors.
Registrar, F. H. Lee.
Actuary, K. J. Muir Mackenzie.

PROVINCE OF YORK.—Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of Durham; Ripon; Chester; Newcastle; Wakefield; Liverpool; Manchester; Carlisle; Sodor and Man; Sheffield.

Lower House.

Prolocutor, Rt. Rev. the Bishop of Beverley, D.D.
The Very Reverend the Deans of the Province; the Venerable the Archdeacons; and the Elected Proctors.
Registrar, A. V. Hudson.

THE HOUSES OF LAYMEN.

The House of Laymen for the Province of Canterbury, as also for that of York, consists of members elected by the various Diocesan Conferences, who are themselves elected by the Laity of their respective Parishes or Rural Deaneries. The members are elected with every fresh Parliament.

St. Patrick's National Cathedral, Dublin.

Dean and Ordinary, Very Rev. Charles Thomas Ovenden, D.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. Wm. Colquhoun, B.D. ; Ven. I. K. Latham, D.D. ; Capt. R. Wade Thompson ; J. A. Macouchy.

Secretary to the Representative Church Body (incorporated 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the General Synod, which meets annually.

Subject to the General Synod are 23 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz. :—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the Representative Body, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on 31 Dec., 1913, was only £251,944, charged with annuities to 68 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,469,763, made up of *Commutation* £251,944, *Parochial Sustentation* £6,025,208, *Episcopal Sustentation* £563,674, *Glebes capital* £482,347, and *Miscellaneous purposes* £2,710,265.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £7,718,419. The interest of the Parochial Sustentation Fund is approximately £217,497. The total amount of *assessment* for stipend paid by parishes, 1913, was £97,192, and the total amount paid for *stipends* under Diocesan Schemes was £281,029.

The number of members of the Church of Ireland, by the Census of 1911, was 524,375, or 12·0 per cent. of the entire population.

Registrar of the Episcopal Synod, George J. Wood, W.S., 14 Young Street, Edinburgh.

Churches, Mission Stations, &c., 419. Parsonages, 195. Clergy, 354. Communicants, 55,897.

The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are over 1,800 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1914 was 718,719. The sum of £543,604 was raised in 1914 for church and missionary purposes. Within the last 50 years 476 chapels, at a cost of £1,757,700, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,460. There are in addition 287 churches and mission stations, in all of which worship is regularly conducted. The Presbyterian form of Church government as first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688 Presbyterianism regained the legal establishment, which it still preserves.

LORD HIGH COMMISSIONER, Marquess of Aberdeen.

MODERATOR, 1915, Right Rev. David Paul, D.D. University of Edinburgh.

Principal Clerk, Rev. David Paul, D.D., Edinburgh.

Depute Clerk, Rev. J. A. McClymont, D.D., Edinburgh.

Procurator, Christopher N. Johnston, K.C., LL.D.

Agent, A.L. Menzies, W.S., 54 Castle St., Edinburgh.

Parliamentary Solicitor, A. H. Spens.

OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1914, there were 1,529 congregations and 36 preaching stations. The total membership was 512,003, and there were 2,224 Sunday Schools, with 223,599 scholars and 24,055 teachers. In 15 Foreign Mission Fields there are 377 European Mission Agents and 5,093 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,119,592.—*Moderator*, Rev. A. R. MacEwen, D.D.—*Offices*, 121 George Street, Edinburgh.

(2) *The Presbyterian Church in Ireland.*—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 439,876. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 650 ministers, 563 congregations, with 104,077 communicants, 86,206 families, 7,785 Sabbath-school teachers, and 105,441 scholars. During the year 1914-1915 this branch contributed by congregational effort £226,016 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £292,955. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 14 professors and 2 lecturers, and has 35 ministerial with 4 medical missionaries in foreign parts.—*General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast.

(3) *The Presbyterian Church of England* has 12 presbyteries, 356 congregations, 6 preaching stations, and 88,166 members. It has a Theological College (Westminster College, Cambridge), and supports 95 missionaries abroad, including 40 women. In 1914 the amount raised for all purposes was £267,782.—*Church Offices:* 7 E. India Avenue, E.C. *General Secretary*, Rev. W. M. Macphail, M.A. *Financial Sec.*, John Leggat. *Publications Office*, 21 Warwick Lane, Paternoster Row, E.C.

(4) The less numerous divisions are: The *Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Welsh Calvinistic Church.

The WELSH CALVINISTIC METHODIST CONNEXION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is Presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England, *q.v.* At the present time the body numbers—churches, 1,473; chapels and places of worship, 1,664; ministers and preachers, 1,327; deacons, 6,584; communicants, 183,854; on probation, 2,465; Sunday-school teachers, 28,243; scholars and teachers, 213,946; number belonging to the congregations (including communicants), 337,294. A sum amounting to £287,416 8s. 4d. was collected for various religious purposes in 1912. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language generally used in these schools. There are 339 English chapels and preaching stations with 29,095 communicants; all the rest are Welsh.—*Moderator of General Assembly*, Rev. John Williams. *Secs.*, Revs. E. P. Jones, B.A., Cardiff, and T. Charles Williams, M.A., Menai Bridge. *Statistical Sec.*, Rev. E. Jones Evans, Walton, Liverpool.

The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. Membership of the Society is through connexion with a "class meeting," in which religious experience is narrated, suitable advice or instruction being given by the "class-leader." The question of some modification of the present terms of membership was discussed by the Conference of 1911, and a scheme was remitted to the various Synods for consideration and report in 1912, but no change was made. When Wesley died the number of members was 76,968, and since then the increase has been so great that about 18,000,000 people are now receiving Methodist instruction in various parts of the world.—*Pres.*, Rev. Dr. R. Waddy Moss; *Sec.*, Rev. S. Johnson.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings" the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. J. D. Thompson.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists, which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev. J. B. Stedeford; *Secretary*, J. A. Loram.

INDEPENDENT METHODISTS.

4. *Independent Methodists.*—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805. —*President*, J. W. Johnson.

FINANCES.

Finances.—The *Wesleyans* raised in 1914–15 £215,764 to sustain their very extensive missionary operations. At the same time their Home missionary income was £39,456; and £16,815 was expended on the training of candidates for the ministry, of whom there are 245 in the four theological colleges. The *Primitive Methodists* raised £21,881 for new chapels, and the *United Methodist Church* £15,990 for their missions.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.	Ministers	Lay Preachrs.	Members	On Pro-bation.	Chapels.	Sunday Scholars.
Wesleyan Methodists	2,820	20,064	506,535	24,264	8,493	922,773

The Independents and the Baptists.

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902. There are 51 county and other Associations in England and Wales, with 4,713 churches and preaching stations containing 1,723,143 sittings; the number of ministers in the British Isles is 3,125. Of these 204 are temporarily without pastoral charge, 96 are engaged in collegiate and tutorial duties, 38 are occupied in secretarial work, and 407 by reason of age or ill-heath have retired from pastoral duty. *Chairman of the Congregational Union of England and Wales*, 1915–1916, Sir Arthur A. Haworth, Bart. 1916–17, D. Burford Hooke, D.D. *Secretary*, Rev. Richard J. Wells. *Office*, 16, Memorial Hall, Farringdon Street, E.C.

The *Countess of Huntingdon's Connexion*, with 40 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Sec.*, E. Dolby Shelton. *Offices*, 41, Holborn Hall, Gray's Inn Road, W.C.

The BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1914, 4,208 chapels and 2,113 pastors. The members numbered 415,125, Sunday-school teachers 59,850, and Sunday scholars 561,844. In the U.S. the "members" alone number over 6,000,000. Special attention is now being given to Baptist advance in the East of Europe.—*President of the Baptist Union*, 1915–16, Rev. J. T. Forbes, M.A. *Sec.*, Rev. J. H. Shakespeare, M.A. *Office*, Baptist Church House Southampton Row, London, W.C.

SUFFRAGAN AND ASSISTANT BISHOPS OF THE CHURCH OF ENGLAND.

Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the **Unitarians**, with about 350 ministers, 345 chapels, and other places of worship. The **Society of Friends**, which consists of 19,962 members and about 10,000 other adherents in Great Britain and Australasia, and 2,308 in Ireland, has 355 recorded ministers, including over 130 women; their places of worship, in 1915, numbered 438. *Central Offices for Great Britain*, 136 Bishopsgate, E.C. Ireland has a separate organisation, with *Office*, 6 Eustace Street, Dublin. The **Churches of Christ** have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The **Moravians** (*Offices*, 32 Fetter Lane, E.C.) have in the U.K. 46 congregations and preaching stations with 3,959 communicants. The **Catholic Apostolic Church** have above 80 churches; the New Church (**Swedenborgian**), 75 societies, with about 6,700 registered members; the Latter-Day Saints (**Mormons**) have 82 churches. The Brethren, or **Plymouth Brethren**, have 23 places of worship in London and the suburbs. Among the inhabitants of the United Kingdom are about 245,000 **Jews**, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. Chief Rabbi's Office (*pro tem.*), Mulberry Street, Commercial Road, E. The Jews support their own poor. Their number throughout the world is computed at thirteen millions. The **Greeks** have churches in London, Manchester, Liverpool, and Cardiff. The **Armenians** have churches in London and Manchester; the **French, Dutch, Swedes, and Swiss** in London, Norwich, and Canterbury; and there is a mosque for **Moslems**.

The Salvation Army.

THE SALVATION ARMY was founded by General William Booth (*b.* 1829, *d.* 1912), and is one of the most recent religious denominations, and one of the most successful. In Dec., 1913, the number of *Officers, Cadets* and *Employés* was 22,152, of *Corps* and *Outposts* 9,516, *Local Officers* 55,250. The number of countries occupied was 53, and of languages used 35. Connected with the Salvation Army are numerous philanthropic institutions, including 116 Rescue Homes for Fallen Women, 25 Maternity Homes and 49 Children's Homes, 149 Slum Posts, 17 Prison-Gate Homes, 272 Shelters and Cheap Food Depôts for the Homeless, 195 Workshops and Factories, 112 Labour Bureaux, 28 Farms, &c. 33,498 open-air meetings are held weekly, and a still larger number in the various halls of the organisation. At a large number of police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria St., E.C.—GENERAL, Bramwell Booth (1912), 101 Queen Victoria St., London, E.C.

Moral Training for the Young.

THE BOYS' BRIGADE.

THE senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every Company is connected with a Church or other Christian body. The total strength throughout the world is 2,300 Companies with 120,000 officers and boys. *Secretary*, Roger S. Peacock, 34 Paternoster Row, E.C.

CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish Church; was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 300,000 lads have had the advantage of the Brigade's training, and to-day there are 1,200 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C. *Secretary*, W. M. Gee.

BOY SCOUTS.

A Movement, now Incorporated by Royal Charter, initiated and organised by Lt.-General Sir Robert Baden-Powell, K.C.B., K.C.V.O., Chief Scout. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene. During the War the utility of the Movement has been demonstrated by the employment of 50,000 of the Boy Scouts on war work, 15,000 of whom have joined the Colours, and 1,900 of whom have been continuously employed on coastguard work under the Admiralty. The Movement has taken root in all parts of the British Empire, while all the Allies, together with Spain, Holland, and the United States, have adopted it.

THE UNIVERSITY OF OXFORD.

UNIVERSITY OFFICERS, &c.

Chancellor, The Earl Curzon of Kedleston, D.C.L., *All Souls* ..... Elect. 1907
High Steward, The Earl of Halsbury, D.C.L., *Merton* 1896
Vice-Chancellor, Very Rev. T. B. Strong, D.D., Dean of *Ch. Ch.* 1913
Proctors, E. Hilliard, M.A., *Balliol*; J. D. Beazley, M.A., *Ch. Ch.* .....
Burgesses, R. E. Prothero, M.A., *All Souls*, 1914; Lord Hugh R. H. Cecil, M.A., *Hertford* 1910
Assessor of the Chancellor's Court, Sir E. J. Trevelyan, D.C.L., *All Souls* 1910
Deputy Steward, Sir T. Raleigh, K.C.S.I., D.C.L., Fellow of *All Souls*..... 1905
Public Orator, A. D. Godley, M.A., *Magdalen* 1910
Member of the Medical Council of the United Kingdom, A. Thomson, M.A., *Exeter* 1899
Bodley's Librarian, Falconer Madan, M.A., *Brasenose* 1912
Sub-Librarians, A. E. Cowley, D.Litt., *Magdalen*, 1899; H. H. E. Craster, M.A., *All Souls* 1912
Keeper of Archives, R. L. Poole, M.A., *Magd.* 1909
Radcliffe's Librarian, W. H. Jackson, M.A., D.Sc., *New Coll.* 1900
Keeper of the Ashmolean Museum, D. G. Hogarth, M.A., *Magdalen* 1909
Keeper of Art Galleries, C. F. Bell, M.A., *Magdalen*..... 1909
Registrar of the University, C. Leudesdorf, M.A., *Pembroke* 1906
Assistant Registrar and Secretary to the Boards of Faculties, E. S. Craig, M.A., *Univ.*..... 1907
Radcliffe Observer, A. A. Rambaut, D.Sc. (Dublin), *Queen's* 1897
Secretary to the Curators of the University Chest and Board of Finance, William B. Gamlen, M.A., *Exeter* 1873
Acting Curator of Sheldonian Theatre, Rev. C. H. O. Daniel, D.D., *Worcester* ...
Acting Curator of Schools, Rev. G. B. Cronshaw, M.A., *Queen's* 1910
Registrar of the Chancellor's Court, John D. Peel, M.A., *Magd.* 1908
Coroners of the Univ., W. T. Brooks, M.A., *Ch. Ch.* 1899; F. E. Marshall, M.A., *St. John's* 1908
University Counsel, George J. Talbot, K.C., M.A., *All Souls* 1913
Solicitor, John D. Peel, M.A., *Magd.* 1908
Bedels, H. M. Lodge, *Divinity*; (vacant), *Medicine*; E. Parker, *Law*; W. Moon, *Arts* .....
Organist, F. Iliffe, D.Mus., *St. John's* 1900
Clerk of the University, E. H. Bellamy..... 1900
Secretary to Delegates of—
Examination of Schools, P. E. Matheson, M.A., *New Coll.*; R. H. Owen, M.A., *Worcester Coll.*
Extension of Teaching, J. A. R. Marriott, M.A., *New Coll.*
Local Examinations, H. T. Gerrans, M.A., *Worcester.*
University Museum, Prof. H. L. Bowman, D.Sc., *Magdalen.*
University Press, C. Cannan, M.A., *Trinity.*
Women Students, R. W. Jeffery, M.A., *Brasenose* 1911
Secretary of—
Committee for Appointments, N. Waterfield, M.A., *New Coll.*
The Rhodes Trustees, F. J. Wylie, M.A., *Brasenose.*
The Trustees of the Oxford Endowment Fund, Nigel Bond, M.A., *Magdalen*, 49 Sloane Square, London, S.W.
Association for Education of Women, Miss Rogers, Old Clarendon Building.

HEBDOMADAL COUNCIL.

Official Members, The Chancellor; Vice-Chancellor; Proctors.
Heads of Houses, The President of *Magdalen*; Warden of *New Coll.*; Warden of *Wadham*; Warden of *All Souls*; President of *St. John's*; Principal of *St. Edmund Hall.*
Professors, The Professor of Exegesis; the Waynflete Professor of Pure Mathematics; the Vinerian Professor of English Law; the Waynflete Professor of Physiology; the Gladstone Professor of Political Theory; the Reader in Indian Law.
Members of Convocation, H. T. Gerrans, M.A.; E. M. Walker, M.A.; G. B. Cronshaw, M.A.; C. G. Robertson, M.A.; A. D. Godley, M.A.; E. Barker, M.A.

PROFESSORS.

SOMERVILLE COLLEGE.

Principal, Miss E. Penrose, M.A
Vice-Principal, Hon. Alice Bruce, M.A.
Bursar, Miss H. Walton.
Librarian, Miss V. Farnell.

ST. HUGH'S COLLEGE.

Principal, Miss Eleanor Jourdain.
Vice-Principal, Miss Cecilia M. Ady.
Librarian, Miss Thomas.

ST. HILDA'S HALL.

Principal, Miss Burrows.
Vice-Principal and History Tutor, Miss A. E. Levett.
Bursar, Miss V. L. Winslow.

SOCIETY OF OXFORD HOME STUDENTS.

Chairman, Prof. W. M. Geldart, M.A., B.C.L.
Prin. Mrs. A. H. Johnson, 5 South Parks Rd., Oxford.

THE UNIVERSITY OF CAMBRIDGE.

Chancellor, The Lord Rayleigh, O.M., M.A., Hon. Sc.D., *Trin.* ..... Elect. 1908
Vice-Chancellor, T. C. Fitzpatrick, M.A., President of *Queens'* 1915
High Steward, The Lord Walsingham, LL.D., *Trin.* 1891
Deputy High Steward, The Rt. Hon. Lord Parker of Waddington, M.A., *King's* 1915
Representatives in Parliament, J. F. P. Rawlinson, LL.M., K.C., *Trin.*, 1910; Professor Sir J. Larmor, M.A., *St. John's* ... 1911
Commissary, J. F. P. Rawlinson, LL.M., K.C., *Trin.* 1900
Public Orator, Sir J. E. Sandys, Litt.D., *St. John's* 1876
Registrary, J. N. Keynes, Sc.D., *Pemb.* 1910
Assistant Registrary, B. Benham, M.A., *King's* 1889
Librarian, F. J. H. Jenkinson, M.A., *Trin.* 1889
Sec. to the Library, H. G. Aldis, M.A., *Pet.* 1915
Counsel, J. A. Foote, K.C., M.A., *St. John's*, 1915; M. L. Romer, K.C., M.A., *Trin. H.* 1915
Esquire Bedells, A. H. Evans, M.A., *Clare*, 1900; R. Hamblin Smith, M.A., *Pet.* 1913
Proctors, A. Munro, M.A., *Queen's*; F. M. Rushmore, M.A., *St. Cath.* 1915
Organist, A. H. Mann, Hon. M.A. (*King's*), Mus.D. (*Oxf.*) .....
Director of the Observatory, Professor A. S. Eddington, M.A., *Trin.* .....
Director of the Solar Physics Observatory and Newall Observer, Professor F. H. Newall, M.A., *Trin.* .....
Superintendent of the Museum of Zoology, C. F. Cooper, M.A., *Trin.* .....
Director of the Fitzwilliam Museum and Marlay Curator, S. C. Cockerell, M.A., *Jesus* .....
Strickland Curator, H. Gadow, M.A., *King's*
Curator in Entomology, H. Scott, M.A., *Trin.*
Curator of the Museum of Archæology and Ethnology, Baron A. von Hügel, M.A., *Trin.*
Curator of the Museum of Classical Archæology, A. B. Cook, M.A., *Queen's* .....
Curator of the Botanic Garden, R. I. Lynch, Hon. M.A. .....
Librarian of Squire Law Library, A. H. Johnson, M.A., *Emman.* .....
Representative on General Medical Council, Sir T. Clifford Allbutt, K.C.B., M.D., *Caius*
Director of the Psychological Laboratory, C. S. Myers, M.D., Sc.D., *Caius* .....
Director of Military Studies, Lt.-Col. W. K. Shirley .....

COUNCIL OF THE SENATE.

Official Members, The Chancellor; Vice-Chancellor.
Heads of Colleges, The Master of *Gonville and Caius*; The Provost of *King's*; The Master of *St. John's*; The President of *Queens'*.
Professors, Professor Sir J. Larmor, *St. John's*; Professor Hobson; Professor Sorley; Professor Seward.
Other Members of the Senate, Dr. F. H. A. Marshall (*Christ's*); Dr Parry (*Trin.*); Dr. Keynes (*Pemb.*), *Sec.*; Dr. Tanner (*St. John's*); W. Durnford, M.A. (*King's*); W. L. Mollison, M.A. (*Clare*); J. H. Gray, M.A. (*Qu.*); H. McL. Innes, M.A. (*Trin.*).

PROFESSORS.

Agricultural Botany, R. H. Biffen, M.A., *Cath.* ..... Elect. 1908
Agriculture (*Drapers*) T. B. Wood, M.A., *Cai.* 1907
Anatomy, A. Macalister, M.D., *St. John's*... 1883
Ancient History, J. S. Reid, Litt.D., *Caius* 1899

Micklem. *By Inner Temple*, Lord Justice Swinfen Eady. *By Middle Temple*, R. A. McCall. *By Gray's Inn*, Mr. Justice Atkin. *By Law Society*, J. W. Budd, Sir Henry Johnson. *By Corporation of London*, Alderman Sir Thomas B. Crosby. *By London County Council*, Sir Wm. Collins, Cyril Jackson. *By City and Guilds of London Institute*, R. C. Palmer. *By the Faculties—*(*Theology*), Rev. Prof. S. W. Green; (*Arts*), Rev. Prof. A. Caldecott, Prof. M. J. M. Hill, Prof. W. P. Ker, Miss M. J. Tuke; (*Laws*), G. H. J. Hurst; (*Music*), Prof. Sir Frederick Bridge; (*Medicine*), H. L. Eason, Sir Wilmot P. Herringham, H. J. Waring; (*Science*), Prof. A. W. Crossley, J. L. S. Hatton, Prof. A. D. Waller, Prof. W. W. Watts; (*Engineering*), Prof. W. E. Dalby; (*Economics*), Prof. Graham Wallas.

ORGANISATION OF TEACHING.

On January 1, 1907, University College was transferred to the University, of which it now forms an integral part in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On January 1, 1910, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, but is divided into two separate institutions, viz.: (*a*) "King's College" (in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics) and (*b*) "King's College for Women" (in the Faculties of Arts and Science). The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other Institutions maintained by the University are the Brown Animal Sanatory Institution in Wandsworth Road, the Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, and the Francis Galton Laboratory for National Eugenics at University College.

UNIVERSITY COLLEGE, Gower Street, W.C.
Chairman of Committee, Lord Reay, K.T., G.C.S.I.
Provost, T. Gregory Foster, Ph.D.

KING'S COLLEGE, Strand, W.C.
Chairman of Delegacy, Viscount Hambleden.
Principal, R. M. Burrows, D.Litt.

KING'S COLLEGE FOR WOMEN.
Household and Social Department, Campden Hill Road, W.
Warden, Miss F. R. Shields, M.A.

GOLDSMITHS' COLLEGE, New Cross, S.E.
Warden, William Loring, M.A.

TEACHING STAFF.

PROFESSORS.

Accounting and Business Organisation, L. R. Dicksee, M.Com.
Agricultural Zoology, F. V. Theobald, M.A.
Anatomy, E. Barclay-Smith, M.D.; J. E. S. Frazer, F.R.C.S.; F. W. Jones, D.Sc.; F. G. Parsons, F.R.C.S.; G. D. Thane, LL.D.; William Wright, D.Sc.
Applied Mathematics and Mechanics (*Goldsmid*), L. N. G. Filon, D.Sc., F.R.S.
Applied Physics, S. P. Thompson, D.Sc., F.R.S.
Archæology (*Yates*), E. A. Gardner, Litt.D.
Do., Assyrian and Babylonian, L. W. King, Litt.D
Architecture, F. M. Simpson, F.R.I.B.A.
Bacteriology, William Bulloch, M.D.; R. T. Hewlett, M.D.
Bio-chemistry, Arthur Harden, D.Sc., F.R.S.
Botany, Miss M. J. Benson, D.Sc.; W. B. Bottomley, Ph.D.
Botany (*Quain*), F. W. Oliver, D.Sc., F.R.S.
Chemistry, A. W. Crossley, D.Sc., F.R.S.; J. T. Hewitt, D.Sc., F.R.S.; T. M. Lowry, D.Sc., F.R.S.; R. Meldola, D.Sc., F.R.S.; T. S. Moore, M.A.
Chemistry (*Daniell*), H. Jackson, F.I.C.
Chemistry, General, F. G. Donnan, Ph.D., F.R.S.
Chemistry, Organic, J. Norman Collie, LL.D., F.R.S.
Civil Engineering, A. H. Jameson, M.Sc.
Civil & Mechanical Engineering, E. G. Coker, D.Sc.; E. H. Lamb, M.Sc.
Classical Literature, W. C. F. Walters, M.A.
Commerce, A. J. Sargent, M.A.
Comparative Law (*Quain*), Sir John Macdonell, K.C.B., LL.D., F.B.A.
Constitutional Law, J. H. Morgan, M.A.
Education, John Adams, LL.D.; J. W. Adamson, B.A.; T. P. Nunn, D.Sc.
Egyptology (*Edwards*), W. M. Flinders Petrie, D.C.L., F.R.S.
Electrical Engineering, J. A. Fleming, D.Sc., F.R.S.
Do. (*William Siemens*), Ernest Wilson, M.Inst.C.E.
Engineering, D. S. Capper, M.A.; W. E. Dalby, M.A., F.R.S.; H. M. Waynforth, M.I.Mech.E.
English History, A. F. Pollard, Litt.D.
English Lang. and Lit., Israel Gollancz, Litt.D., F.B.A.; Sir Sidney Lee, D.Litt., F.B.A.
English Lang. and Lit. (*Quain*), W. P. Ker, LL.D.
English Literature, Miss C. F. E. Spurgeon.

Ethnology, C. G. Seligman, M.D., F.R.C.P.
Eugenics (*Galton*), Karl Pearson, LL.D., F.R.S.
Experimental Pathology, C. J. Martin, D.Sc., F.R.S. ; Sir Almroth E. Wright, C.B., M.D., F.R.S.
Fine Art (*Slade*), Frederick Brown.
French & Romance Philology (*Fielden*), L. M. Brandin, Ph.D.
French Literature, G. Rudler, D.-ès-L.
Geology (*Yates-Goldsmid*), E. J. Garwood, Sc.D., F.R.S.
German, R. C. Priebsch, Ph.D. ; J. G. Robertson, Ph.D.
Greek, J. A. Platt, M.A.
Hygiene (*Chadwick*), H. R. Kenwood, C.M.
Do. and Public Health, W. J. R. Simpson, C.M.G., M.D.
Latin, H. E. Butler, M.A. ; D. A. Slater, M.A.
Mathematics (*Astor*), M. J. M. Hill, LL.D., F.R.S.
Mathematics, Harold Hilton, D.Sc. ; J. W. Nicholson, D.Sc. ; S. A. F. White, M.A.
Mediæval History, F. J. C. Hearnshaw, LL.D.
Metallurgy, A. K. Huntington, A.R.S.M.
Modern French History and Institutions, P. J. Mantoux, D.-ès-L.
Modern History (vacant).
Morbid Anatomy, S. G. Shattock, F.R.C.S.
Municipal Engineering (*Chadwick*), E. R. Matthews, A.M.Inst.C.E.
Music (*King Edward*), Sir Frederick Bridge, C.V.O., Mus.Doc.
Pathology, F. W. Andrewes, M.D., F.R.C.P.
Pharmaceutics, H. G. Greenish, F.I.C.
Pharmacology, A. R. Cushny, LL.D., F.R.S.
Philosophy of Mind and Logic (*Grote*), C. E. Spearman, Ph.D.
Physics, F. Horton, Sc.D. ; C. H. Lees, D.Sc., F.R.S.
Do. (*Quain*), W. H. Bragg, D.Sc., F.R.S.
Do. (*Wheatstone*), O. W. Richardson, D.Sc., F.R.S.
Physiology, F. A. Bainbridge, M.D. ; E. P. Cathcart, M.D. ; W. D. Halliburton, M.D., F.R.S.
Physiology (*Jodrell*), E. H. Starling, M.D., F.R.S.
Physiology (*and Director of the Physiological Laboratory*), A. D. Waller, M.D., F.R.S.
Physiology, General, W. M. Bayliss, D.Sc., F.R.S.
Political Economy, Edwin Cannan, LL.D. ; H. S. Foxwell, M.A.
Political Science, Graham Wallas, M.A.
Protozoology (vacant).
Public Administration, S. J. Webb, LL.B.
Sculpture, J. H. Thomas, M.A.
Sociology (*Martin White*), L. T. Hobhouse, D.Litt. ; E. A. Westermarck, Ph.D.
Statistics, A. L. Bowley, Sc.D.
Town Planning, S. D. Adshead, M.A.
Veterinary Pathology and Bacteriology, Sir John McFadyean, LL.D.
Zoology, Arthur Dendy, D.Sc., F.R.S.
Do. & Comparative Anatomy (*Jodrell*), J. P. Hill, D.Sc., F.R.S.

READERS.

Anatomy, John Cameron, M.D.
Ancient History, M. O. B. Caspari, M.A. ; J. K. Fotheringham, D.Litt.
Applied Physiology, G. A. Buckmaster, M.D.
Bacteriology, J. W. H. Eyre, M.D. ; J. C. G. Ledingham, M.A. ; J. H. Smith, M.B.
Biochemistry, Otto Rosenheim, Ph.D.
Botany, Miss E. N. Thomas, B.Sc.
Chemistry, H. Crompton, F.C.S. ; H. R. Le Sueur, D.Sc. ; F. G. Pope, D.Sc. ; C. K. Tinkler, D.Sc.
Economic History, Mrs. Knowles, Litt.D.
Education, Miss Sara Melhuish, M.A.
English Lang. & Lit., R. W. Chambers, D.Litt. ; P. G. Thomas, M.A.
English Law, G. H. J. Hurst, M.A.
Geography, H. J. Mackinder, M.A., M.P.
German, H. G. Atkins, M.A. ; W. Perrett, Ph.D. ; J. Steppat, Ph.D.
Graphics, W. H. Eccles, D.Sc.
Greek, J. M. MacGregor, M.A.
Helminthology, R. T. Leiper, D.Sc.
History, Miss H. Johnstone, M.A.
Logic and Ethics, Abraham Wolf, D.Lit.
Medical Statistics, Maj. Greenwood, M.R.C.S.
Meteorology, Sir Napier Shaw, Sc.D., F.R.S.
Morbid Anatomy, R. G. Hebb, M.D. ; H. M. Turnbull, D.M.
Mycology, E. S. Salmon.
Palæography and Economic History, Hubert Hall, F.S.A.
Pathology, L. S. Dudgeon, F.R.C.P. ; W. Hunter, M.D.
Pharmacology, Fred Ransome, M.D.
Phonetics, Daniel Jones, M.A.
Physical Chemistry, D. F. Spencer, D.Sc.
Physiological Chemistry, J. A. Gardner, M.A. ; R. H. A. Plimmer, D.Sc.
Physiology, Miss W. C. Cullis, D.Sc. ; J. S. Edkins, Sc.D. ; F. S. Locke, M.D. ; M. S. Pembrey, M.D. ; H. E. Roaf, D.Sc.
Plant Physiology, T. G. Hill, A.R.C.S.
Psychology, W. Brown, D.Sc. ; Miss B. Edgell, Ph.D.
Surveying, M. T. M. Ormsby, A.R.C.S.
Theory and Practice of Heat Engines, W. J. Goudie, B.Sc.
Thermodynamics, A. W. Porter, B.Sc., F.R.S.
Tibetan Language, F. W. Thomas, Ph.D.
Veterinary Hygiene, G. H. Wooldridge, F.R.C.V.S.
Zoology, W. G. Ridewood, D.Sc. ; H. W. M. Tims, M.D.

RECOGNISED TEACHERS.

The number of "Recognised Teachers" in the several Faculties is as follows :—

Theology, 24 ; *Arts*, 151 ; *Laws*, 15 ; *Music*, 22 ; *Medicine*, 351 ; *Science*, 216 ; *Engineering*, 70 ; *Economics*, 10.

DEANS OF THE FACULTIES, 1914–16.

Theology, Rev. W. T. Davison, D.D.
Arts, Prof. E. A. Gardner, Litt.D.
Laws, Prof. A. F. Murison, LL.D.
Music, F. J. Read, Mus. Doc.
Medicine, Sir A. P. Gould, K.C.V.O., F.R.C.S.
Science, Prof. W. W. Watts, Sc.D., F.R.S.
Engineering, Prof. Ernest Wilson, M.Inst.C.E.
Economics, Prof. A. J. Sargent, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology :—

New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.
Hackney College, Hampstead (Congregational).
Principal, Rev. P. T. Forsyth, D.D.
Regent's Park College, N.W. (Baptist).
Principal, Rev. G. P. Gould, D.D.
King's College (Theological Department), Strand, W.C. (Church of England).
Dean, Rev. A. Caldecott, D.D.
Wesleyan College, Richmond (Wesl. Methodist).
Principal, Rev. W. T. Davison. D.D.
St. John's Hall, Highbury (Church of England).
Principal, Rev. A. W. Greenup, D.D.

Arts, Science, and Engineering :—

East London College, Mile End Road, E.
Principal, John L. S. Hatton, M.A.

Arts and Science :—

Royal Holloway College, Englefield Green.
Principal, Miss Ellen C. Higgins, B.A.
Bedford College for Women, Regent's Park, N.W.
Principal, Miss M. J. Tuke, M.A.

Arts :—

Westfield College, Hampstead, N.W.
Principal, Miss A. de Sélincourt.

Arts—in Pedagogy only :—

London Day Training College, Southampton Row, W.C.
Principal, Prof. J. Adams, LL.D.

Medicine :—

The Medical Schools of certain Hospitals, &c. (*see* p. 303.)

Science and Engineering :—

Imperial College of Science and Technology.
(*See* p. 307.)

Science :—

Royal College of Science and Royal School of Mines.
Rector, Sir Alfred Keogh, K.C.B., LL.D.

Engineering :—

City and Guilds (Engineering) College.
Dean, Prof. W. E. Dalby, M.A., F.R.S., M.Inst.C.E.

Science—in Agriculture only :—

South-Eastern Agricultural College, Wye, Kent.
Principal, M. J. R. Dunstan, M.A., F.R.S.E.

Economics and Political Science :—

London School of Economics and Political Science, Clare Market, Kingsway, W.C.
Director, Hon. W. P. Reeves, Ph.D.

THE UNIVERSITY OF DURHAM. 1831.

Chancellor, The Duke of Northumberland, K.G.
Vice-Chancellor, Rev. H. Gee, D.D., F.S.A.
Proctors, P. P. Bedson, D.Sc.; A. Robinson, D.C.L.
Registrar, H. G. Theodosius, M.A.
Librarian, E. V. Stocks, M.A.
Observer, F. C. H. Carpenter, M.A.

UNIVERSITY COLLEGE, Durham.

Master, Rev. H. Gee, D.D.

HATFIELD HALL, Durham.

Principal, F. B. Jevons, D.Litt.

ST. CHAD'S HALL, Durham.

Principal, Rev. S. R. P. Moulsdale, M.A.

ST. JOHN'S HALL, Durham.

Principal, Rev. D. Walker, D.D.

WOMEN'S HOSTEL, Durham.

Principal, R. E. D. Donaldson.

NON-COLLEGIATE STUDENTS.

Censor, Rev. V. K. Cooper, M.A.

HOME STUDENTS (Women).

Censor, E. M. Ellershaw, B.A.

COLLEGE OF MEDICINE, Newcastle.

President, Sir G. H. Philipson, D.C.L.

ARMSTRONG COLLEGE, Newcastle.

Principal, W. H. Hadow, D.Mus.

DURHAM COLLEGES.

Divinity, Rev. R. J. Knowling, D.D.
Greek, Rev. A. H. Cruickshank, M.A.
Mathematics, Percy John Heawood, M.A.
Hebrew, Ven. H. W. Watkins, D.D.
Church History, Rev. Henry Gee, D.D., F.S.A.
Philosophy, Frank Byron Jevons, D. Litt.
Biblical Exegesis, Rev. Dawson Walker, D.D.
English Language and Literature, Rev. Henry Ellershaw, M.A.
Latin, Rev. John Hall How, M.A.
Logic and Psychology, Arthur Robinson, D.C.L.
Modern History, Very Rev. H. H. Henson, D.D. (Hon.)
Modern Languages, Chas. Fredk. Herdener, M.A.
Music, Joseph Cox Bridge, D.Mus.

COLLEGE OF MEDICINE, Newcastle, 1832.

Medicine, (*Principles and Practice*), Sir G. H. Philipson, D.C.L.; D. Drummond, D.C.L.; Sir T. Oliver, LL.D.
Do. (*Psychological*), T. W. McDowall, M.D.
Surgery, J. R. Morison, M.D.; H. B. Angus, M.S.
Ophthalmology, J. D. Wardale, B.S.
Midwifery, R. P. R. Lyle, M.D.
Pathology, S. McDonald, M.D.
Med. Jurisprudence, R. A. Bolam, M.D.
Public Health, T. E. Hill, B.Sc.
Anatomy, R. Howden, M.B.
Physiology, J. A. Menzies, M.D.
Materia Medica, W. E. Hume, M.D.
Therapeutics, Thomas Beattie, M.D.
Comparative Pathology, H. J. Hutchens. M.A.

ARMSTRONG COLLEGE, Newcastle, 1871.

Mathematics, C. M. Jessop, M.A.
Do., Applied, T. H. Havelock, D.Sc., F.R.S.
Physics, H. Stroud, D.Sc.
Chemistry, P. Phillips Bedson, D.Sc.
Geology, G. A. Lebour, D.Sc.
Zoology, A. Meek, M.Sc.
Botany, M. C. Potter, Sc.D.
Agriculture & Rural Econ., D. A. Gilchrist, M.Sc.
Classics, J. W. Duff, D.Litt.
Eng. Lang. & Literature, Allen Mawer, M.A.
Engineering, R. L. Weighton, D.Sc.
Electrical Engineering, W. M. Thornton, D.Sc.
Naval Architecture, J. J. Welch, M.Sc.
Mining & Surveying, Henry Louis, D.Sc.
Modern History, K. H. Vickers, M.A.
Mental and Moral Phils., Thomas Loveday, M.A.
Modern Languages, A. G. Latham, M.A.
Economics, H. M. Hallsworth, M.A., M.Com.
Education, Mark R. Wright, M.A.

THE VICTORIA UNIVERSITY OF MANCHESTER. (£2,000.)

Founded 1850; re-organised 1880 and 1903.
Chancellor, Viscount Morley of Blackburn, O.M.
Vice-Chancellor, Prof. Sir Henry A. Miers, D.Sc., F.R.S.
Treasurer, A. E. Steinthal, B.Sc.
Registrar and Senior Tutor (*Men*), Edward Fiddes, M.A.
Bursar, Sydney Chaffers, M.A.
Senior Tutor (*Women*), Phoebe Sheavyn, D.Lit.
Clerk of Convocation, W. Fletcher Shaw, M.D.

Faculty of Arts.

Greek, W. M. Calder, M.A.
Hellenistic Greek, J. H. Moulton, D.Lit.
Latin, R. S. Conway, Litt.D.; W. B. Anderson, M.A.
English Lit. & Language, C. H. Herford, Litt.D.; W. J. Sedgefield, D.Litt.
French, L. E. Kastner, M.A.
German, Arwid Johannson, M.A.
Semitic Languages, Maurice A. Canney, M.A.
Chinese, E. H. Parker, M.A.
Mediæval & Ecclesiastical History, T. F. Tout, M.A., F.B.A.
Ancient & Mediæval History, J. Tait, M.A.
Economic History, George Unwin, M.A.
Modern History, J. R. B. Muir, M.A.
Philosophy, S. Alexander, LL.D., F.B.A.
Education, J. J. Findlay, Ph.D.; H. Bompas Smith, M.A.
Economics, S. J. Chapman, M.A.
Architecture, A. C. Dickie, M.A., F.S.A.

Faculty of Science.

Mathematics, Horace Lamb, LL.D., F.R.S.
Physics, Sir Ernest Rutherford, K.C.I.E., D.Sc., F.R.S.; Arthur Schuster, Sc.D., F.R.S. (*hon.*).
Electro-Technics, Robert Beattie, D.Sc.
Engineering, J. E. Petavel, D.Sc., F.R.S.
Chemistry, H. B. Dixon, Ph.D., F.R.S.; A. Lapworth, D.Sc.
Metallurgy, C. A. Edwards, D.Sc.
Zoology, S. J. Hickson, D.Sc., F.R.S.

Botany, F. E. Weiss, D.Sc.
Do., Cryptogamic, W. H. Lang, D.Sc., F.R.S.
Geology, Sir T. H. Holland, K.C.I.E., D.Sc., F.R.S.; W. Boyd Dawkins, D.Sc., F.R.S. (*hon.*).
Chrystalography, Sir H. A. Miers, D.Sc., F.R.S.

Faculty of Law.

Professor, J. S. Seaton, B.C.L.

Faculty of Commerce.

Professors, S. J. Chapman, M.A.; and George Unwin, M.A.

Faculty of Music.

Dean, Thomas Keighley, Mus.D.

Faculty of Theology.

Biblical Criticism, A. S. Peake, D.D.; Maurice A. Canney, M.A.

Faculty of Technology.

Dean, J. C. Maxwell Garnett, M.A.
Electrical Engineering, Miles Walker, M.A.
Mechanical do., Allan B. Field, B.Sc.
Chemistry, E. Knecht, Ph.D.

Faculty of Medicine.

Anatomy, Grafton Elliot Smith, M.D., F.R.S.
Physiology, W. Stirling, M.D.
Materia Medica, R. B. Wild, M.D.
Pathology, H. R. Dean, M.D.
Medicine, Clinical, E. S. Reynolds, M.D.
Do., Systematic, George R. Murray, M.D.
Clinical Surgery William Thorburn, F.R.C.S.
Systematic Surgery, J. W. Smith, F.R.C.S.
Obstetrics & Gynæcology, A. Donald, M.D.
Forensic Medicine, William Sellers, M.D.
Public Health & Bacteriology, A. S. Delépine, M.B.

TRAINING DEPARTMENT (for Men and Women).
Professors, J. J. Findlay, Ph.D.; H. Bompas Smith, M.A.

THE UNIVERSITY OF BIRMINGHAM.

Birmingham, 1900. (£2,000.)

Chancellor (vacant).
Vice-Chancellor, Gilbert Barling, F.R.C.S.
Principal, Sir Oliver Lodge, D.Sc., F.R.S.
Vice-Principal & Registrar, Robert S. Heath, D.Sc.
Secretary, George H. Morley, M.Com.

PROFESSORS.

Faculties of Science, Arts, and Commerce.

Mathematics, R. S. Heath, D.Sc.
Physics (vacant).
Chemistry, P. F. Frankland, Ph.D., F.R.S.
Zoology, F. W. Gamble, D.Sc., F.R.S.
Botany, G. S. West. D.Sc.
Geology & Physiography, Wm. S. Boulton, D.Sc.
Mechanical Engineering, F. W. Burstall, M.A.
Civil Engineering, F. C. Lea, D.Sc.
Electrical Engineering, Gisbert Kapp, M.Sc.
Brewing, Adrian J. Brown, M.Sc., F.R.S.
Metallurgy, T. Turner, M.Sc.
Mining, J. Cadman, D.Sc.
Greek and Latin, E. A. Sonnenschein, D.Litt.
English Lang. & Lit., E. de Sélincourt, D.Litt.
Mental and Moral Philosophy, J. H. Muirhead, LL.D.
French (vacant).
German, Karl Wichmann, Ph.D.
History, C. R. Beazley, D.Litt.
Education, Alfred Hughes, M.A.
Music, Granville Bantock, M.A.
Commerce, W. J. Ashley, Ph.D.
Accounting, C. E. Martineau, M.A.
Finance, A. W. Kirkaldy, M.Com.
Commercial Law, F. Tillyard, M.Com.

Faculty of Medicine.

Medicine, R. Saundby, M.D.; O. J. Kauffmann, M.D.
Surgery, W. F. Haslam, F.R.C.S.; G. A. Leedham Green, F.R.C.S.
Anatomy, P. Thompson, M.D.
Physiology, E. W. Wace Carlier, M.D.
Therapeutics, Douglas Stanley, M.D.
Forensic Medicine, J. T. J. Morrison, F.R.C.S.
Hygiene and Public Health, A. Bostock Hill, M.D.
Midwifery, Thomas Wilson, F.R.C.S.
Pathology, R. F. C. Leith, F.R.C.P.
Dental School, J. Humphreys, M.D.S. (*Hon. Sec.*).

TRAINING COLLEGES.

Head Mistress (*Women*), Miss M. S. Lilley, M.A.
Head Master (*Men*), R. A. Jones, M.A.

THE UNIVERSITY OF LIVERPOOL.

Liverpool, 1903. (£2,000.)

Chancellor, The Earl of Derby, K.G., G.C.V.O., C.B., LL.D.
Vice-Chancellor, Sir Alfred Dale, LL.D.
Registrar, Edward Carey, LL.B.
Librarian, John Sampson, D.Litt.

PROFESSORS.

Faculties of Arts, Science, Medicine, Law and Engineering.

Greek (vacant).
Latin, J. P. Postgate, F.B.A.
English Lang. & Philol., H. C. K. Wyld, B.Litt.
English Literature, Oliver Elton, M.A.
French, L. A. Terracher, Litt.D.
Spanish, J. Fitzmaurice-Kelly, F.B.A.
German, W. E. Collinson, M.A.
Russian History, Language and Literature, Bernard Pares, M.A.
Economic Science, E. C. K. Gonner, M.A.
Bacteriology, J. M. Beattie, M.D.
Ancient History, W. R. Halliday, B.Litt.
Modern History, C. K. Webster, M.A.
Philosophy, Alexander Mair, M.A.
Education, E. T. Campagnac, M.A.
Classical Archæology, R. C. Bosanquet, M.A.
Methods & Practice of Archæol., J. Garstang, D.Sc.
Egyptian Archæology, Percy E. Newberry, M.A.
Social Anthropology, Sir J. G. Frazer, D.C.L.
Law, G. H. Emmott, LL.M.
Commercial Law (vacant).
International Law, His Hon. Judge Thomas, LL.D.
Architecture, C. H. Reilly, M.A.
Civic Design, L. P. Abercrombie, M.A.
Mathematics, F. S. Carey, M.A.
,, *Philos. Hist.*, W. H. Young, D.Sc., F.R.S.
Physics, L. R. Wilberforce, M.A.
Inorganic Chemistry, E. C. C. Baly, F.I.C., F.R.S.
Organic Chemistry, R. Robinson, D.Sc.
Physical Chemistry, W. C. McC. Lewis, D.Sc.
Natural History, William A. Herdman, D.Sc., F.R.S.
Botany, R. J. Harvey-Gibson, M.A.
Physiology, J. S. Macdonald, B.A.
Anatomy, A. Melville Paterson, M.D.
Therapeutics, J. Hill Abram, M.D.
Pathology, E. E. Glynn, M.D.
Medicine, T. R. Glynn, M.D.
Surgery, Rushton Parker, F.R.C.S.
Regional Surgery, W. Thelwall Thomas, F.R.C.S.
Midwifery and Gynæcology, H. Briggs, F.R.C.S.
Hygiene, E. W. Hope, D.Sc
Forensic Medicine, R. J. M. Buchanan, M.D.
Bio-chemistry, Walter Ramsden, M.D.
Tropical Sanitation, Sir R. Ross K.C.B., F.R.S.
Tropical Medicine, J. W. W. Stephens, M.D.
Entomology, R. Newstead, M.Sc.
Engineering, W. H. Watkinson, M.Eng.
Electrical Engineering, E. W. Marchant, D.Sc.
Civil Engineering, S. W. Perrott, M.A.I.
Naval Architecture, T. B. Abell, M.Inst.N.A.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss D. Chapman, M.A.

DAY TRAINING COLLEGE (Men and Women).

Principal, J. H. Gettins, B.A.
Warden, Kenneth Forbes, M.A.

THE UNIVERSITY OF LEEDS.
Leeds, 1904. (£2,000.)
Chancellor, The Duke of Devonshire, G.C.V.O., LL.D.
Pro-Chancellor, Arthur G. Lupton, LL.D.
Vice-Chancellor, Michael E. Sadler, C.B., LL.D.
Accountant, G. R. Brench.
Clerk to the Senate, F. T. Baines, B.A.
Secretary, A. E. Wheeler.

PROFESSORS.

Faculties of Arts (including Commerce & Law), Science & Technology.
Classics, W. Rhys Roberts, Litt.D.; B. M. Connal, M.A.
English Lang. and Lit., G. S. Gordon, M.A.
English Lang., F. W. Moorman, Ph.D.
French, Paul Barbier fils, M.A.
German, A. W. Schüddekopf, Ph.D.
History, Arthur J. Grant, M.A.
Philosophy, C. M. Gillespie, M.A.
Economics, D. H. Macgregor, M.A.
Education (vacant).
Law, W. R. Phillips, LL.M.
Mathematics, L. J. Rogers, M.A.
Physics (vacant).
Chemistry, A. Smithells, B.Sc., F.R.S.

Midwifery, P. E. Barber, M.R.C.S.
Diseases of Women, M. H. Phillips, F.R.C.S.
Public Health, H. Scurfield, M.D.
Ophthalmology, G. H. Pooley, F.R.C.S.
Engineering, W. Ripper, D.Eng.
Mining, F. E. Armstrong, M.Sc.
Applied Chemistry, L. T. O'Shea, M.Sc.
Metallurgy, J. O. Arnold, D.Met., F.R.S.
Law, W. F. Trotter, LL.M.; E. Bramley, M.A.

TRAINING COLLEGE.

Master of Method, C. Birchenough, M.A.
Mistress of Method, Miss N. G. R. Taylor, B.A.

UNIVERSITY OF BRISTOL. 1909. (£2,000.)
Chancellor, Viscount Haldane, K.T., LL.D.
Vice-Chancellor, Sir Isambard Owen, D.C.L.
Treasurer, George A. Wills, LL.D.
Registrar, James Rafter, M.A.

PROFESSORS.

Agriculture, Drysdale Turner, F.A.S.I.
Agricultural Biology, Bertie T. P. Barker, M.A.
Anatomy, Edward Fawcett, M.D.
Applied Chemistry, Julius Wertheimer, D.Sc.
Applied Mathematics, Edmund S. Boulton, M.A.
Chemistry, Francis Francis, D.Sc.
Civil Engineering, Robert M. Ferrier, M.Sc.
Classics, Francis Brooks, M.A.
Electrical Engineering, David Robertson, D.Sc.
English, Arthur R. Skemp, Ph.D.
Geology, Sidney H. Reynolds, M.A.
Greek, John F. Dobson, M.A.
Mathematics, Frank R. Barrell, M.A.
Mechanical and Mining Engineering, John Munro, M.Sc.
Medicine, J. Michell Clarke, M.D.; Francis H. Edgeworth, M.D.
Modern History, George H. Leonard, M.A.
Motor-Car Engineering, William Morgan, B.Sc.
Natural History, J. R. Ainsworth-Davis, M.A.
Obstetrics, Walter C. Swayne, M.D.
Pathology, I. Walker Hall, M.D.
Physiology, A. F. Stanley Kent, M.A.
Psychology and Ethics, C. Lloyd Morgan, D.Sc., F.R.S.
Surgery, Charles A. Morton, F.R.C.S.; James Swain, M.D.

Agricultural and Horticultural Research Station, Long Ashton.
Director, Professor B. T. P. Barker, M.A.

Secondary Training Department.
Lecturer in Education, Miss G. E. Hodgson, D.Litt.

Elementary Training Department.
Master of Method, T. S. Foster, M.A.
Mistress of Method, Miss A. Mullock, M.Sc.

Hall of Residence for Women.
Warden, Miss M. C. Staveley, M.A.

ENGLISH UNIVERSITY COLLEGES.

EXETER—ROYAL ALBERT MEMORIAL, UNIVERSITY COLLEGE.

Principal, A. W. Clayden, M.A.
Sec. and Registrar, A. Woodbridge.
DAY TRAINING COLLEGE (Men and Women).—
Prof. of Education, A. E. Dean, M.A.
Lady Tutor, Miss A. J. Walker, M.A.

MUNICIPAL SCHOOL OF TECHNOLOGY, Manchester.

Principal, J. C. Maxwell Garnett, M.A.
Registrar, H. Williams.

NEWCASTLE-UPON-TYNE — ARMSTRONG COLLEGE. (*See* University of Durham.)

NOTTINGHAM—UNIVERSITY COLL. 1880.

Principal, W. H. Heaton, M.A.
Registrar, T. P. Black, Ph.D.

TRAINING COLLEGE.

Head of Department, Prof. Henderson, B.A.
Normal Mistress, Miss Bird, L.L.A.

READING—UNIVERSITY COLLEGE. (£5,800.)

Principal, W. M. Childs, M.A.
Registrar, F. H. Wright, M.A.

SOUTHAMPTON—UNIVERSITY COLL.

Principal, Alex. Hill, M.A., M.D.
Registrar, D. Kiddle.

Wales.

THE UNIVERSITY OF WALES. 1893. (£5,500.)

"PRIFYSGOL CYMRU."

Chancellor, H.M. The King.
Senior Deputy do., The Lord Kenyon, K.C.V.O.
Vice-Chancellor, Principal E. H. Griffiths, Sc.D., F.R.S.
Warden, Guild of Graduates, A. H. Trow, D.Sc.
Treas., Lt.-Gen. Sir J. Hills-Johnes, *V.C.*, G.C.B.
Registrar, J. M. Angus (Cathays Park, Cardiff).
Treas., Guild of Graduates, J. G. Davies, M.A.
Clerk, Guild of Graduates, W. Jenkyn Jones, M.A.

I. UNIVERSITY COLLEGE OF WALES—Aberystwyth (1872). (£9,000.)

Principal, Thomas Francis Roberts, LL.D.
Registrar, J. H. Davies, M.A.
Librarian, J. D. Williams, B.A.

PROFESSORS.

Greek, J. W. Marshall, M.A.
Latin, E. Bensly, M.A.
German and Oriental Lang. (vacant).
English Lang. and Lit., J. W. H. Atkins, M.A.
History, E. Edwards, M.A.
Do., Colonial, T. S. Roberts, M.A.
Math., Nat. Philos., & Astron., R. W. Genese, M.A.
Applied Mathematics, G. A. Schott, D.Sc.
Logic and Philosophy, W. Jenkyn Jones, M.A.
Political Science, E. A. Lewis, D.Sc.
Chemistry, Alex. Findlay, D.Sc.
Physics, D. Morgan Lewis, M.A.
Zoology, H. J. Fleure, D.Sc.
Geology, O. T. Jones, D.Sc.
Botany, J. Lloyd Williams, D.Sc.
Welsh & Comparative Philology (vacant).
French, J. L. André Barbier, L. ès L.
Education, C. R. Chapple, M.A.; Foster Watson, D.Litt. (*Emeritus*).
Law, T. Arthur Levi, B.C.L.
Music, David Jenkins, Mus.Bac.
Agriculture, C. Bryner Jones, M.Sc.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss C. P. Tremain, B.A.

MEN STUDENTS' HOSTEL.

Warden, H. H. Paine, B.Sc.

II. UNIVERSITY COLLEGE OF NORTH WALES—Bangor (1884). (£9,500.)

Principal, Sir Harry R. Reichel, LL.D.
Secretary and Registrar, J. E. Lloyd, M.A.

PROFESSORS.

Constitutional History, The Principal.
History, J. E. Lloyd, M.A.
Greek, T. Hudson Williams, D.Litt.
Latin, E. V. Arnold, Litt.D.
French, O. H. Fynes-Clinton, M.A.
German, E. L. Milner-Barry, M.A.
English Language & Lit., W. Lewis Jones, M.A.
Semitic Languages, T. Witton Davies, Ph.D.
Logic, Philosophy and Pol. Econ., J. Gibson, M.A.
Mathematics, G. H. Bryan, Sc.D., F.R.S.
Physics, E. Taylor Jones, D.Sc.
Chemistry, K. J. P. Orton, Ph.D.
Botany, R. W. Phillips, D.Sc.
Welsh, J. Morris Jones, M.A.
Agriculture, Robert G. White, M.Sc.
Zoology, P. J. White, M.B., F.R.S.E.
Education, R. L. Archer, M.A.
Forestry, Fraser Story, F.R.S.E.

HALLS OF RESIDENCE.

Men—Warden, Prof. R. L. Archer, M.A.
Women—Warden, Miss M. O. Davis.

III. UNIVERSITY COLL. OF SOUTH WALES AND MONMOUTHSHIRE—Cardiff (1883). (£9,500.)

Principal, Ernest Howard Griffiths, Sc.D., F.R.S.
Registrar, D. J. A. Brown.

PROFESSORS.

Greek, G. Norwood, M.A.
Latin, O. L. Richmond, M.A.
Logic and Philosophy, H. J. W. Hetherington, M.A.
Economics and Polit. Science, W. J. Roberts, M.A.
English Lang. & Literature, H. Littledale, M.A.
French Lang. & Literature, Paul Barbier.
Education, W. Phillips, M.A.; Barbara Foxley, M.A.
Applied Mathematics, R. H. Pinkerton, M.A
Celtic, Thomas Powel, M.A.
Experimental Philosophy, The Principal.
Physics, A. L. Selby, M.A.
Chemistry, C. M. Thompson, D.Sc.
Engineering, F. Bacon, M.A.
Zoology, W. N. Parker, Ph.D.
Botany, A. H. Trow, D.Sc.
Geology, T. F. Sibly, D.Sc.
History, H. Bruce, M.A.
Metallurgy, A. A. Read, D.Met.
Music, D. Evans, Mus.Doc.

Faculty of Medicine.

Anatomy, David Hepburn, M.D., F.R.S.E.
Physiology, J. B. Haycraft, M.D., F.R.S.E.
Pathology and Bacteriology, E. Emrys-Roberts, M.D.

ABERDARE HALL.

Principal, Miss Kate Hurlbatt.

LAMPETER.

ST. DAVID'S COLLEGE (1827).

Principal & Bursar, Rev. Ll. J. M. Bebb, D.D.

PROFESSORS.

Theology and Greek, The Principal.
Math. & Phys. Science, A. W. Scott, M.A.
Latin, G. W. Wade, D.D., *Librarian*.
English & Philos., H. Walker, LL.D.
Theology and Hebrew, E. T. Green, M.A.
Welsh (vacant).

Theology (Lect.), Rev. R. H. Richards, M.A.
History (Lect.) (vacant).
Mathematics (Lect.), E. H. D. Whitfield, B.A.
Classics (Lect.), H. J. Maidment, M.A.

[Lampeter possesses by Charter the privilege of conferring degrees B.A. and B.D., and is affiliated to Oxford and Cambridge.]

Scotland.

UNIVERSITY OF ST. ANDREWS. 1411.

(£16,800.)

Chancellor, Rt. Hon. Lord Balfour of Burleigh, K.T.
Vice-Chancellor, Principal John Herkless, D.D.
Rector, The Marquess of Aberdeen, K.T., G.C.M.G., LL.D., D.C.L.
Principal, John Herkless, D.D.
Representative in Parliament, Rt. Hon. Sir R. B. Finlay, K.C., LL.D.
Registrar & Secretary, Andrew Bennett.
Librarian, J. M. Anderson, LL.D. *Factor*, W. Wilkie.

UNITED COLLEGE OF ST. SALVATOR AND ST. LEONARD.

Principal, John Herkless, D.D. £1,875

PROFESSORS.

Humanity, Wallace M. Lindsay, M.A.	£750
Logic & Metaphysics, G. F. Stout, LL.D.	750
Greek, John Burnet, M.A.	750
Mathematics, P. R. Scott Lang, M.A.	750
Moral Philosophy, Alfred E. Taylor, M.A.	750
Nat. Philos., A. S. Butler, M.A.	750
Natural History, W. C. McIntosh, M.D.	750
Chemistry, James C. Irvine, Ph.D.	750
Education, John Edgar, M.A.	750
Engl. Literature, A. Lawson, M.A.	750
Anatomy, David Waterston, M.A., M.D.	700
Physiology, Percy T. Herring, M.D.	750

COLLEGE OF ST. MARY.

Prin., Very Rev. George Galloway, D.D.

PROFESSORS.

Primarius Prof. of Divinity, The Principal	£750
Biblical Criticism, Rev. Allan Menzies, D.D.	650
Ecclesiastical Hist., Rev. Archibald Mair, D.Litt.	650
Oriental Languages, Rev. D. M. Kay, B.D.	750

UNIVERSITY COLLEGE, DUNDEE (1880).

Principal, John Yule Mackay, LL.D. £850

PROFESSORS.

Mathematics, J. E. A. Steggall, M.A.	£600
Natural Philosophy, William Peddie, D.Sc.	600
Chemistry, Alexander Mackenzie, B.Sc.	600
Natural History, D'Arcy W. Thompson, B.A.	600
Botany (White's), Patrick Geddes, F.R.S.E.	229
Anatomy (Cox's), J. Yule Mackay, LL.D.	
Physiology, E. W. Reid, B.A.	600
Engin. and Drawing, A. H. Gibson, D.Sc.	600

CONJOINT MEDICAL SCHOOL, DUNDEE.

PROFESSORS.

Pathology, L. R. Sutherland	£593
Surgery, D. MacEwan, M.D.	400
Medicine, Alex. M. Stalker	371
Midwifery, Jno. A. C. Kynoch	400
Materia Medica, Chas. R. Marshall	650

UNIVERSITY OF GLASGOW. 1450.

(£20,880.)

Chancellor, The Earl of Rosebery, K.G., K.T., LL.D.
Vice-Chancellor, The Principal.
Rector, M. Raymond Poincaré.
Principal, Sir Donald MacAlister, K.C.B., LL.D. *£2,000
Dean of Faculties, Emeritus Professor William Stewart, D.D.
Representative in Parliament, Sir Henry Craik, K.C.B., LL.D.

PROFESSORS.

Divinity, Rev. H. M. B. Reid, D.D.	*£569
Chemistry (vacant)	1,300
Botany, Frederick O. Bower, D.Sc., F.R.S.	830
Civil Engineering, J. D. Cormack, D.Sc.	900
Conveyancing, James Moir, LL.D.	600
Naval Architecture (including Marine Engineering), Sir John H. Biles, LL.D.	800
Surgery, Sir William Macewen, D.Sc., F.R.S.	800
Astronomy, Ludwig Becker, Ph.D.	600
Midwifery, Murdoch Cameron, M.D.	700
Moral Philosophy, Sir Henry Jones, LL.D.	*800
Political Economy, W. R. Scott, Litt.D.	600
Materia Medica, R. Stockman, M.D.	700
Forensic Medicine, John Glaister, M.D.	600
Church History, Rev. James Cooper, D.D.	*442
Pathology, Robert Muir, M.D., F.R.S.	1,100
Humanity, J. S. Phillimore, M.A.	*1,000
Natural Philosophy, A. Gray, LL.D., F.R.S.	1,000
History, Dudley J. Medley, M.A.	900
Practice of Medicine, T. K. Monro, M.D.	*800
Logic & Rhetoric, Robert Latta, D.Ph.	*800
Zoology, John G. Kerr, M.A., F.R.S.	800
English Lang. & Lit., Wm. M. Dixon, Litt.D.	900
Geology, John W. Gregory, D.Sc., F.R.S.	600
Law, William M. Gloag, K.C., B.A.	*800
Greek, Gilbert A. Davies, M.A.	*1,000
Physiology, D. Noel Paton, M.D., F.R.S.	1,100
Mining, Chas. Latham, M.Inst.M.E.	600
Hebrew & Semitic Lang., W. B. Stevenson, B.D.	*700
Anatomy, Thomas H. Bryce, M.D.	*1,200
Mathematics, George A. Gibson, LL.D.	*1,000
Biblical Criticism, Rev. G. Milligan, D.D.	584
Obstetrics (Muirhead), J. M. Munro Kerr, M.D.	500
Surgery (St. Mungo), Robert Kennedy, M.D.	500
Pathology (St. Mungo-Notman), J. H. Teacher, M.D.	600
Medicine (Muirhead), W. K. Hunter, M.D.	500
Scottish History and Literature, R. S. Rait, M.A.	700

Sec. to Univ. Court, A. E. Clapperton, LL.D.
Clerk of Senatus, Professor G. Milligan, D.D.
Registrar, Albert Morrison.
Librarian, James L. Galbraith.
Clerk to Gen. Council, Archibald Craig, LL.B.

QUEEN MARGARET COLLEGE (Women).

Mistress, Frances H. Melville, B.D.

UNIVERSITY OF ABERDEEN. 1494.

(£23,400.)

Chancellor, The Earl of Elgin and Kincardine, K.G., G.C.S.I., G.C.I.E., M.A., LL.D., D.C.L. 1914
Rector, Rt. Hn. Winston L.S.-Churchill, M.P. 1914
Vice-Chancellor and Principal, Very Rev. George Adam Smith, D.D. *£1,500
Represent. in Parlt., Sir Henry Craik, K.C.B., LL.D.
Secretary of the University, Donaldson R. Thom, M.A.
Registrar, R. Walker, LL.D.
Librarian and Clerk of the General Council, P. J. Anderson, LL.B.

* The sums appended to the various Chairs are the Normal Salaries received in the year 1914-1915. Each of those marked * has an official residence in addition to his salary.

PROFESSORS.

Greek, John Harrower, M.A., LL.D. *£900
Humanity, Alex. Souter, D.Litt. *800
English Literature, Adolphus A. Jack, M.A. 700
Hist. & Archæology, Chas. Sanford Terry, M.A. 666
Logic, William Leslie Davidson, LL.D. 700
Moral Philosophy, Jas. Black Baillie, D.Ph. 700
Mathematics, Hector M. Macdonald, M.A., F.R.S. *800

Chairman of Governors, Sir J. Savory, Bart.
Vice-Chairman, L. B. Sebastian.
Clerk, Ernald R. Warre.

MUSIC.

ROYAL ACADEMY OF MUSIC (1822), York Gate, Marylebone Road, N.W.

[The R.A.M. was founded in 1822 by Lord Burghersh (afterwards Earl of Westmorland) for the cultivation of the science of music. The average number of students attending in 1915 was 542. There are 98 Fellows (F.R.A.M.), 522 Associates (A.R.A.M.), and 6,389 Licentiates (L.R.A.M.), of whom 1 Fellow, 10 Associates, and 435 Licentiates were elected in 1915.]
President, H.R.H. the Duke of Connaught, K.G.
Chairman of Committee, Sir Edward E. Cooper.
Principal, Sir A. C. Mackenzie, Mus.D., F.R.A.M.
Lady Superintendent, Mrs. Russell, A.R.A.M.
Secretary, J. A. Creighton.

ROYAL COLLEGE OF MUSIC (1883), Prince Consort Road, South Kensington, S.W.

Patron, H.M. The King.
President, H.R.H. Prince Christian, K.G.
Director, Sir Hubert Parry, Bt., C.V.O., D.C.L., Mus.Doc.
Hon. Secretary, Charles Morley.
Registrar, Claude Aveling, B.A.

ROYAL IRISH ACADEMY OF MUSIC, Westland Row, Dublin.

Secretary. C. E. Grahame-Harvey.

GUILDHALL SCHOOL OF MUSIC.

[The School grants a diploma of Licentiateship (L.G.S.M.) and of Associateship (A.G.S.M.), open to students of eight terms' standing and over.]
Principal, Landon Ronald.
Secretary, H. Saxe-Wyndham.
Lady Superintendent, Mrs. Hemming.
Professors, 130 in number.

LONDON COLLEGE OF MUSIC, Gt. Marlborough Street, W.

Principal, Frederick J. Karn, Mus.B.
Director of Examns., G. Augustus Holmes.
Secretary, A. Gambier Holmes.

TONIC SOL-FA COLLEGE, 26 Bloomsbury Square, W.C. (1875).

President, Sir Walter Parratt, M.V.O., Mus.D.
Secretary, Walter Harrison, Mus.Bac.

TRINITY COLLEGE OF MUSIC (1872), Mandeville Place, Manchester Square, W.

Chairman of Board, Sir Fredk. Bridge, C.V.O., Mus.D.
Secretary, Shelley Fisher.

ROYAL COLLEGE OF ORGANISTS, Kensington Gore, S.W.

President, Sir Alex. C. Mackenzie, Mus.D.
Hon. Sec., Dr. H. A. Harding.
Registrar, Thomas Shindler, LL.B.

ROYAL MANCHESTER COLLEGE OF MUSIC (1893). Ducie St., Oxford Rd., Manchester.

Patroness, H.M. Queen Alexandra.
President, Sir W. H. Houldsworth, Bart., LL.D.
Principal, Dr. Adolph Brodsky.
Registrar, Stanley Withers.

ROYAL MILITARY SCHOOL OF MUSIC, Kneller Hall, Twickenham.

Commandant, Col. T. C. F. Somerville, M.V.O.
Adjutant & Qr.-Mr., Major J. M. Bett.
Director of Music, Major A. J. Stretton, M.V.O.

ROYAL NAVAL SCHOOL OF MUSIC, Eastney Barracks, Portsmouth.

Superintendent, Lt.-Col. Herbert Slessor.
Musical Director, Capt. C. Franklin, R.M.L.I.
Quarter-Master, Lieut. H. E. Lideard, R.M.L.I.

VICTORIA COLLEGE OF MUSIC, 18 Berners Street, W.

Principal, J. H. Lewis, Mus.D.
Chairman, J. M. Bentley, Mus.Doc.
Secretary, H. Portman Lewis.

NAVAL.

ROYAL NAVAL COLLEGE, Greenwich.

President (vacant).
Captain, Edmund P. E. Jervoise, R.N. (ret.).
Commander (vacant).
Director of Naval Education, Sir J. Alfred Ewing, K.C.B., LL.D., F.R.S.
Medical Officers, Fleet-Surg. W. A. Whitelegge, M.D., R.N.; C. H. Fernie, M.R.C.S.
Store Officer, Cashier, &c., Staff-Paymaster George Whitcroft, R.N. (ret.).
Secretary, Henry F. V. Negus.
Clerk, A. Wotton.
Civil Engineer, J. Young, A.M.I.C.E.
Curator of Museum, Lieut. J. T. Berry, R.N. (ret.).

ROYAL NAVAL COLLEGE, Dartmouth.

Rear-Adm. Commg., N. C. Palmer, C.V.O.
Commander, Bernard Long, R.N.
Headmaster, C. E. Ashford, M.V.O., M.A.

ROYAL NAVAL COLLEGE, Osborne.

Captain, Hon. A. E. Holmes à Court, R.N. (ret.).
Commander, Capt. Hon. E. S. H. Boyle, R.N. (ret.).
Headmaster, C. Godfrey, M.V.O., M.A.

ROYAL HOSPITAL SCHOOL, Greenwich.

Supt., Captain E. M. C. Cooper Key, M.V.O., R.N.
Headmaster, J. E. Evans, B.A.

Mechanical Training Establishment, R.N., Chatham.

Lieut.-Commander, R. R. Harrison, R.N.R.
For Mechanicians:—*Schoolmaster*, C. W. Willsteed, A.M.I.Mech.E. (Discontinued.)
For Boy Artificers:—*Schoolmasters*, W. H. T. Pain (*Portsmouth*); L. W. Mathieson (*Devonport*).

Training Ships for Royal Navy.

FOR MEN :—*H.M.S. Albemarle* (gunnery), *Duncan* (gunnery), *Argonaut, Vestal, Vindictive, Niger, Dryad* (Navigation School Ship), and *Harrier* (tender to *Dryad*).

FOR BOYS :—*H.M.S. Fisgard* (4 ships, for boy artificers), *Ganges, Impregnable* (2 ships), *Indus* (5 ships, for supernumerary artificers); and Marine Society's Ship *Warspite* and National Refuges Ships *Arethusa* and *Chichester* (see Societies).

Exmouth, moored off Grays, Essex (and seagoing tender *Exmouth II.*). Boys trained for Navy and Mercantile Marine, and for employment in naval and military bands. -*Capt. Supt.*, Capt. R. B. Colmore, R.N.

Training Ships for Mercantile Marine.

THAMES NAUTICAL TRAINING COLLEGE (INCORPORATED).—H.M.S. *Worcester*, off Greenhithe *Capt. Supt.*, D. Wilson Barker, R.N.R., F.R.S.E.

CADET SCHOOL SHIP *Conway*, Rock Ferry, Birkenhead. *Captain*, H. W. Broadbent, R.N.R.

TRAINING SHIP *Cornwall*, off Purfleet (Reformatory Ship). *Supt.*, Capt. H. W. Steele, R.N.; *Sec.*, W. Millachip, 66 Coleman Street, E.C.

TRAINING SHIP *Clio*, Bangor (North Wales, Chester, and Border Counties Training Ship Society). *Capt. Supt.*, Capt. F. G. Langdon, R.N.

TRAINING SHIP *Indefatigable*, New Ferry, Birkenhead. For boys of good character only. *Capt. Supt.*, Commander H. Butterworth, R.N.

TRAINING SHIP *Mercury*, Hamble, Southampton, Hants. For boys of good character only. *Capt. Supt.*, C. B. Fry, Lieut. R.N.R.

TECHNICAL EDUCATION.

In addition to the Institutions enumerated below there are Faculties of Engineering at the Universities of *Birmingham, Bristol, Cambridge, Durham, Leeds, Liverpool, London, Manchester*, and *Sheffield; Wales; St. Andrews, Glasgow*, and *Edinburgh; Dublin, National University of Ireland*, and the Queen's University of *Belfast*.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained or aided by the London County Council are the following: -

Institutes entirely maintained by the L.C.C.

BEAUFOY INSTITUTE, Prince's Road, Vauxhall Street, S.E.—*Principal*, A. Ritchie-Scott, B.Sc.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Road, S.E.—*Principal*, W. B. Dalton.

CAMDEN SCHOOL OF ART, Dalmeny Avenue, N. —*Principal* (*acting*), W. G. Thomas, A.R.C.A. (*hon.*).

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, Fred V. Burridge.

CLAPHAM SCHOOL OF ART, Edgely Road, High Street, Clapham, S.W.—*Principal*, L. C. Nightingale.

HACKNEY INSTITUTE.—*Principal*, Percy R. Kirk, M.A., A.M.I.C.E.

(a) *Hackney Institute*, Dalston Lane, N.E.

(b) *Hackney Institute, Sir John Cass's branch*, Cassland Road, N.E.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W.—*Acting Principal*, Chas. A. Eva, A.R.C.A.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Huntington, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Principal*, J. Bowyer.

SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W.—*Principal*, H. W. Richards.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, M.I.N.A.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C.—*Principal*, A. J. Bull.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N. — *Principal*, Shadrach Hicks.

TRADE SCHOOL FOR GIRLS (L.C.C. Hammersmith), Lime Grove, Shepherd's Bush, W.—*Lady Superintendent*, Miss M. A. J. Boon.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C.—*Headmistress*, Miss F. E. I. Smythe.

WESTMINSTER TECHNICAL INSTITUTE. Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, J. Stuart Ker, B.Sc. *Headmaster*, School of Art, A. H. Christie (*acting*).

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, F. H. Newman, Ph.D.

BIRKBECK COLLEGE, Breams Buildings, Chancery Lane.—*Principal*, G. Armitage-Smith, D.Lit.

BOROUGH POLYTECHNIC, Borough Road, S.E.—*Principal*, C. T. Millis, M.I.Mech.E.

CITY OF LONDON COLLEGE, White Street. Moorfields. —*Principal*, Sidney Humphries, B.A., LL.B.

NORTHAMPTON POLYTECHNIC, Clerkenwell.—*Principal*, R. M. Walmsley, D.Sc.

NORTHERN POLYTECHNIC, Holloway Rd., N.—*Principal*, R. S. Clay, D.Sc.

REGENT STREET POLYTECHNIC, 309 Regent Street, W.—*Director of Education*, Robert Mitchell.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate. —*Principal*, C. A. Keane, D.Sc.

SOUTH-WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A.

WOOLWICH POLYTECHNIC, William Street, Woolwich.—*Principal*, A. F. Hogg, M.A.

Technical Institutes, &c., aided by the L.C.C.

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Albury Street, Deptford.—*Lady Superintendent*, Miss R. Mason.

ALDENHAM INSTITUTE, Goldington Crescent, N.W.—*Hon. Sec.*, H. S. Mingard.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett, D.D.

CHURCH INSTITUTE, Wiseton Rd., Upper Tooting. —*Hon. Secretary*, C. H. Baker

COLLEGE FOR WORKING WOMEN Fitzroy Street, W.—*Hon. Secretary*, Miss F. Martin.

CRAFT SCHOOL, 37–39 Stepney Green, E.—*Principal*, Gilbert C. Cooke.

DEVAS INSTITUTE, New Road, Battersea, S.W.—*Secretary*, W. F. Holmes.

GOLDSMITHS' COLLEGE, New Cross, S.E.—*Warden*, W. Loring, M.A.

HEROLD'S INSTITUTE, Drummond Road, Bermondsey. (*In connexion with the Borough Polytechnic*).

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.—*Principal*, Dr. J. Gordon Parker, F.I.C.

MARYON WILSON SCHOOL OF DOMESTIC ECONOMY, Woolwich Road, Charlton, S.E.—*Lady Superintendent*, Miss R. Mason.

MORLEY COLLEGE, Waterloo Road, S.E.—*Vice-Principal*, Miss C. I. Brennand.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen Street, Borough, S.E.—*Lady Principal*, Miss R. A. Roberts.

ROYAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Principal*, Miss E. Bradshaw.

SAILORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, A. E. Loder, R.N.R.

ST. BRIDE FOUNDATION INSTITUTE, Bride Lane, Fleet Street, E.C. (for Printing Trades).—*Principal*, J. R. Riddell.

SCHOOL OF ART WOOD-CARVING, 39 Thurloe Place, S.W.—*Secretary*, J. Saltmarsh, I.S.O.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W.—*Principal*, A. R. Gridley, M.A. (*acting*).

WORKING MEN'S COLLEGE, Crowndale Rd., N.W. —*Superintendent*, E. C. Duchesne.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, Lee Road, Blackheath.—*Headmaster*, J. H. Hale.

CLAPTON AND STAMFORD HILL, 81 Clapton Common.—*Headmistress*, Miss F. Edith Giles.

LAMBETH, St. Oswald's Place, Upper Kennington Lane, S.E.—*Headmaster*, T. McKeggie.

ST. MARTIN'S, 107 Charing Cross Road, W.C.—*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122–124 Kennington Park Road (see below).

II.—OTHER LONDON INSTITUTIONS.

Imperial College of Science and Technology, South Kensington, S.W.

Visitor: H.M. THE KING.

Chairman of Governing Body, The Marquess of Crewe, K.G.

Chairman of Executive Committee, Right Hon. Arthur H. D. Acland.

Chairman of Delegacy, Sir John Wolfe Barry, K.C.B., F.R.S.

An Institution for the most advanced training and research in Science, especially in its application to industry. The Departments and Professors are :—

Royal College of Science.

Mathematics: A. R. Forsyth, F.R.S., A. N. Whitehead, F.R.S. (*Applied*); *Physics:* H. L. Callender, F.R.S., R. J. Strutt, F.R.S., W. Watson, F.R.S., A. Fowler, F.R.S. (*Astro-Physics*); *Chemistry:* H. B. Baker, F.R.S., J. F. Thorpe, F.R.S. (*Organic*), J. C. Philip (*Physical*); *Fuel and Refractory Materials:* W. A. Bone, F.R.S.; *Biology:* J. B. Farmer, F.R.S. (*Botany*), E. W. McBride, F.R.S. (*Zoology*), V. H. Blackman, F.R.S. (*Plant Physiology*), H. G. Plimmer, F.R.S. (*Comparative Pathology*), P. Groom (*Woods and Fibres Technology*), H. M. Lefroy (*Entomology*); *Geology:* W. W. Watts, F.R.S., C. G. Cullis (*Economic Mineralogy*).

Royal School of Mines.

Mining: W. Frecheville; *Metallurgy:* H. C. H. Carpenter; *Oil Technology:* W. W. Watts, F.R.S.

City and Guilds (Engineering) College.

Mechanical Engineering and Motive Power: W. E. Dalby, F.R.S.; *Civil Engineering:* S. M. Dixon; *Electrical Engineering:* T. Mather, F.R.S.

Rector, Sir Alfred Keogh, K.C.B.

Secretary, A. Gow, M.A.

CRYSTAL PALACE (School of Practical Engineering).—*Principal*, J. W. Wilson, M.Inst.C.E.

EAST LONDON COLLEGE (*see* University of London).

FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE (Southampton Row, W.C.).—*Princ.*, A. Russell, D.Sc.

INSTITUTE OF CERTIFICATED GROCERS (Incorporated), 4 Cullum St., E.C.—*Sec.*, Sidney W. Eynon.

POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Civil, Motor, Aero, and Mechanical), 307–311 Regent Street, W.—Henry J. Spooner, M.I.Mech.E.

SCHOOL OF CARRIAGE BUILDING (Balderton St., W.).—*Headmaster*, Ernest Bailey.

SCHOOL OF CHEMISTRY AND PHARMACY (Brixton, S.W.).—*Principal*, A. B. Griffiths, F.C.S.

TRADES' TRAINING SCHOOLS, 153 Great Titchfield St., W.—*Director*, H. Phillips Fletcher, F.R.I.B.A.

WILLESDEN POLYTECHNIC, Priory Park Road, N.W.—*Principal*, A. J. Bird.

PROVINCIAL TECHNICAL COLLEGES.

ASHTON-UNDER-LYNE (Heginbottom Techn.Sch.). —*Principal*, A. Morris, B.Sc.

BANBURY (Munic. Techn. Sch.).—*Headmaster*, S. H. Beale.

BARROW-IN-FURNESS (Techn. Sch.).—*Princ.*, G. Grace, B.Sc.

BATH (City Techn. Sch.).—*Director*, A. G. Day, A.M.I.Mech.E.

BATLEY (Techn. and Art Sch.).—*Director*, G. R. H. Danby, M.A.

BELFAST (Munic. Techn. Inst.).—*Princ.*, F. C. Forth, F.R.C.Sc.I.

BIRKENHEAD (Holt Techn. Sch., Tranmere).—*Princ.*, J. E. L. Barnes, M.I.M.E.

BIRMINGHAM (Munic. Techn. Sch.). — *Princ.*, W. E. Sumpner, D.Sc.

„ (Tech. Sch., Handsworth).—*Princ.*, W. E. Harrison.

„ (Techn. Sch., Aston).—*Princ.*, C. A. White, M.Sc.

„ (Vittoria St.—For Jewellers and Silversmiths).—*Headmaster*, A. J. Gaskin.

BLACKBURN (Munic. Techn. Sch.).—*Princ.*, R. H. Pickard, D.Sc.

BOLTON (Munic. Techn. Sch.).—*Director*, F. Wilkinson, F.G.S.

BOOTLE (Munic. Techn. Sch.). — *Principal*, Laurence Small, B.Sc.

BRADFORD CITY (Techn. Coll.).—*Princ.*, Prof. W. M. Gardner, M.Sc.

BRIERLEY HILL, STAFFS (Techn. Inst.).—*Princ.*, A. Gibbons, F.R.A.S.

BRIGHOUSE (Techn. Sch.).—*Sec.*, T. Walling, M.A.

BRIGHTON (Munic. Techn. Coll.). — *Princ.*, W. Beckit Burnie, D.Sc.

BRISTOL (Merchant Venturers' Technical Coll.). —*Princ.*, Prof. J. Wertheimer, D.Sc.; *Sec.*, G. H. Pope, B.C.L.

BURNLEY (Munic. Techn. Inst.).—*Princ.*, T. Crossland, B.Sc.
BURY (Munic. Techn. Sch.).—*Princ.*, R. Wilkinson, B.A.
CAMBORNE (Sch. of Metalliferous Mining).—*Princ.*, T. Knowles, B.Sc.
CARDIFF (Munic. Techn. Sch.).—*Supt.*, Charles Coles, B.Sc.
CHORLEY (Munic. Techn. Coll.).—*Princ.*, G. B. Alcock, B.A.
COVENTRY (Munic. Techn. Inst.).—*Princ.*, J. H. Belcher, B.Sc.
CREWE (Technical Inst.).—*Princ.*, W. H. Bailey.
CROYDON (Central, S. Norwood, and Thornton Heath Polytechnic).—*Princ.*, T. C. Baillie, D.Sc.
DARLINGTON (Techn. Coll.).—*Princ.*, C. E. Handy.
DARWEN (Munic. Techn. Sch.)—*Sec.*, W. Brethe-rick.
DERBY (Techn. Coll.).—*Princ.*, F. W. Shurlock, B.Sc.
DEVONPORT (Munic. Techn. Sch.).—*Princ.*, W. S. Templeton, B.Sc.
DEWSBURY (Techn. Sch.).—*Organising Master*, H. J. Taylor, F.C.S.
DONCASTER (Techn. Coll.).—*Princ.*, J. Eagles, A.R.C.Sc.
DOVER (Sch. of Sci. and Tech., Ladywell).—*Princ.*, H. Schofield, D.Sc.
DUBLIN (Royal College of Science).—*Dean of Faculty*, H. H. Jeffcott, M.I.Mech.E.
EAST HAM (Techn. Coll.).—*Princ.*, W. H. Barker, B.Sc.
EDINBURGH (Heriot-Watt Coll.).—*Princ.*, A. P. Laurie, D.Sc.
GLASGOW (Royal Technical College, George St. (1796), affiliated to the University of Glasgow 1913).—*Director*, R. F. Stockdale, F.R.S.E.
HALIFAX (Munic. Techn. Coll.). — *Princ.*, J. Crowther, B.Sc.
HUDDERSFIELD (Techn. Coll.). — *Princ.*, J. F. Hudson, M.A.
HULL (Munic. Techn. Coll.).—*Princ.*, T. Luxton, B.Sc.
IPSWICH (Munic. Techn. Sch.).—*Princ.*, P. Wilkinson, B.Sc.
KEIGHLEY (Techn. Inst.).—*Princ.*, T. P. Watson, M.A.
LANCASTER (Storey Inst.).—*Headmaster*, F. H. Mould, B.Sc.
LEEDS (Central Techn. Sch.).—*Sec.*, Jas. Graham.
LEICESTER (Munic. Techn. Sch.).—*Principal*, J. H. Hawthorn, M.A.
LINCOLN (Munic. Techn. Sch.). — *Headmaster*, A. E. Collis, M.I.M.E.
LIVERPOOL (Munic. Techn. Sch.).—*Director*, W. Hewitt, B.Sc.; *Princ.*, J. Scholes Hague, M.Sc.
MANCHESTER (Munic. Sch. of Technology).—*Princ.*, J. C. M. Garnett, M.A.
NEWCASTLE-UPON-TYNE (Rutherford Technical College).—*Princ.*, C. L. Eclair-Heath, A.M.I.M.E.
NEWRY (Munic. Techn. Sch.).—*Princ.*, E. Holden, A.R.S.I.
NORTHAMPTON (Techn. Sch.).—*Principal*, J. Blakeman, M.A.
NORWICH (Techn. Inst.).—*Princ.*, H. Ramage, M.A.
NOTTINGHAM (Munic. Techn. Art Sch.).—*Principal*, J. Harrison, A.R.C.A.
OLDHAM (Munic. Techn. Sch.).—*Principal*, H. H. Wareing.
PAISLEY (Techn. Coll.).—*Princ.*, A. McLean, B.Sc.
PETERBOROUGH (County Techn. Sch.).—*Organising Master*, J. S. Bowman, B.Sc.
PLYMOUTH (Munic. Techn. Sch.).—*Headmaster*, J. B. Brown, B.Sc.
PORTSMOUTH (Munic. Coll.).—*Princ.*, O. Freeman, B.Sc.
PRESTON (Harris Inst.).—*Princ.*, T. R. Jolly.
ROCHDALE (Munic. Techn. Sch.).—*Princ. and Sec.*, J. E. Holden.
ROTHERHAM (Techn. Inst.).—*Principal*, James A. Mair.
SALFORD (Royal Technical Inst.).—*Principal*, Bertram Prentice, D.Sc.
SHEFFIELD University (*q.v.*).
SOUTHAMPTON (Hartley Univ. Coll., *q.v.*).
SOUTH WALES AND MONMOUTHSHIRE SCHOOL OF MINES, Cardiff.—*Princ.*, Prof. G. Knox, M.I.M.E.
STOCKPORT (Munic. Techn. Sch.).—*Princ.*, R. J. Brown, M.Sc.
STOKE-ON-TRENT (Longton Sutherland Inst.).—*Principal*, W. Harris, Ph.D.
SUNDERLAND (Munic. Techn. Coll.). — *Princ.*, V. A. Mundella, B.Sc.
SUTTON COLDFIELD (Munic. Techn. Sch.).—*Princ.*, H. Pochin, M.A.; *Actg. Princ.*, W. D. Hills, B.Sc.
SWANSEA (Techn. Coll.).—*Princ.*, W. M. Varley, D.Sc.
SWINDON (Techn. Sch.).—*Princ.*, G. H. Burkhardt, M.Sc.
TONBRIDGE (Techn. Inst.).—*Director*, T. Newsome, A.R.C.Sc.
TOTTENHAM (Polytechnic).—*Sec. and Princ.*, J. W. Tomlinson.
TRURO (Sch. of Mining). — *Princ.*, H. G. Henderson.
TUNBRIDGE WELLS (Techn. Inst.).—*Princ.*, J. Lister, Ph.D.
WALSALL (Munic. Inst.). — *Princ.*, F. E. Thompson, A.R.C.S.
WALTHAMSTOW (Techn. Inst.).—*Princ.*, A. J. Dicks, B.Sc.
WARRINGTON (Munic. Techn. Inst.). — *Princ.*, J. S. Broome, M.Sc.
WELLINGBOROUCH (Techn. Inst.).—*Princ.*, A. J. Ensor, B.Sc.
WEST BROMWICH (Munic. Science and Techn. Sch.).—*Princ.*, R. Lloyd Whiteley, F.I.C.
WEST HAM (Munic. Techn. Inst.).—*Princ.*, J. R. Airey, D.Sc.
WIDNES (Munic. Techn. Sch.).—*Princ.*, C. Richard Lewis, M.A. (*acting*).
WIGAN (Mining and Techn. Coll.).—*Princ.*, S. C. Laws, B.Sc.
WILLESDEN (Polytechnic).—*Sec.*, A. J. Bird.
WOLVERHAMPTON (Munic. Techn. Sch.).—*Princ.*, J. D. Coales, D.Sc.
WORCESTER (Victoria Inst.).—*Sec.*, T. Duckworth.

SOCIOLOGY.

RUSKIN COLLEGE, Walton Street, Oxford.
Principal, Gilbert Slater, D.Sc.
Secretary, Sam Smith.

THEOLOGICAL.

Church of England.

BIRKENHEAD (St. Aidan's). — *Principal*, Rev. Frederic Sumpter Guy Warman, D.D.
BURGH (St. Paul's Missionary Coll.).—*Principal*, Ven. H. H. Foster, M.A.
CAMBRIDGE (Ridley Hall).—*Principal*, Rev. A. J. Tait, D.D.
CAMBRIDGE (Clergy Training School).—*Principal*, Rev. C. E. Lambert, M.A.
CANTERBURY (St. Augustine's Missionary College).—*Warden*, Rt. Rev. Bishop A. M. Knight, D.D.
CHESHUNT (Bishops' College).—*Principal*, Rev. Canon F. C. N. Hicks, M.A.
CHICHESTER.—*Princ.*, Rev. Preb. Rickard, M.A.
CUDDESDON.—*Princ.*, Rev. J. B. Seaton, M.A.

DEVONPORT (Stoke Damarel School).—*Warden*, Rev. Preb. Ponsonby.
DORCHESTER, Oxon. (Foreign Missionary). —*Principal*, Rev M. R. Newbolt, M.A.
ELY.—*Princ.*, Rev. Canon H. L. Goudge, D.D.
FARNHAM (Bishop's Hostel). — *Warden*, Rev. Canon B. K. Cunningham.
HIGHBURY.—See London University.
HOOTON PAGNELL (St. Chad's).—Rev. S. R. P. Moulsdale, B.D.

Medicine, J. F. Craig, M.A.
Materia Medica, G. Dunne, F.R.C.V.S.
Registrar, G. E. Haines.

Secondary Education.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Evans, M.A., 12 King's Bench Walk, Temple, E.C.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town. In considering applications for admission to the Conference, the committee has regard to the scheme or other instrument under which the school is administered and the numbers in the school. As a general rule, there should be 100 boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school; but regard is also paid to the *proportion* of undergraduates to the total number of boys in the school.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS (*Asst. Secy.*, H. Bendall, M.A., 37 Norfolk Street, Strand, W.C.).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control (*e.g.*, Board of Education Scheme) by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

ASSOCIATION OF ASSISTANT MASTERS.—Founded 1891. Incorporated 1901. To further the interests of Assistant Masters in Secondary Schools. Annual meetings are held in London, in January. The Association has 55 branches in England and Ireland. *Secretary*, J. G. Lamb, M.A., 35, John Street, Bedford Row, W.C.

*The * denotes membership of the Head Masters' Conference; the §, of the Incorporated Association of Head Masters.*

* A working agreement has been entered into between Barclay & Co., Ltd., and the United Counties Bank, Ltd., pending the amalgamation of the two Banks.

The Bankers' Clearing House, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31st, 1914, was £14,665,048,000, a decrease of £1,771,356,000 as compared with the year 1913. On Stock Exchange settling days the payments were £1,481,780,000, a decrease of £600,251,000 as compared with 1913. The payments on Consols account days for the same period amounted to £515,566,000, a decrease of £266,326,000 over the year 1913; and on the 4ths of the months the payments for 1914 amounted to £612,256,000, a decrease of £49,762,000 as compared with 1913. The Town Clearing in 1914 amounted to £12,434,322,000; the Metropolitan Clearing to £860,262,000; and the Country Cheque Clearing to £1,370,464,000. The establishment is managed by a Committee of Bankers—*Chairman*, Lord St. Aldwyn; *Deputy Chairman*, R. V. Vassar-Smith, Esq.; *Hon. Sec.*, R. Martin Holland, C.B.; *Acting Managers*, P. W. Matthews (*Chief Inspector*); A. E. Salt (*Deputy Inspector*).

The Numbers represent the Names of Banks in the Alphabetical List on pages 338–341. (H.O.) signifies the Head Office; an asterisk denotes Fair and Market Days.
